believe in arabic language: Going Global Amy Hodges, Leslie Seawright, 2014-09-26 While English has become the lingua franca in science, business, and other fields, scholars still grapple with the implications of its adoption in many other settings and cultures. To what extent should English be introduced and taught in schools around the world? Who "owns" the English language and can therefore shape its structure and aims? What are world Englishes and how can teachers demonstrate them to their students? Is English the language of the oppressor, an imperialist tool, or does global English offer an opportunity for greater understanding and cooperation amongst peoples and cultures? This volume of critical essays explores these and other questions surrounding language, education, and culture in the globalized world. Honoring students' cultures while trying to prepare them for an uncertain and constantly changing future is the resounding theme of this book. The contributors to this volume are as multi-cultural and multi-faceted as such a volume would demand. The essays include authors and studies from Algeria, India, Iran, Ghana, Germany, Poland, Tunisia, Qatar, Saudi Arabia, United Kingdom, the United States of America, and Yemen. The perspectives offered in this volume contribute greatly to the ongoing conversations on language, education, and globalization.

believe in arabic language: Jesus Imandars and Christ Bhaktas Jonas Adelin Jørgensen, 2008 The massive changes of Christianity during the 20th century raise the perennial question about its identity in a new, radical form. The author addresses the question of identity and asks how globalisation, religious pluralism, and the polycentric nature of Christianity affect Christian self-identification and theological reflection. First, religious life and theological reflection among believers in Jesus from Muslim and Hindu background in South Asia is presented in two empirical studies. Secondly, the findings are analysed and interpreted within a broad theoretical framework, drawing on models for syncretistic processes from history of religions, cultural anthropology, and Christian theology. Finally, the study concludes with a systematic-theological perspective on the interreligious hermeneutics underlying the changes of Christianity and discusses how interreligious hermeneutics might inform missiology as well as Christian theologies of religions and how this might challenge our understanding of the church's nature and mission. In conclusion, it is argued that a global, polycentric Christianity can be interpreted as fellowship created by the Spirit and centred on Christ.

They awaken old and new questions about a religious, cultural, and political reality that 1,200,000,000 people consider themselves a part of. This book is the result of a series of extended interviews between an internationally acclaimed expert on Islam and two journalists who have dedicated themselves for many years to studying key themes of Islam and analyzing the possibility of coexistence between people of different faiths and cultures. How was Islam born? What does the Qur'an represent for Muslims? What relationships have developed between Islam and violence, between Islamic culture and the West? How can a real integration of Islam take place in European societies? What are the conditions for a constructive encounter between Christians and Muslims? Samir Khalil Samir one of the world's leading experts on Islam responds to these questions in an in-depth interview that can help one learn and judge for oneself, without prejudice or naivete. This is a contribution in the spirit of the realism needed in order to build adequate ways of living with those who have become our new neighbors.

William Graham, 1883 My object is to open up the infinite fullness of our living Head to all weary souls, and unfold, as far as I see them, the glories of the God-Man, in whom and for whom I live and move and have my being. I have opened up very fully the believer's standing in the Christ and the hopes and duties which naturally flow from it, and in doing so I have rendered, I believe, a good service to the present generation of the Church, who are more occupied than they ought to be with material interests and worldly pleasures. - Author's preface.

believe in arabic language: The People and the Books Adam Kirsch, 2016-10-04 An accessible introduction to the classics of Jewish literature, from the Bible to modern times, by one of America's finest literary critics (Wall Street Journal). Jews have long embraced their identity as "the people of the book." But outside of the Bible, much of the Jewish literary tradition remains little known to nonspecialist readers. The People and the Books shows how central questions and themes of our history and culture are reflected in the Jewish literary canon: the nature of God, the right way to understand the Bible, the relationship of the Jews to their Promised Land, and the challenges of living as a minority in Diaspora. Adam Kirsch explores eighteen classic texts, including the biblical books of Deuteronomy and Esther, the philosophy of Maimonides, the autobiography of the medieval businesswoman Glückel of Hameln, and the Zionist manifestoes of Theodor Herzl. From the Jews of Roman Egypt to the mystical devotees of Hasidism in Eastern Europe, The People and the Books brings the treasures of Jewish literature to life and offers new ways to think about their enduring power and influence.
