benton county wa voters guide: Reforming Legislatures Peverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award, APSA Section 22: State Politics and Policy Legislatures are ubiquitous in the American political experience. First created in Virginia in 1619, they have existed continuously ever since. Indeed, they were established in even the most unlikely of places, notably in sparsely populated frontier settlements, and functioned as the focal point of every governing system devised. Despite the ubiquity of state legislatures, we know remarkably little about how Americans

have viewed them as organizations, in terms of their structures, rules, and procedures. But with the rise of modern public opinion surveys in the twentieth century, we now have extensive data on how Americans have gauged legislative performance throughout the many years. That said, the responses to the questions pollsters typically pose reflect partisanship, policy, and personality. Generally, respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times. Incumbent lawmakers get ratings boosts from having personalities, “home styles” that mesh with those of their constituents. These relationships are important indicators of people’s thoughts regarding the current performance of their legislatures and legislators, but they tell us nothing about attitudes toward the institution and its organizational characteristics. This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives. Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures, this study leverages the most significant difference between national and state politics: the existence of ballot propositions in the latter. At the national level Americans have never had any say over Congress’s structure, rules, or procedures. In contrast, at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures. The data examined here look at how people have voted on more than 1,500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features. By linking the votes on these measures with the public debates preceding them, this study documents not only how Americans viewed various aspects of their legislatures, but also whether their opinions held constant or shifted over time. The findings reported paint a more nuanced picture of Americans’ attitudes toward legislatures than the prevailing one derived from survey research. When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made, the analyses presented here reveal that, counter to the conventional wisdom that people loved their representatives but hated the legislature, voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers’ motives and behaviors.

benton county wa voters guide: Resilience Ricardo Gomez, 2023-11-25 This book is about the lived experiences of first-generation Latino and Latina (Latinx) students going to college in Washington state, combined with an analysis of immigration enforcement practices. The experiences of resilience and creativity exhibited by Latinx students offer a stark contrast with the human rights violations by law enforcement agents, whose collaboration with immigration enforcement is against the law in Washington state. The book explores the work of the University of Washington Center for Human Rights, particularly its work to defend and promote immigrants’ rights in Washington state. The Center documents the collaboration and information sharing of local and state law enforcement with federal immigration enforcement agencies, which predominantly target Latinx communities in Eastern Washington. Since such collaboration and information sharing is now illegal under Washington state laws, the findings of the work of the Center for Human Rights can be used by frontline human rights organizations in Washington state to advocate for stronger compliance by local and state law enforcement, and stronger protection of immigrants’ rights. In addition to documenting the work of the Center for Human Rights, this book offers a collection of oral histories from UW students or alumni from Eastern Washington who self-identify as Latinx. Latinx is a gender-neutral term for individuals who descend from Latin American ancestry and culture. These Latinx stories offer a glimpse of the rich lived experiences in some of the communities that suffer the racial profiling and abuses of immigration enforcement. These are the communities of migrant farmworkers that tend and harvest the fruits and agricultural produce of Washington, the communities of origin of many of the students at the University of Washington.
