David Weber, 2005-05 There are dozens of other funding directories describing college aid. But, none of them are like this one. First, unlike other directories, the High School Senior's Guide focuses only on merit and no-need scholarships. Not one of the programs covered here requires financial need. Plus, only programs open to college-bound high school seniors are included. No more scanning through hundreds of listings that apply to currently-enrolled college students, not to you. In addition, the entries here are grouped by discipline, so you can go directly to the area you want to study. Not sure what your major will be? No problem. There's even a section listing programs that are open to support studies in any area. The High School Senior's Guide provides the only way to find money for college based solely on academic record, writing or artistic ability, speech-making skills, athletic success, high school club membership, religious or ethnic background, parents' military or organizational activities, and even pure luck in random drawings. Perhaps that's why College Financial Aid gave the High School Senior's Guide 4 stars--its highest rating!

1st financial bank usa financial goals scholarship: Death Orders Anna Geifman, 2010-05-20 This fascinating study shows how terrorism as developed and practiced in Romanov Russia has, over the past century, manifested itself as the template for modern and postmodern terrorism as a universal sociocultural, psychological, and existential experience, irrespective of particular political causes, ethnic distinctions, and ideological boundaries. Arguing that Russia is the birthplace of modern terrorism, Death Orders: The Vanguard of Modern Terrorism in Revolutionary Russia uses the nation as a case study of psycho-historical patterns of worldwide terrorist activity during the past century. Key features of early-20th century Russian political extremism serve as models for terrorist experiences in other periods and regions as author Anna Geifman builds a typology of a universal phenomenon. The book shows how, in Russia and elsewhere, terrorists' objectives have degenerated from punishment of individual adversaries and attempts to intimidate political elites to indiscriminate acts of political violence. It shifts attention from ideology to practices that had been previously hidden, ignored, or rationalized, demonstrating that what terrorists say about their motives may not be what actually drives them to brutality. By looking closely at Russian precedents for the general experience of modern political violence, the book helps illuminate many obscure aspects of terrorism today.
