18 somerset capital management: Jacob's Ladder Michael Ashcroft, 2019-09-10 Jacob Rees-Mogg is one of the most prominent and controversial figures in contemporary British politics. He is a man who divides opinion in his own party, in Parliament and across the country. An arch-Brexiteer with significant business interests and a large personal fortune, he has long been a vocal critic of the European Union and of Prime Minister Theresa May's attempts to negotiate a Brexit deal. As chairman of the powerful anti-EU organisation the European Research Group, he has also been a thorn in the side of those seeking to dilute Brexit. While many people mock him for his impeccable manners and traditional attitudes - he has been dubbed 'the Honourable Member for the eighteenth century' - an equally great number applaud him for his apparent conviction politics. Undoubtedly, Rees-Mogg stands out among the current crop of MPs and his growing influence cannot be ignored. In this wide-ranging unauthorised biography of the Conservative Member of Parliament for North East Somerset, Michael Ashcroft, bestselling author of *Call Me Dave: The Unauthorised Biography of David Cameron*, turns his attention to one of the most intriguing politicians of our time.

18 somerset capital management: Brexit Josh Hamilton, 2021-02-26 Wrapped up in a story of the British public's rejection of the establishment is a much darker story about shady money, untoward digital campaign tactics, and a fraught battle exploding from the highest rungs of British politics and society. *Brexit: The Establishment Civil War* is a crucial examination of what is now driving British politics, the dark money and forces attempting to manipulate it, and the online warfare techniques that are being deployed in modern politics. Brexit is nothing more than an establishment civil war that erupted from the upper echelons of the Conservative party and engulfed the entire country. It unleashed the growing power of big data on a divided and austerity ravaged population by pouring petrol on hot button issues like immigration and sovereignty. The Leave campaigns reached into our social divides and pulled us apart all for their own gain. Josh Hamilton examines the underlying factors that led to the Brexit vote, how technology made us more vulnerable to manipulation, how both sides of the establishment went to war over their own self-interests, and how disaster capitalists will use Brexit to further enrich themselves at the expense of the entire country.

18 somerset capital management: Victorian Investments Nancy Henry, Cannon Schmitt, 2008-11-26 *Victorian Investments* explores the relationship between the financial system in Great Britain and other aspects of Victorian society and culture. Building on the special journal issue of *Victorian Studies* devoted to Victorian investments, this volume is the first to define an interdisciplinary field of study emerging in the space between Marxist critiques of capitalism and traditional histories of business and economics. The contributors demonstrate how phenomena such as the expansion of colonial and foreign markets, the broadening of the investor base through the advent of limited liability, and the rise of financial journalism gave rise to a culture of investment that affected Victorian Britons at every level of society and influenced every kind of cultural production. Drawing together work by prominent historians as well as literary and cultural critics,

Victorian Investments both defines the methodologies and perspectives that characterize an existing body of scholarship and pushes that scholarship in new directions, demonstrating the signal role of economic developments in Victorian culture and society.

18 somerset capital management: Capital Spaces Matthew Carmona, Filipa Matos Wunderlich, 2013-05-02 In recent years it has become common-place to hear claims that public space in cities across the globe has become the exclusive preserve of the wealthy and privileged, at the expense of the needs of wider society. Whether it is the privatization of public space through commercial developments like shopping malls and business parks, the gentrification of existing spaces by campaigns against perceived anti-social behaviour or the increasing domination of public areas by private transport in the form of the car, the urban public space is seen as under threat. But are things really that bad? Has the market really become the sole factor that influences the treatment of public space? Have the financial and personal interests of the few really come to dominate those of the many? To answer these questions Matthew Carmona and Filipa Wunderlich have carried out a detailed investigation of the modern public spaces of London, that most global of cities. They have developed a new typology of public spaces applicable to all cities, a typology that demonstrates that to properly assess contemporary urban places means challenging the over-simplification of current critiques. Global cities are made up of many overlapping public spaces, good and bad; this book shows how to analyze this complexity, and to understand it.
