Food Is Not Cooking Evenly

Uneven cooking can result from overcrowding the basket or using incorrect temperature settings. The manual advises cooking in smaller batches and shaking the basket periodically to redistribute food for even heat exposure.

Unusual Odors or Smoke

Smoke or odors during cooking may indicate food debris or grease buildup. The manual recommends thorough cleaning of the basket and interior components. Users should also ensure that excess oil is not used and that the appliance is operated within recommended settings.

Other Common Troubleshooting Tips

- Reset the air fryer by unplugging it for a few minutes if it behaves erratically.
