1990 literature nobelist octavio: The Politics of Literary Prestige Sarah E.L. Bowskill, 2022-04-07 The Politics of Literary Prestige provides the first comprehensive study of prizes for Spanish American literature. Covering state-sponsored and publisher-run prizes including the Biblioteca Breve Prize - credited with launching the 'Boom' in Spanish American literature - the Premio Cervantes and the Nobel Prize for Literature, this book examines how prizes have underpinned different political agenda. As new political positions have emerged so have new awards and the role of the author in society has evolved. Prizes variously position the winners as public intellectual, spokesperson on the world stage or celebrity in the context of an increasingly globalized literature in Spanish. Drawing on a range of sources, Sarah E.L Bowskill analyses prizes from the perspective of different stakeholders including states, publishers, authors, judges and critics. In so doing, she untangles the inner workings of literary prizes in Spanish-speaking contexts, proposes the existence of a prizes network and demonstrates that attitudes to cultural prizes are not universal but are culturally determined.

1990 literature nobelist octavio: Written in Exile Ignacio Lopez-Calvo, 2019-07-16 On September 11, 1973, Chile's General Pinochet led a quick and brutal military coup ousting the Allende government. Ignacio Lopez-Calvo argues that the rise of the Pinochet dictatorship and the subsequent imprisonment of any Allende sympathizers shaped Chilean narrative into two structural forms: liberationist narrative--cathartic, journalistic testimonies that provide models for revolutionary behavior against authoritarianism and demystifying narrative, which uses the events of 1973, as well as the colonial aspirations of European countries, as a Paradise Lost backdrop in which the characters of this type of fiction are able to create their non-political realities that become models of democratization.

1990 literature nobelist octavio: *The Nobel Prize and the Formation of Contemporary World Literature* Paul Tenngart, 2023-10-05 An exploration of the history, ambitions, and impact of the Nobel Prize in literature as it gained a central position in 20th-century global literary culture. Few scholars would deny that the Nobel Prize is the most prestigious literary award in the world. But what mechanisms made it possible for 18 Swedish intellectuals to become the world's most influential literary critics? Paul Tenngart argues that the Nobel Prize in literature has become a special kind of international canonization: exerted from a non-central, semi-peripheral position, the award sometimes confirms and reinforces hierarchical relations between literary languages and cultures, and sometimes disturbs established patterns of dominance and dependence. Drawing from a wide range of contemporary theories and methods, this multifaceted history of the Nobel Prize questions how the Swedish Academy has managed to keep the prize's global status through all the violent international crises of the last 120 years; how the selection of laureates shaped the idea of 'universal' literary values and defined literary quality across languages and cultures; and what impact the prize has had on the distribution and significance of particular works, literatures and languages. *The Nobel Prize and the Formation of Contemporary World Literature* explores the history and impact of the Nobel Prize in literature from the first award in 1901 through recent controversies involving Bob Dylan and #MeToo, arguing that the prize is a unique performative act that has been – and still is – central in our continual and collective construction of world literature.

1990 literature nobelist octavio: *The Labyrinth of North American Identities* Philip Resnick, 2012-04-25 What exactly does it mean to be North American? Europeans have been engaged in a long-running debate about the meaning and nature of Europe. *The Labyrinth of North American Identities* generates a similar discussion in the context of North America: what do we learn about North America as a unit and its individual countries when we explore the idea of a shared North

American identity? Combining cultural, anthropological, historical, political, economic, and religious considerations, Philip Resnick acknowledges the relative differences in power and influence of the United States and its North American neighbours but digs deeper to uncover shared characteristics that constitute a labyrinth of North American identities unrestricted by national boundaries. To date, discussions of North America have largely revolved around the often technical implications of the North American Free Trade Agreement (NAFTA) or US homeland security. What has been lacking, by contrast, is a culturally-driven set of reflections. This book examines the legacy of indigenous cultures; the role of organized religion; pathways to independence; the role of imperial languages; manifest destiny; market capitalism and its limitations; democratic practices and failures; diverging uses of the state; new world utopias and dystopias; regional identities; and civilizational perspectives. What results is a vision of North America that defies any top-down attempt to impose a homogeneous North Americanness.
