berkeley historical society museum: Historical Gems of the San Francisco Bay Area Richard Di Giacomo, 2025-05-01 The San Francisco Bay Area is loaded with fascinating and unique historical sites that represent a broad range of historical events and eras. A resident of the Bay Area or a tourist in town for a few days can see a wide range of historical sites all within a day's drive of San Francisco. This book may also be useful for a teacher or parent who is looking for an educational field trip which ties in with the child's curriculum in a history, literature, or science class. Others may find it interesting to learn more about the Native Americans or pioneer settlers in a local community. So, whether you are just curious about what is inside that old historical house in your neighborhood, want to know how a specific historical event played out in your area, or are just looking for an interesting day trip, this book has something for you. Many people are familiar with the more famous sites in California. It is not uncommon to see tourists make a trip to see all of the California missions or Gold Rush towns, but there are also scores of lesser-known sites within the Bay Area that highlight a particular historical event or offer a comprehensive overview of the history of that town or region. More than just a tour guide, the book is broken into sections with essays that acquaint the reader with the history that is covered by the representative museums or sites. DiGiacomo goes beyond the traditional city, county, state, and national museums and historic sites that feature famous people, historic homes and events. He also covers museums devoted to agriculture, business, Hispanic California, immigration, military posts, mining, Native Americans, transportation, sports, as well as science and technology. He thoughtfully includes key information on each museum such as its location, web address, hours of operation, cost, and what a visitor can expect to encounter. Over 220 historical sites are listed.

berkeley historical society museum: Golden Memories of the San Francisco Bay Area Steven Friedman, 2000 San Francisco, the flamboyant and cosmopolitan city by the bay and its neighboring municipalities, was born to tell stories upon stories. Ranging in ages from 68 to 91, the narrators reflect the ethnic and religious diversity of a metropolis that has been a pioneer of several social, political, and cultural movements. They also stretch across both ends of the economic spectrum. A Japanese-American woman describes the harsh humiliation of internment during World War II, while an Irish Catholic man fondly remembers being a paperboy in the same neighborhood for ten years--until he was 20. An African-American woman from Marin City explains why she'll never sell the quilts she makes. Another woman recalls kissing under the Golden Gate Bridge with the man who eventually became her husband. The book also utilizes more than 80 photographs from the narrators and the collections of local libraries, museums, and historical societies to complement the poignant, humorous, and revealing portraits of the people and places of the San Francisco Bay Area.

berkeley historical society museum: A History of Australian Co-operatives 1827-2023

Greg Patmore, Nikola Balnave, Olivera Marjanovic, 2024-02-13 Co-operatives provide a different approach to organising business through their ideals of member ownership and democratic practice. Every co-operative member has an equal vote regardless of his or her own personal capital investment. They take a variety of different forms, including consumer co-operatives, agricultural co-operatives, worker co-operatives and financial co-operatives. Patmore, Balnave and Marjanovic provide a perspective on Australian co-operative development within a conceptual framework and international context since the 1820s by exploring the economic, political and social factors that explain their varying fortunes. Drawing upon the Visual Historical Atlas of Australian Co-operatives, a significant database of Australian co-operatives and a variety of historical sources, this book provides a detailed historical analysis of their development, from their inception in Australia to today. Australian co-operatives were heavily dependent on state sympathy for their growth and vulnerable to ideas that challenged collective organisation such as Neo-liberalism. Despite these challenges, the co-operative business model has persisted and since 2009, there has been resurgence of interest and organisation that may provide a platform for future growth. A useful resource for practitioners, students, educators, policy makers and researchers that highlights a significant alternative business model to the Investor-Owned Business and state enterprise. berkeley historical society museum: Elmer Bischoff Susan Landauer, Elmer Bischoff, 2001-10-30 Elmer Bischoff is one of the small handful of truly fine artists at mid-century and beyond working in Northern California. His art is of national importance. In Susan Landauer he has the author who can bring his life and art to us.—Walter Hopps, Twentieth Century Curator, The Menil Collection This first substantial monograph on Elmer Bischoff offers a warm appraisal of a deacon of West Coast painters, justly celebrated for his lifelong navigation of the tightrope between abstract painting's sensual materiality and the ethical implications of a figurative art. Susan Landauer meets her own high standards of nuanced social history, and Bill Berkson's brief introduction is studded with gems.—Caroline Jones, author of Bay Area Figurative Art Susan Landauer's new monograph is a welcome addition to Twentieth Century Bay Area art history. She is a specialist, who explores the life and work, attitudes and ideals of this important artist, his European and American influences, in parallel with those of his famous colleagues, Richard Diebenkorn and David Park. She brings historical understanding and esthetic subtlety to the study as she digs into the artist's esthetic and educational philosophy, the relation between painting and improvised jazz, temporary blocks and personal crises, as well as his complete reinventions of his drawing and painting. All this is set in the context of the life of art in the Bay Area community (1940-1990) and results in a readable work of value to professionals while remaining accessible to more casual readers.—Gerald Nordland, author of Richard Diebenkorn
