benefits of learning english language: Promoting the Educational Success of Children and Youth Learning English National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Children, Youth, and Families, Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research, 2017-08-25 Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

benefits of learning english language: Proceedings of the 7th Celt International Conference (CIC 2024) Ekawati Marhaenny Dukat, Antonius Suratno, Heny Hartono, Radhika Gajjala, M. Mary Jayanthi, Christopher D. Gabriel, Hazel P. Atilano, 2024-12-31 This is an open access book. The English language stands as a pivotal tool for fostering international dialogue, facilitating the acquisition of scientific and technological knowledge, propelling economic growth, and enabling participation in global competition. Its prestigious role in a myriad of domains has significantly elevated the importance of English Language Teaching (ELT). Among the emerging approaches in ELT, the integration of Artificial Intelligence (AI), particularly within the framework of Communicative Language Teaching (CLT), offers transformative potential. To harness the benefits of AI in ELT, substantial investments have been directed towards modernizing educational curricula, revising English syllabi to incorporate AI-driven principles and methodologies, developing communication-oriented textbooks, crafting skill-focused assessments, and enhancing educators' comprehension of novel language learning theories and pedagogies. This comprehensive approach aims to elevate the effectiveness of ELT by aligning it with contemporary technological advancements. However, the widespread endorsement of CLT and AI integration is not without its challenges. Despite the professed commitment of many educators to CLT, resistance persists across

both Eastern and Western educational contexts. Cultural specialists and educators frequently debate the necessity, appropriateness, and efficacy of CLT and AI in language teaching. This ongoing debate underscores several constraints, including insufficient resources, limited instructional time, and a lack of linguistic and sociocultural competence among educators. Consequently, ELT pedagogies have evolved differently across various social, cultural, and economic environments, reflecting the diverse contexts in which they are implemented. The 7th Celt International Conference (CIC) aims to provide a critical platform for examining the complexities of integrating CLT and AI within the culturally nuanced landscapes of English Language, Literature, and Arts education. The conference will explore how deeply ingrained cultural expectations can conflict with the adoption of innovative teaching methodologies, and how such resilience can be navigated to enhance the educational experience. We invite educators, policymakers, sociologists, cultural experts, business leaders, artists, and entrepreneurs to participate in the 2024 CIC Webinar. This event, themed "Cultural Resilience and the Emergence of AI in the Teaching and Learning of English Language, Literature, and Arts," will facilitate an exchange of experiences, ideas, and practices that address the intersection of tradition and innovation in the context of ELT. Your participation will contribute to a richer understanding of how to effectively integrate AI in language education while respecting and adapting to cultural particularities. Join us in this crucial dialogue and be part of shaping the future of English Language, Literature, and Arts education amidst the challenges and opportunities presented by AI and cultural resilience.

benefits of learning english language: Vistas of English for Specific Purposes Nadežda Stojković, 2015-10-05 English for Specific Purposes (ESP) is one of the most needed forms of English Language Teaching with regards to the adult population in today's global market economy where the English language is a prerequisite for the exchange and communication of professional ideas, best practices, and experiences, and a necessary skill for advancement in one's career. This comprehensive volume brings together the most insightful papers from the First International Conference on Teaching English for Specific and Academic Purposes, titled "Connect and Share", held at the Faculty of Electronic Engineering of the University of Niš, Serbia, in May 2013. The collection covers a diverse and extensive list of topics, and provides a number of invaluable contributions which prove the presence of ESP in all continents, and in many different professions, sciences, and businesses. Also of interest is the fact these papers highlight the interrelatedness of ESP and linguistics, the methodology of teaching, sociolinguistics, and a number of other fields relevant to the study and practice of languages. The chapters of this book prove that immense, original, creative and worthwhile research is being conducted in the ever-growing and increasingly relevant field of ESP. At the same time, the book also offers rich insights into many innovative teaching practices that justify ESP as an important area of academic study.

benefits of learning english language: Teaching Young Learners in Bilingual Settings Paul Berge, 2024-09-23 Bilingual education, or CLIL, at primary school varies greatly across European educational contexts. Teaching Young Learners in Bilingual Settings reports on a study that explored one such CLIL context in Dortmund, Germany. Through interviews and classroom observations, the researcher and author sought not only to document some of what takes place in CLIL classrooms but to describe and understand teachers' thoughts and beliefs about their CLIL teaching practices. This research contributes to a better understanding of primary school CLIL programs and teachers and is relevant for researchers working in the fields of foreign language education, bilingual education, and language teacher cognition research. Furthermore, the insights into CLIL teachers' thinking can support CLIL teachers, administrators, and policy makers as they seek to further develop CLIL pedagogy and programs.
