### **benefits of transactional leadership: Mastering Theories of Educational Leadership and**

*Management* Donnie Adams, 2018-10-08 The field of Educational Leadership and Management originated and grew to maturity in the Western societies of the USA, UK and Australia. However, since the mid-1990s, scholars in east Asia have asserted the need to ground leadership theories and practices in the 'local contexts' in which school leaders practice. Mastering Theories of Educational Leadership and Management is one of the first volumes published which seeks to do this. The edited chapters illustrate and elaborate how perspectives on key concepts and theories of educational leadership are being interpreted and enacted in East Asian societies. By doing so the book makes a valuable contribution which will hopefully reduce the gap between theories as explained by Western scholars and practices as enacted in East Asian societies. ~ Professor Dr. Philip Hallinger

### **benefits of transactional leadership: Leadership in Dynamic Organizations** Alireza

Sharifi, 2017-11-28 Leadership is one of the key elements of organizations that contribute to organizational survival, health and competitiveness. For many decades, researchers have been working on the effectiveness of leaders and in doing so, they have studied leaders' traits,

characteristics, values, needs, attributes and behaviors. Moreover, in more recent studies, the importance of leadership situation has come to the attention and consideration of leadership writers and researchers. However, although there are many scholars and researchers who have worked on leadership styles, there is no clear typology of leadership behavior that explains the behavior of leaders in dynamic and ever-changing working environment. In other words, the role of organizational leadership styles is not well-explained in dynamic firms and industries. In this book, we look into business organizations through the new lens of Dynamic Capabilities (Dynamic Capability View). In doing so, the characteristics of key organizational resources and capabilities are explained. Thereafter, major types of leadership behavioral styles are introduced. The findings in this book suggest that, the behaviors of leaders are defined based on two criteria: The degree of involvement in decision-making process and the degree of TRC-Oriented (Task-Oriented, Relationship-Oriented, and Change-Oriented) in dealing with subordinates. In addition, the book explains why managers adopt these behavioral styles in dynamic organizations and industries. The reasons behind the use of each leadership style are clearly explored and explained by the use of four main criteria: perceived benefits for subordinates, perceived benefits for the leader, perceived benefits for the organization, and facilitating factors. It is hoped that this book will help leadership and management scholars, writers, practitioners and students to better understand the nature of leadership and new era of business in order to contribute to the body of knowledge, but also to enhance the performance of firms in today's highly volatile, uncertain, complex and ambiguous markets.

**benefits of transactional leadership: Cultural Factors Define Implementation Strategies** Stanley Remple, 2025-07-03 Strong business leadership built on a value-based foundation has the power to drive profit while improving the lives of business leaders, employees, and even those in the community. But a business leadership model must also reflect cultural context, which is why author Stanley Remple argues that a cookie-cutter, individualistic Western approach doesn't serve the needs of Chinese business leaders. Enter *Leadership Wisdom for Businesses in China*, a powerful four-book series that examines value-based business leadership specifically within the Chinese cultural and social environment and offers a framework to promote individual and collective potential while creating a successful and competitive business. In Book Four, *Cultural Factors Define Implementation Strategies*, Remple delves deeper into the historic and cultural influences that led to the Western business leadership model; why China's unique historic and cultural influences have created a need for its own business leadership strategy; and how this can be further developed. Factors explored include how the influence of Confucius, Daoism and Buddhism, Sun Yat-sen, and the Communist Party have impacted business leadership practice in China to prioritize collective interests, and the opportunities this presents. The book concludes with culturally supportable strategies for value-based leadership to ensure business success. Much more than a theoretical overview of business leadership, this series offers a roadmap and solid tools for developing both self-leadership and business leadership within a whole company. Supported by a Chinese project team consisting of researchers, educators, writers and editors, business leaders, and other stakeholders, this culturally relevant series has been written for both new and experienced business leaders and entrepreneurs, leadership consultants and trainers, and post-secondary leadership programs in China. However, stakeholders in the West will also find great value in this comprehensive exploration of value-based leadership. **benefits of transactional leadership: Understanding Leadership Perspectives** Matthew R. Fairholm, Gilbert W. Fairholm, 2009-04-05 hand. Indeed, we do not easily move out of one mind-set into another. What we believe to be true given our particular experience often seems to be the only truth. Often we need some outside force to trigger reevaluation and rethinking. That triggering force to intellectual growth may be a new idea, a new situation, a new value, a new boss, or some other significant emotional event - maybe, even, a new book. The Research Foundation This book is founded on two pillars: one, a model of five leadership mind-sets common in the last 100 years first presented in Gilbert W. Fairholm's (1998a, 1998b) book, *Perspectives on Leadership: From the Science of Management to its Spiritual Heart*; and two, Matthew R. Fairholm's (2002) dissertation, *Conceiving Leadership: Exploring Five Perspectives of Leadership by Investigating the Conceptions and Experiences of Selected Metropolitan Washington Area Municipal Managers*, which analyzed and validated the perspectives model (see the Appendix for more details). The data collected confirm there are five distinct perspectives of leadership evident in the 100-year history of leadership study and practice. The resulting model defines the five perspectives in terms of descriptions of leadership in action, leadership tools and behaviors, and the way leaders approach their relationship to followers. The five perspectives are related hierarchically so that they progressively encompass a

unique perspective of the leadership phenomenon.

**benefits of transactional leadership: The Enactment of Strategic Leadership** Darko Tipurić, 2022-08-05 This Open Access book explores the meaning and roles that strategy and leadership play in our lives. Based on decades of experience, the author contemplates whether we believe strategic leadership exists because it actually exists, or whether it exists because we believe it does? Both answers are true. The author argues that the duality of the essence of strategic

leadership is clear. It may appear to be personalised, or it may seem to be an important characteristic of the organization enacted everywhere where there is guidance. In fact, the discussion about strategic leadership raises more questions. In this thought-provoking book, the author puts forward a robust critical assessment of one of the most widely used concepts in management research and practice. Beginning with an ontological and historical discussion around which the concept of strategic leadership has developed, the book continues to discuss the phenomenon of strategic leadership. Utilising a post-modern perspective and by heavily drawing on concepts such as hegemony and ideology, the author then discusses the role of organizational culture and networks, as well as the underlying tensions that come associated with strategic leadership.
