1979 monte carlo training day: *Movie-Made Los Angeles* John Trafton, 2023-10-17 Explores the proto-cinematic visual culture of Los Angeles that set the scene for modern Hollywood. Los Angeles was a cinematic city long before the rise of Hollywood. By the dawn of the twentieth century, photography, painting, and tourist promotion in Southern California provided early filmmakers with a template for building a myth-making business and envisioning ideal moviegoers. These art forms positioned California as a land of transformative experiences and catapulted the dusty backwater town of Los Angeles to the largest city on the west coast by 1915. Photography aided the Southern Pacific Railroad Company in opening the region to the rest of nation. Painters gave traditions that were fading in Europe a new lease on life in the California sun, with signature colors and techniques that would be adopted by L.A. real estate companies, agribusiness, and health retreats. Tourism infused the iconography and signature styles of art with cultural mythology of the state's colonial past, offering proto-cinematic experiences to those who ventured west. Author John Trafton explores how Hollywood, an industry based on world-building, was the product of these art forms in the land of sunshine. A more complete story of the American film industry's ascendancy in Los Angeles emerges when one considers how the City of Angels cultivated its self-image through pre-cinema narrative art.

1979 monte carlo training day: *Behind the 1953 Coup in Iran* Ali Rahnema, 2014-11-24 Ali Rahnema's work is a meticulous historical reconstruction of the Iranian coup d'état in 1953 that led to the overthrow of Mohammed Mosaddeq and his government. Mosaddeq's removal from power has probably attracted more attention than any other event occurring during his tenure because of the role of foreign involvement, the political, economic and social impact on Iran, and the long-term impact the ousting had on Iran-US relations. Drawing on American, British and Iranian sources, Rahnema closely examines the four-day period between the first failed coup and the second successful attempt, investigating in fine detail how the two coups were conceptualised, rationalised and executed by players on both the Anglo-American and Iranian sides. Through painstaking research into little-studied sources, Rahnema casts new light on how a small group of highly influential pro-Britain politicians and power brokers revisited the realities on the ground with the CIA operatives dispatched to Iran and how they recalibrated a new, and ultimately successful, operational plan.
