beijing language and culture university blcu: **Rising China's Soft Power in Southeast Asia: Impact on Education and Popular Culture** Leo Suryadinata, 2024-07-24 The book addresses the issues of China's soft power in Southeast Asia during the rise of China. This soft power includes Chinese language education and popular culture. With regard to Chinese education, prior to the rise of China, Chinese schools were catered to mainly overseas Chinese children. Non-Chinese seldom received Chinese education. However, the rise of China and the export of Confucius Institutes (CIs) changed the landscape as CIs are meant for the non-Chinese population as well. China's educational soft power penetrated the larger non-Chinese community, making Chinese soft power more effective. Chinese popular culture has also infiltrated the non-Chinese population. Various chapters in this book show that rising China's soft power in Southeast Asia has grown quite significantly, particularly in terms of the Chinese language and Chinese popular culture. Nevertheless, its popularity still lags behind American soft power. The Chinese language is still not as popular as the English language. The same could also be said for Chinese popular culture. The growth of China's soft power faces tremendous challenges in the Southeast Asian region. Its further growth would depend on China's continuous economic power and cordial relations with the Southeast Asian countries.

On a practical level, the Australian-based case study employs qualitative methods to gather the feedback from teacher educators, teacher trainees and students who are undergoing CSL training, and further reports on studies on CSL teaching practicum in local schools and abroad. *Training Teachers of Chinese in Australia* is a book for established scholars, researchers, educators, and research higher degree students who are interested in teacher education, second and foreign language education and Chinese as a second language (CSL).

beijing language and culture university blcu: *The Rise of Conference Interpreting in China* Irene A. Zhang, Riccardo Moratto, 2023-11-03 In this landmark project, Professor Zhang and Professor Moratto piece together the history of how conference interpreting developed as a profession in China after the reform and opening up of the late 1970s. Based on interviews with the alumni of the early efforts to develop conference interpreting capabilities between Chinese and English (and French), the authors illuminate the international programs and relationships which

were instrumental in bringing this about. While paying tribute to the earliest interpreters who interpreted for the first-generation CPC leaders including Mao Zedong, Zhou Enlai, and Deng Xiaoping, they track key cooperative projects between Chinese ministries and both the United Nations and European Union, as well as China's domestic efforts, which developed into today's formal programs at major universities. An essential resource for scholars and students of conference interpreting in China, alongside its sister volume *Conference Interpreting in China: Practice, Training and Research*.

In this way, the chapters touch on the complex demographics of the region, how continued and continuous economic development impinges on higher education, and how neoliberalism has affected higher education across many dimensions. The volume also addresses the complex issues associated with cross border education and the daunting challenges of both national and cross-national quality assurance.

beijing language and culture university blcu: *Global Mobility and Higher Learning* Anatoly Oleksienko, 2018-03-14 *Winner of the Best Book Award from Researchers and Students and Study Abroad Programmes at the CIES2019 conference 2019 This book examines learning-mobility tensions and ties caused by convergences and divergences of social, organizational and cognitive forces in global higher education. As some of these forces generate status anxiety, and others enhanced self-worth, this volume asks the questions: How can students navigate treacherous education markets to reduce the former and increase the latter? Which specific forces and confluences enhance the quality of self-discovery? Does the search for identity and meaning produce better results when conducted internationally? Which transformative drivers of global mobility enhance social mobility? What allows some students to gain the capacity for impactful higher learning at a time when others lose it? Why are strategically minded students increasingly concerned about equality and the quality of contribution to the common good of education, rather than about their own status? What makes some places of learning stand out when students recount their journeys of self-discovery and roads to self-worth? This book includes a broad range of stories and firsthand perspectives that are often overlooked in the process of internationalization of higher education. The narratives offer important insights to consider, given the ever-increasing disquiets of competitiveness-oriented global higher education.
