belarus russian language school: The Belarusian Shtetl Irina Kopchenova, Mikhail Krutikov, 2023-09-05 For centuries Jewish shtetls were an active part of Belarusian life; today, they are gone. The Belarusian Shtetl is a landmark volume which offers, for the first time in English, an illuminating look at the shtetls' histories, the lives lived and lost in them, and the memories, records, and physical traces of these communities that remain today. Since 2012, under the auspices of the

Sefer Center for University Teaching of Jewish Civilization, teams of scholars and students from many different disciplines have returned to the sites of former Jewish shtetls in Belarus to reconstruct their past. These researchers have interviewed a wide range of both Jews and non-Jews to find and document traces of Shtetl history, to gain insights into community memories, and to discover surviving markers of identity and ethnic affiliation. In the process, they have also unearthed evidence from old cemeteries and prewar houses and the stories behind memorials erected for Holocaust victims. Drawing on the wealth of information these researchers have gathered, *The Belarusian Shtetl* creates compelling and richly textured portraits of the histories and everyday lives of each shtetl. Important for scholars and accessible to the public, these portraits set out to return the Jewish shtetls to their rightful places of prominence in the histories and legacies of Belarus.

belarus russian language school: *Borderland Generation* Jeffrey Koerber, 2020-02-06 Despite their common heritage, Jews born and raised on opposite sides of the Polish-Soviet border during the interwar period acquired distinct beliefs, values, and attitudes. Variances in civic commitment, school lessons, youth activities, religious observance, housing arrangements, and perceptions of security deeply influenced these adolescents who would soon face a common enemy. Set in two cities flanking the border, Grodno in the interwar Polish Republic and Vitebsk in the Soviet Union, *Borderland Generation* traces the prewar and wartime experiences of young adult Jews raised under distinct political and social systems. Each cohort harnessed the knowledge and skills attained during their formative years to seek survival during the Holocaust through narrow windows of chance. Antisemitism in Polish Grodno encouraged Jewish adolescents to seek the support of their peers in youth groups. Across the border to the east, the Soviet system offered young Vitebsk Jews opportunities for advancement not possible in Poland, but only if they integrated into the predominantly Slavic society. These backgrounds shaped responses during the Holocaust. Grodno Jews deported to concentration camps acted in continuity with prewar social behaviors by forming bonds with other prisoners. Young survivors among Vitebsk's Jews often looked to survive by posing under false identities as Belarusians, Russians, or Tatars. Tapping archival resources in six languages, *Borderland Generation* offers an original and groundbreaking exploration of the ways in which young Polish and Soviet Jews fought for survival and the complex impulses that shaped their varying methods.

belarus russian language school: *The Soft Power of the Russian Language* Arto Mustajoki, Ekaterina Protassova, Maria Yelenevskaya, 2019-06-12 Exploring Russian as a pluricentric language, this book provides a panoramic view of its use within and outside the nation and discusses the connections between language, politics, ideologies, and cultural contacts. Russian is widely used across the former Soviet republics and in the diaspora, but speakers outside Russia deviate from the metropolis in their use of the language and their attitudes towards it. Using country case studies from across the former Soviet Union and beyond, the contributors analyze the unifying role of the Russian language for developing transnational connections and show its value in the knowledge economy. They demonstrate that centrifugal developments of Russian and its pluricentricity are grounded in the language and education policies of their host countries, as well as the goals and functions of cultural institutions, such as schools, media, travel agencies, and others created by émigrés for their co-ethnics. This book also reveals the tensions between Russia's attempts to homogenize the 'Russian world' and the divergence of regional versions of Russian reflecting cultural hybridity of the diaspora. Interdisciplinary in its approach, this book will prove useful to researchers of Russian and post-Soviet politics, Russian studies, Russian language and culture, linguistics, and immigration studies. Those studying multilingualism and heritage language teaching may also find it interesting.

belarus russian language school: Belarus Andrew Savchenko, 2009 Belarus is known as the last dictatorship of Europe , yet its president enjoys public support. Its economy remains largely Soviet, yet exhibits high growth rates. Belarus styles itself as a European country yet clings to Russia as the only ally. The book explains these paradoxes by delving into history of Belarusian national institutions, including civil society, and the state. The book starts with an analysis of Belarusian national development from the time of the Grand Duchy of Lithuania to the short-lived Belarusian People's Republic of 1918. The discussion turns to the crucial interwar period, when all national institutions of modern Belarus had taken shape. Belarus's surprising ability to cope with post-Soviet economic and geopolitical changes is discussed in the final chapter.

Kamusella, 2008-12-16 This work focuses on the ideological intertwining between Czech, Magyar, Polish and Slovak, and the corresponding nationalisms steeped in these languages. belarus russian language school: The Baltic Sea Region Witold Maciejewski, 2002

belarus russian language school: *Contemporary Belarus* Elena Korosteleva, Colin Lawson, Rosalind Marsh, 2003-08-27 Belarus is unique among the states of the former Soviet bloc, in that after a decade of transition', the country remains stalled' and backward-oriented. Political and economic changes are characterised by half-measures, and recently a new suppression of dissent has been introduced; the country balances between the prospect of democracy and a retreat to authoritarianism. These developments contrast starkly with the many democratic changes in neighbouring states and suggest a possible alternative path for future development in Eastern Europe. This book provides a thorough overview of current developments in Belarus. It looks at historical, political, economic and social changes, and at international relations, especially relations with Russia and the European Union, considering all these factors both in their domestic and international contexts and defines the type of democracy, if any, which exists in Belarus, exploring the prospects for further democratisation.

belarus russian language school: **Protest in Late Modern Societies** Monika Banaś, Ruslan Saduov, 2023-05-16 This book discusses a broadly understood phenomenon of protest from several perspectives, including historical, cultural, social, political, environmental and semiotic. Through their analyses, the authors undertake to envision the possible evolution of the forms of contestation in the further decades of the 21st century, taking into account the specificity of the globalisation processes. A multidimensional approach offered in this volume makes it possible to capture and identify new features of contemporary contestation and those that seem unchanged despite the passage of time and altering audiences. Examples from Europe (France, the United Kingdom, Italy, Ireland, Malta, Bulgaria, Poland, Belarus, Russia), America (the United States, Mexico, Chile) and Far East (Hong Kong and China) are relevant case studies that show the faces of contestation while reaching for new or modified rhetoric, symbolism, communication channels and the so-called modus operandi of protest initiators, active and passive participants and short- and long-distant observers. The book will be of value to a wide audience, particularly to the researchers studying contestation, social resistance, individual and collective disobedience, crisis management and cultural/social dynamic of protests. It will also be of interest to experts and individuals from outside the academia

like civil activists, practitioners and NGOs compelled by contemporary processes (tensions) occurring between the state, power, society and individuals.

belarus russian language school: Russians As The New Minority Jeff Chinn, Robert Kaiser, 2019-07-11 Twenty-five million Russians live in the newly independent states carved from the territory of the former Soviet Union. When they or their ancestors emigrated to these non-Russian areas, they seldom saw themselves as having moved abroad. Now, with the dissolution of the USSR, these Russians find themselves to be minorities—often unwelcome—in new states created to fulfill the aspirations of indigenous populations. Will the governments of these newly independent states be able to accept the fact that their populations are multi-national? Will the formerly dominant and privileged Russians be able to live with their new status as equals or, more often, subordinates? To what extent do the new regimes' policies of accommodation or exclusion establish lasting patterns for relations between the titular majorities and the minority Russians? Developing the concept of interactive nationalism, this timely book explores the movement of Russians to the borderlands during the Russian Empire and Soviet times, the evolution of nationality policies during the Soviet era, and the processes of indigenization during the late Soviet period and under the newfound independence of the republics. The authors examine questions of citizenship, language policy, and political representation in each of the successor states, emphasizing the interaction between the indigenous population and the Russians. Through the use of case studies, the authors explore the tragic ethnic violence that has erupted since the demise of the Soviet Union, and weigh strategies for managing national conflict and developing stable democratic institutions that will respect the rights of all ethnic groups. Jeff Chinn is associate professor of political science at the University of Missouri-Columbia. Robert Kaiser is assistant professor of geography at the University of Missouri-Columbia.

belarus russian language school: Lost Kingdom Serhii Plokhy, 2017-10-10 From a preeminent scholar of Eastern Europe and the prizewinning author of *Chernobyl*, the essential history of Russian imperialism. In 2014, Russia annexed the Crimea and attempted to seize a portion of Ukraine -- only the latest iteration of a centuries-long effort to expand Russian boundaries and create a pan-Russian nation. In *Lost Kingdom*, award-winning historian Serhii Plokhy argues that we can only understand the confluence of Russian imperialism and nationalism today by delving into the nation's history. Spanning over 500 years, from the end of the Mongol rule to the present day, Plokhy shows how leaders from Ivan the Terrible to Joseph Stalin to Vladimir Putin exploited existing forms of identity, warfare, and territorial expansion to achieve imperial supremacy. An authoritative and masterful account of Russian nationalism, *Lost Kingdom* chronicles the story behind Russia's belligerent empire-building quest.

belarus russian language school: Belarus Nigel Roberts, 2008 Belarus remains the most inaccessible, unknown and misunderstood country in Europe. This new guide therefore offers a rare opportunity to study a country and its people as they really are, before the rest of the world catches on.

belarus russian language school: Nations in Transit - 2001-2002 Carlton J. H. Hayes, 2017-12-02 How are democracy and market reforms faring in East Central Europe and the former Soviet Union? Is civil society expanding or shrinking? Are the media free or fettered by official constraints? To what degree are nations governed by the rule of law? Are human rights respected? Do taxation and trade policies, property rights reforms, banking laws, privatization, and macroeconomic policies encourage or encumber private sector development and economic growth? In *Nations in Transit 2000-2001*, Freedom House asked leading regional specialists and in-house experts to answer a checklist of more than 70 indicators for 27 post-Communist countries in ten key areas: political process, civil society, independent media, governance and public administration, constitutional, legislative and judicial framework, corruption, privatization, macroeconomic policy, microeconomic policy, and social sector indicators. The results are incisive, authoritative, and comprehensive country-by-country reports which assess the progress of East Central European and former Soviet countries in ridding themselves of repressive political systems

and inefficient statist economies. As an added dimension, Freedom House also developed a rating system which allows for a comparative analysis of countries in terms of democratic and market reforms. Nations in Transit is an invaluable resource for government and non-governmental institutions, schools and universities, and anyone else interested in better understanding the political, economic, and legal structures and institutions that compromise the infrastructure on which the transition to open societies and markets depends.

belarus russian language school: *Language Policy and Discourse on Languages in Ukraine Under President Viktor Yanukovych* Michael Moser, 2014-04-15 Declared the country's official language in 1996, Ukrainian has weathered constant challenges by post-Soviet political forces promoting Russian. Michael Moser provides the definitive account of the policies and ethno-political dynamics underlying this unique cultural struggle.

belarus russian language school: *Authenticity across Languages and Cultures* Leo Will, Wolfgang Stadler, Irma Eloff, 2022-11-10 This volume centres around concepts of personal and cultural authenticity as they play out in various contexts of foreign language teaching and learning worldwide. The chapters cover a wide range of contexts and disciplines, including both theoretical and empirical work; together they comprise both a rigorous analysis of authenticity in language teaching and a step away from notions of native-speakerism and cultural essentialism with which it is often associated. Written by a group of scholars working across several continents, the chapters offer diverse perspectives regarding the role language plays in processes of personal growth, learning, development, self-actualisation and power dynamics. The book addresses the theoretical and philosophical nature of authenticity while remaining grounded in the teaching and learning of languages, with authenticity viewed as a practical concern that guides our actions and beliefs. The book will be of interest to scholars, researchers and students of authenticity as well as foreign language teachers interested in the theoretical underpinnings of their practice.
