bemidji health and wellness: Digital Government Svenja Falk, Andrea Römmele, Michael Silverman, 2016-11-09 This book focuses on the implementation of digital strategies in the public sectors in the US, Mexico, Brazil, India and Germany. The case studies presented examine different digital projects by looking at their impact as well as their alignment with their national governments' digital strategies. The contributors assess the current state of digital government, analyze the contribution of digital technologies in achieving outcomes for citizens, discuss ways to measure digitalization and address the question of how governments oversee the legal and regulatory obligations of information technology. The book argues that most countries formulate good strategies for digital government, but do not effectively prescribe and implement corresponding policies and programs. Showing specific programs that deliver results can help policy makers, knowledge specialists and public-sector researchers to develop best practices for future national strategies.

Qian and Ahmed examine individual migrant health acculturation experiences, community-based culturally-centered health interventions, and cross-cultural health promotion and campaigns. Ultimately, this book unpacks the complexity surrounding the health acculturation process through different theoretical frameworks and cross-cultural applications in a range of communication contexts, including the interpersonal, family, community, organizational, and media.

bemidji health and wellness: *The Gifts We Receive from Animals* Lori R. Kogan, 2022-06-19 The Gifts We Receive from Animals is a book guaranteed to brighten a reader's day. Professionals engaged in therapy work as well as those who have companion animals at home will enjoy learning about the many ways in which animals impact people's lives. Through a series of short, true-life stories, written by professionals engaged in animal assisted interventions, The Gifts We Receive from Animals reminds readers of the core essence of the human animal bond and the reason behind the growing phenomenon of animal assisted interventions. Readers will learn, for example, about the young child who shares her inner most thoughts with a dog and, as a result, learns how to talk with people; the soldier who feels comfortable and safe with a dog, a feeling he has been lacking since active duty; and the elderly adult who works through difficult physical therapy because of his therapy dog. The Gifts We Receive from Animals takes readers on a delightful journey, offering insights into the unique impact animals have in the lives of those they help.

bemidji health and wellness: *Promoting the Health of the Community* Julie Ann St. John, Susan L. Mayfield-Johnson, Wandy D. Hernández-Gordon, 2021-02-18 Community health workers (CHWs) are an increasingly important member of the healthcare and public health professions who help build primary care capacity. Yet, in spite of the exponential growth of CHW interventions, CHW training programs, and CHW certification and credentialing by state agencies, a gap persists in the literature regarding current CHW roles and skills, scope of practice, CHW job settings, and national standards. This collection of contributions addresses this gap by providing information, in a single volume, about CHWs, the roles CHWs play as change agents in their communities, integration of CHWs into healthcare teams, and support and recognition of the CHW profession. The book supports the CHW definition as defined by the American Public Health Association (APHA), Community Health Worker Section (2013), which states, "A community health worker is a frontline public health worker who is a trusted member of and/or has an unusually close understanding of the community served." The scope of the text follows the framework of the nationally recognized roles of CHWs that came out of a national consensus-building project called "The Community Health Worker (CHW) Core Consensus (C3) Project". Topics explored among the chapters include: Cultural Mediation Among Individuals, Communities, and Health and Social Service Systems Care Coordination, Case Management, and System Navigation Advocating for Individuals and Communities Building Individual and Community Capacity Implementing Individual and Community Assessments Participating in Evaluation and Research Uniting the Workforce: Building Capacity for a National Association of Community Health Workers Promoting the Health of the Community is a must-have resource for CHWs, those interested in CHW scope of practice and/or certification/credentialing,

anyone interested in becoming a CHW, policy-makers, CHW payer systems, CHW supervisors, CHW employers, CHW instructors/trainers, CHW advocates/supporters, and communities served by CHWs.

Swayne, 2002 Public Health leadership and Management offers students the opportunity to develop and practice the skills needed to make difficult public health decisions. It presents fifteen public health case studies that address a wide array of challenging and complex public health issues. These case studies attempt to vicariously place the reader into a position in which he or she is required to size up the situation and suggest some action for the organization. The first section of the book: * supplies the tools needed to research, analyze, and present cases orally * includes a helpful template that guides students through the process of thinking through and making decisions The second section: * information about the U.S. Health Care System

bemidji health and wellness: *Cracked, Not Broken* Kevin Hines, 2013-06-27 The Golden Gate Bridge is one of the most recognizable structures to define a modern city. Yet, for author Kevin Hines the bridge is not merely a marker of a place or a time. Instead, the bridge marks the beginning of his remarkable story. At 19 years old, Kevin attempted to take his own life by jumping off the Golden Gate Bridge - a distance which took four seconds to fall. Recently diagnosed with bi-polar disorder, Kevin had begun to hear voices telling him he had to die, and days before his attempt, he began to believe them. The fall would break his body, but not his spirit. His story chronicles the extraordinary will of the author to live mentally well in the face of his mental illness: bipolar disorder with psychotic features. With each mental breakdown, however, the author's desire to live mentally well-- and to be a mental health advocate-- pulls him from the depths of his condition. Kevin's story is a remarkable testament to the strength of the human spirit and a reminder to us to love the life we have. His story also reminds us that living mentally well takes time, endurance, hard work, and support. With these disciplines in place, those living with even very difficult diagnoses can achieve better lives for themselves and those who help to support and care for them.

bemidji health and wellness: *Animal-Assisted Intervention* Angela K. Fournier, 2019-12-09 This book brings the animal into the scholarly discussion of animal-assisted therapy and other interventions. Challenging the current reliance on outcome studies, the author offers a new way of thinking empirically about animal-assisted interventions—analysis of human-animal interaction as a critical component. Through empirical demonstrations from laboratory and applied settings, the book encourages practitioners and scholars to undergo a deeper examination of the basic interactions that occur between clients or patients and therapy animals. Dr. Fournier provides new ideas on measurement, experimentation, and interpretation of human-animal interaction, aimed at identifying the role of the animal in interventions for human health and well-being.

bemidji health and wellness: *Animal-assisted Interventions* Lori R. Kogan, 2023-12-14 This is a practical book exploring how to conduct animal assisted intervention (AAI) in ways that protect and prioritize animal and human welfare. This resource is for social scientists (e.g., psychology, social work, human development and family studies, etc.), as well as ethologists and animal behaviour and welfare students and practitioners. The book is a series of short chapters that depict a wide array of AAIs and their potential welfare concerns. The chapters include descriptions of the AAI offered, the welfare challenges, and ways to successfully mitigate these challenges. This book

also covers critical topics including therapy animals' aging, retirement, and death as well as ethical issues including animal consent. Species include not only dogs, but horses, rabbits, and other small animals (e.g., guinea pigs, mice, etc.). Types of AAI involve individual interventions as well as crisis dogs (those who help after natural and man-made disasters), and residential animals. The book is designed to be a practical, engaging book with links to video and examples of real-life situations. It is evidence-based, yet user-friendly and directly applicable to students and practitioners. An invaluable resource for ethologists and animal behaviour and welfare students and practitioners, as well as social scientists (e.g., psychology, social work, human development and family studies).
