100 essays that will change the way: Seventy-nine Short Essays on Design Michael Bierut, 2012-03-20 Seventy-nine Short Essays on Design brings together the best of designer Michael Bierut's critical writing—serious or humorous, flattering or biting, but always on the mark. Bierut is widely considered the finest observer on design writing today. Covering topics as diverse as Twyla Tharp and ITC Garamond, Bierut's intelligent and accessible texts pull design culture into crisp focus. He touches on classics, like Massimo Vignelli and the cover of *The Catcher in the Rye*, as well as newcomers, like McSweeney's *Quarterly Concern* and color-coded terrorism alert levels. Along the way Nabakov's *Pale Fire*; Eero Saarinen; the paper clip; Celebration, Florida; the planet Saturn; the ClearRx pill bottle; and paper architecture all fall under his pen. His experience as a design practitioner informs his writing and gives it truth. In Seventy-nine Short Essays on Design, designers and nondesigners alike can share and revel in his insights.

100 essays that will change the way: Filming, Researching, Annotating Gunter Lösel, Martin Zimper, 2021-07-05 The Handbook Research Video is an introduction to a new type of software and publication based on annotated videos. Practitioners and researchers who work with motion data, for example in the fields of performative art, film, behavioral research or sports science, are supported in their work process and have the opportunity to publish content via video that a printed book cannot convey. The handbook not only presents the findings of the Research Video project at Zurich University of the Arts, but also offers a manual for using the software tool. Low-threshold hands-on access and the absence of a theoretical superstructure allow users to quickly become familiar with and use the software tool.

This broad-ranging volume includes a series of articles that were originally published as a special issue of *Cognition* produced to celebrate the 50th volume of the journal. Written by some of the foremost scientists studying different aspects of the mind, the articles review progress achieved over the past twenty-five years in the main areas of the discipline. They provide a unique record of what is happening today in the field of cognition, with an added historical perspective that is often absent from other volumes that seek to cover so much ground. The chapters have been arranged in sections on Neuropsychology, Thinking, and Language and Perception. These thematic areas deal with theoretical aspects ranging from the status of explanations in cognitive science, to evolutionary accounts of human cognitive faculties, to the way in which humans use these faculties to reason about, perceive, and interact with their environment and each other. There are also contributions dealing with the abilities of young infants and articles that relate behaviors to their underlying neural substrata.

100 essays that will change the way: Collaborative Learning and Writing Kathleen M. Hunzer, 2014-01-10 Although most writing instructors know the benefits of collaborative learning and writing in college writing classes, many remain unsure how to implement collaborative techniques successfully in the classroom. This collection provides a diversity of voices that address the how tos of collaborative learning and writing by addressing key concerns about the process. Fresh essays consider the importance of collaborative work and peer review, the best ways to select groups in classes, integration of collaborative learning techniques into electronic environments, whether group learning and writing are appropriate for all writing classes, and ways special populations can benefit from collaborative activities. Despite its challenges, collaborative learning can prove remarkably effective and this study provides the advice to make it work smoothly and successfully.

100 essays that will change the way: *Excavating Stephen King* James Arthur Anderson, 2020-10-28 Excavating Stephen King: A Darwinist Hermeneutic Study of the Fiction combines approaches from science and literary theory to examine the canon of Stephen King's fiction work in a single critical study. James Arthur Anderson has devised the concept of Darwinist Hermeneutics as a critical tool to combine evolutionary psychology, neuroscience, biology, and literary Darwinism with other more conventional critical theory, including structuralism, narratology, semiotics, and linguistic analysis. Using this theory, Anderson examines King's works in terms of archetypes and mythology, human universals, affective emotions, and the organization of story to create maximum suspense. This method brings new insights into King's stories and broader implications for storytelling as a whole.

100 essays that will change the way: *Event-Space* Dorita Hannah, 2018-07-11 As the symbolists, constructivists and surrealists of the historical avant-garde began to abandon traditional theatre spaces and embrace the more contingent locations of the theatrical and political 'event', the built environment of a performance became not only part of the event, but an event in and of itself. Event-Space radically re-evaluates the avant garde's championing of nonrepresentational spaces, drawing on the specific fields of performance studies and architectural studies to establish a theory of 'performative architecture'. 'Event' was of immense significance to modernism's revolutionary agenda, resisting realism and naturalism - and, simultaneously, the monumentality of architecture itself. Event-Space analyzes a number of spatiotemporal models central to that revolution, both illuminating the history of avant-garde performance and inspiring contemporary approaches to performance space.
