15 lessons in leadership: Lessons on Leadership by Terror Manfred F. R. Kets de Vries, 2005-01-01 A serious but readable study that should be widely read by all concerned with leadership issues. Long Range Planning This book is the most up-to-date available investigation of the understanding of tyranny and terror that psychologists, psychoanalysts and experts on group and institutional behaviour can provide. Manfred Kets de Vries has produced a masterpiece. He draws on a wealth of published research in the field and relates it in an academically excellent, yet eminently readable, way to the premier problem of the beginning of the 21st century. I strongly recommend it. Anton Obholzer, formerly Tavistock Centre London, Psychoanalyst and Organizational Consultant From constructive narcissism to reactive narcissism, we are but one step away from megalomania and terror. Professor Kets de Vries traces the origin of leadership by terror to early childhood in this case study of Shaka Zulu. A gruesome story warns us that terror may be inherent in the human condition. Abraham Zaleznik, Harvard Business School, US Kets de Vries has written another terrific book on leadership. However, this work will prove both timely and insightful to students of leadership and political psychology. Through the tale of Shaka Zulu, Kets de Vries introduces us to our very own despotic tendencies and thus familiarizes the reader with the human side, however

horribly oppressive and destructive, of leadership by terror. Here is a genuine contribution to the field of leadership studies. Michael A. Diamond, University of Missouri Columbia, US What makes despotic leaders tick? How do they become despots? On a lesser (but far more common) scale: why are some people ruthlessly abrasive in the workplace? Why do some business leaders appear to lose their sense of humanity? How and why do they create a culture of fear, uncertainty and doubt in their companies? *Lessons on Leadership by Terror* attempts to discover what happens to people when they acquire power, and whether the abuse of power is inevitable. Manfred Kets de Vries examines the life of the nineteenth-century Zulu king Shaka Zulu in order to help us understand the psychology of power and terror. During his short reign, Shaka Zulu established one of the most successful regimes based on terror that has ever existed, from which the traits of despotic leaders are illustrated. Shaka's life history is a study in the psychology of terror, and he can be a proxy for the behavior of any despot, be it from antiquity or modern times. From his leadership behavior fifteen cautionary lessons are derived, offering valuable principles for contemporary leaders. The book also explores the characteristics of totalitarian states, and discusses what can be done to prevent despotic leaders from coming to the fore. Clear parallels are drawn between Shaka's behavior and that of other, more contemporary, leaders including Hitler, Stalin, Pol Pot and Saddam Hussein. This fascinating and highly original book will be of enormous interest to a broad audience from students and academics focusing on leadership, political science, and political psychology, to practitioners such as managers, executives, consultants, and leadership coaches.

15 lessons in leadership: Leadership-as-Practice Joseph A. Raelin, 2016-01-29 This book develops a new paradigm in the field of leadership studies, referred to as the leadership-as-practice (L-A-P) movement. Its essence is its conception of leadership as occurring as a practice rather than residing in the traits or behaviours of particular individuals. A practice is a coordinative effort among participants who choose through their own rules to achieve a distinctive outcome. It also tends to encompass routines as well as problem-solving or coping skills, often tacit, that are shared by a community. Accordingly, leadership-as-practice is less about what one person thinks or does and more about what people may accomplish together. It is thus concerned with how leadership emerges and unfolds through day-to-day experience. The social and material contingencies impacting the leadership constellation - the people who are effecting leadership at any given time - do not reside outside of leadership but are very much embedded within it. To find leadership, then, we must look to the practice within which it is occurring. The leadership-as-practice approach resonates with a number of closely related traditions, such as collective, shared, distributed, and relational leadership, that converge on leadership processes. These approaches share a line of inquiry that acknowledges leadership as a social phenomenon. The new focus opens up a plethora of research opportunities encouraging the study of social processes beyond influence, such as intersubjective agency, shared sense-making, dialogue, and co-construction of responsibilities.

15 lessons in leadership: Understanding Leadership Robert M McManus, Gamaliel Perruci, 2015-04-10 Lao Tzu, Marx, the Buddha, Ibsen, Machiavelli — these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries. Yet, the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using The Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the environmental context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella *Anthem*, Eugène Delacroix's painting *Liberty Leading the People*, Charlie Chaplin's film *Modern Times*, Athol Fugard's play *Master Harold . . . and the Boys*, Lao Tzu's poetic work *Tao Te Ching*, and Antonín Dvořák's *New World Symphony*. The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable textbook for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book's unique liberal arts and cultural approach.
