13 april in history: *RecordCovid19* Kristopher Lovell, 2023-08-21 RecordCovid19. Historicizing Experiences of the Pandemic provides insights into the experience of the Covid19 pandemic from an historical and sociological perspective. Using the first-hand testimonies submitted as part of the #RecordCovid19 project as its inspiration, the chapters in this edited collection explore and contextualise the initial responses to the Covid19 pandemic. The collection examines people's relationships with Covid19 as an historical event, including their own experiences of living through history; their relationship with their surroundings, including their relationships with family, the

soundscapes and the emotional environments of a pandemic world; the impact and tone of political rhetoric, including the use (and misuse) of wartime myths and language in the United Kingdom; and finally, what lessons can be learnt from how people discuss their own personal stories and what lessons can we draw from previous examples of storytelling in moments of crisis. The result is a fascinating and rich discussion derived from an archive full of idiosyncratic experiences of life changing during the Covid19 pandemic.

13 april in history: *Corner of the Tapestry: a History of the Jewish Experience in Arkansas 1820s-1990s* (c) Carolyn Gray LeMaster, 1994 One of the most comprehensive studies ever done on a state's Jewish community, *A Corner of the Tapestry* is the story--untold until now--of the Jews who helped to settle Arkansas and who stayed and flourished to become a significant part of the state's history and culture. LeMaster has spent much of the past sixteen years compiling and writing this saga. Data for the book have been collected in part from the American Jewish Archives, American Jewish Historical Society, the stones in Arkansas's Jewish cemeteries, more than fifteen hundred articles and obituaries from journals and newspapers, personal letters from hundreds of present and former Jewish Arkansans, congregational histories, census and court records, and some four hundred oral interviews conducted in a hundred cities and towns in Arkansas. This meticulous work chronicles the lives and genealogy of not only the highly visible and successful Jews who settled in Arkansas, but also those who comprised the warp and woof of society. It is a decidedly significant contribution to Arkansas history as well as to the wider study of Jews in the nation.

13 april in history: *The Jewish Heritage in British History* Tony Kushner, 2012-11-12 'In the contemporary British context, 'heritage' is a highly politicized and contentious term', Tony Kushner writes in his introduction to this edited collection of essays on the subject of Jewish heritage, thus setting the tone for a book as much interested in the preservation as it is the understanding of this culture. This book provides a more theoretical framework for the pursuit of Jewish historiography and heritage preservation in Britain. The essays collected here look both to the past and to the future, discussing the nature of the Jewish heritage that has already been produced and looking toward possibilities of future development. Kushner has collected a wide range of subjects from social history to architecture to the question of Jewish women. This book will be of interest to students of social history and ethnic studies, particularly Jewish history in London and Manchester. It will be also of some use to those interested in architecture.

13 april in history: *A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group* Paul J. Cook, 2024-05-14 This book presents the U.S. Army Asymmetric Warfare Group (AWG) as an example of successful change by the Army in wartime. It argues that creating the AWG required senior leaders to create a vision differing from the Army's self-conceptualization, change bureaucratic processes to turn the vision into an actual unit, and then place the new unit in the hands of uniquely qualified leaders to build and sustain it. In doing this, it considers the forces influencing change within the Army and argues the two most significant are its self-conceptualization and institutional bureaucracy. The work explores three major subject areas that provide historical context. The first is the Army's institutional history from the early 1950s through 2001. This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post-Cold War future. The Army's history is largely one of asymmetric warfare. The work thus examines several campaigns that

offered lessons for subsequent wars. Some lessons the Army took to heart, others it ignored. As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq, the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG. Finally, the work chronicles the AWG's creation in 2006, growth, and re-assignment from the Army staff to a fully-fledged organization subordinate to the U.S. Army Training and Doctrine Command in 2011 to its deactivation. This action resulted not from the unit's failure to adapt to a post-insurgency Army focusing on modernization. Rather, it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency, it provided the capability to support the Army during a period of great strategic and institutional uncertainty.

13 april in history: Instrumentalizing the Past Jan Rydel, Stefan Troebst, 2022-09-20 In today's world, we can point to many international disputes and interstate conflicts fueled by past events. Historical resentments or memories of past suffering or fame are often used to justify political, economic and even territorial demands. Inter-state disputes and historical conflicts should be understood as evidence of political and social tensions related to active, serious differences in the assessment of the common past. The book explains the role of such conflicts in international relations and suggests ways of classifying them. It presents examples of the internationally relevant instrumentalisation of history from different regions of the world and outlines ways of overcoming them.

13 april in history: History Of Australia (Volumes 5 & 6) Manning Clark, 1999-09-13 Manning Clark's six-volume history is one of the masterpieces of Australian writing. It is also one of the most passionately debated visions of Australian history, in which the struggle to realise an Australian nation is played out on an epic scale. A History of Australia: 1888-1945, covers Federation, the Boer War and World War I's Gallipoli. It finishes with the story of an emerging Australian identity at the point of its greatest trial-the outbreak of World War II. This is not a general Australian history-it does not attempt to cover all aspects-and it is not a definitive or quantitative analysis. It is a work of art, a living and breathing account of the remaking of a primitive continent, history come alive.

13 april in history: Arctic Mirage Winton U. Solberg, 2019-10-11 In 1913, an expedition was sent to the Arctic, funded by the American Museum of Natural History, the American Geographical Society and the University of Illinois. Its purpose was twofold: to discover whether an archipelago called Crocker Land--reportedly spotted by an earlier explorer in 1906--actually existed; and to engage in scientific research in the Arctic. When explorers discovered that Crocker Land did not exist, they instead pursued their research, made a number of important discoveries and documented the region's indigenous inhabitants and natural habitat. Their return to America was delayed by the difficulty of engaging a relief ship, and by the danger of German submarines in Arctic waters during the World War I.

13 april in history: Historical Dictionary of the Tamils Vijaya Ramaswamy, 2017-08-25 The Tamils have an unbroken history of more than two thousand years. Tamil, the language they speak, is one of the oldest living languages in the world. The only people comparable to the Tamils in terms of their hoary past and vibrant present would be the Jews with one marked difference. The Tamils have always had their homeland 'Tamilaham' (alternately pronounced and spelt 'Tamizhaham') known today as Tamil Nadu which to them represents their mother and is revered by them as 'Tamizh Tai' literally 'Tamil Mother'. This is in striking contrast to the Jews who have been through a long and arduous struggle to gain their homeland, a deeply contested site to this day with Hebrewisation of Israel being a key marker of Jewish identity in the region. Tamils, by contrast have a clear numerical majority in the region that now comprises Tamil Nadu and the language unites rather than divides adherents of different faiths. The second edition of *Historical Dictionary of the Tamils* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 600 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Tamils.

13 april in history: *The Life and Death of the Radical Historical Jesus* David Burns, 2013-01-03

In this cultural and intellectual history, David Burns contends that the influence of biblical criticism in America was more widespread than has been thought. Burns proves this point by uncovering the hidden history of the radical historical Jesus, a construct created and sustained by freethinkers, feminists, socialists, and anarchists during the Gilded Age and Progressive Era. The result of this exploration is a new narrative revealing that Cyrenus Ward, Caroline Bartlett, George Herron, Bouck White, and other radical religionists had an impact on the history of religion in America rivaling that of recognized religious intellectuals such as Shailer Mathews, Charles Briggs, Francis Peabody, and Walter Rauschenbusch. The methods utilized by radical religionists were different from those employed by elite liberal divines, however, and part of a larger struggle over the relationship between religion and civilization. There were numerous reasons for this conflict, but Burns argues that the primary cause was that key radical religionists used Ernest Renan's *The Life of Jesus* to create an imaginative brand of biblical criticism that struck a balance between the demands of reason and the doctrines of religion. And this measured approach allowed Robert Ingersoll, Elizabeth Cady Stanton, Eugene Debs, and other secular-minded thinkers who sought to purge Christianity of its supernatural dimensions to still find something wonderful in the religious imagination and make common cause with an ancient peasant from Galilee. This provocative blend of reason and religion produced a vibrant countercultural movement that spanned communities, classes, and creeds and makes *The Life and Death of the Radical Historical Jesus* a book that deserves a wide readership in an era when public intellectuals and politicians on both the left and right draw rigid lines between the secular and the sacred.
