1985 events in history: A Study of the Secondary School History Curriculum in Chile from Colonial Times to the Present Carmen Gloria Zúñiga, Tom O'Donoghue, Simon Clarke, 2015-02-03 The focus of this book is on the secondary school history curriculum in Chile from colonial times to the present. By way of background, attention is paid to the development of the history curriculum in the three countries which have most influenced educational developments in Chile, namely, England, the United States of America and Spain. The academic literature on the history curriculum throughout the English-speaking and Latin-speaking world, especially on the purposes attached to history as a school subject and the variety of pedagogical approaches prescribed is also considered. The results of a project that addressed the following interrelated research questions are then outlined: • What is the historical background to the current secondary school history curriculum in Chile? • What are the current developments of the secondary school history curriculum in Chile? • What are the issues of concern for secondary school history teachers in Chile? At various times the teaching of the subject ranged from being in the 'great tradition' approach, emphasizing teacher-centred activities and repetition of content knowledge, to being in the 'new history' tradition, emphasizing the promotion of active learning, student-centred activities and the encouragement of the historical method of enquiry. The analysis also details current issues of concern for teachers regarding the implementation of the current curriculum framework for secondary school history. The book concludes with a consideration of implications for practice in areas pertaining to curriculum development, teaching and learning, management and administration, teacher preparation, and professional development practices in Chile.

1985 events in history: Art History, Narratology, and Twentieth-Century Chinese Art Lian Duan, 2023-07-28 This study constructs a framework of narratology for art history and rewrites the development of twentieth-century Chinese art from a narratological perspective. Theoretically and methodologically oriented, this is a self-reflective meta-art history studying the art historical narratives while narrating the story of modern and contemporary Chinese art. Thus, this book explores the three layers of narrative within the narratological framework: the first-hand fabula, the secondary narration, and the tertiary narrativization. With this tertiary narrativization, the reader-author presents three types of narrative: the grand narrative of the central thesis of this book, the middle-range narrative of the chapter theses, and case analyses supporting these theses. The focus of this tertiary narrativization is the interaction between Western influence on Chinese art and the Chinese response to this influence. The central thesis is that this interaction conditioned and shaped the development of Chinese art at every historical turning point in the twentieth century. The book will be of interest to scholars working in art history, critical theory, Chinese studies, and cultural studies.

1985 events in history: Events That Changed the World in the Eighteenth Century John E. Findling, Frank W. Thackeray, 1998-01-26 Warfare on three continents, empire building, and revolution—political, agricultural, and industrial—dominate 18th-century world history. In Europe royal dynasties formed, fought major wars that carved up the map of Europe and the Americas, and began the great colonial expansion that dominated the next century. But the 18th century also ushered in the Enlightenment, which fired the imagination of Europeans, and the Industrial and Agricultural Revolutions, which changed society and work forever. To help students better understand the major developments of the 18th century and their impact on 19th- and 20th-century history, this unique resource offers detailed description and expert analysis of the 18th century's most important events: Peter the Great's Reform of Russia; the War of the Spanish Succession; the First British Empire; the War of the Austrian Succession and the Seven Years' War; the Enlightenment; the Agricultural Revolution; the American Revolution; the Industrial Revolution; the Slave Trade; and the French Revolution. Each of the ten events is dealt with in a separate chapter. Designed for students, this unique format features an introductory essay that presents the facts, followed by an interpretive essay that places the event in a broader context and promotes student analysis. The introductory essay provides factual material about the event in a clear, concise, and chronological manner that makes complex history understandable. The interpretive essay, written by a recognized authority in the field in a style designed to appeal to general readership, explores the short-term and far-reaching ramifications of the event. An annotated bibliography identifies the most important recent scholarship about each event. A full-page illustration complements the narrative for each event. Three useful appendices include: a glossary of names, events, and terms; a timeline of important events in 18th-century world history; and a listing of ruling houses and dynasties of 18th-century Europe. This work is an ideal addition to the high school, community college, and undergraduate reference shelf, as well as excellent supplementary reading for social studies and world history courses.

Now, the fourth volume carries the story to the present day, recounting the Church's astounding growth and inspired development since 1955. As the book opens, the Church has nine temples and more than one million members. Thousands of missionaries are preaching the restored gospel of Jesus Christ throughout the world. And for the first time in history, sacred saving ordinances are available in multiple languages. But the work of the Lord is not yet done. While many nations, kindreds, tongues, and people thirst for restored truth, the world is troubled by war, civil unrest, sickness, hunger, and prejudice. The Latter-day Saints, too, have much to learn about each other as the Church spreads far and wide, welcoming people from many cultures and traditions. The Lord's command to "be one" has never been more vital—or more challenging—for His people to follow. Sounded in Every Ear is the final book in *Saints*, a new, four-volume narrative history of The Church of Jesus Christ of Latter-day Saints. Fast-paced, meticulously researched, and written under the direction of the First Presidency, *Saints* recounts true stories of Latter-day Saints across the globe and answers the Lord's call to write a history "for the good of the church, and for the rising generations" (Doctrine and Covenants 69:8).
