bensalem medical practice bensalem pa: *Discovery and Healing* David Vaughn, 2022-06-24
In *Discovery and Healing: Reflections on Five Decades of Hematology/Oncology* at the Perelman School of Medicine at the University of Pennsylvania, David Vaughn describes the history of the Perelman School of Medicine's Division of Hematology/Oncology. Vaughn knows the subject well: he trained in the Division's Hematology/Oncology fellowship program from 1990 -1993 and has been on the faculty of the Division since 1993. Since its founding in 1972, the Division of Hematology/Oncology at the Perelman School of Medicine at the University of Pennsylvania has made important contributions to the fields of blood disorders and cancer medicine. Based largely on his personal experience and extensive interviews with former and present faculty, Vaughn describes the evolution of the Division from a small group of research hematologists to a comprehensive program of fundamental and translational researchers and clinical specialists in benign and malignant hematology and solid tumor oncology. He highlights the importance of leadership as he examines the successes of each of the four Division chiefs: Richard Buz Cooper, Sanford Shattil, Stephen Emerson, and Lynn Schuchter. He describes the lasting impact that the Division's first oncologist, John Glick, has had on the Division, the Abramson Cancer Center, and the author himself. He emphasizes the important role that philanthropy has played in the Division's achievements. He concludes the account by reflecting on the Division's experience and call to action as it confronted the COVID-19 pandemic. Both a memoir and a historical account, Vaughn's book demonstrates the good that can be accomplished when an innovative and dedicated medical faculty are committed to discovery and healing.

bensalem medical practice bensalem pa: *Advanced Health Assessment of Women, Fourth Edition* Helen Carcio, R. Mimi Secor, 2018-09-07 Written for nurse practitioners, physician assistants, nurse midwives, and other primary care providers, this new edition of *Advanced Health Assessment of Women*, continues to deliver the clinical skills required to care for the unique healthcare needs of women. This text delves into the growing role of the advanced practice clinician, establishing a foundation for and an understanding of the rationale behind the techniques and procedures described. Master's level and doctoral level curricula provide basic content for the advanced practice clinician but may not provide sufficient education and training regarding advanced women's health skills and procedures. This practical manual is designed to fill that gap, linking theory to clinical practice using critical thinking. Using a clear and concise outline format, *Advanced Health Assessment of Women* avoids unnecessary jargon and cuts straight to the clinical skills, techniques, and procedures the advanced practice provider needs to know. Content progresses from simple to complex, covering basic assessment and physiology, health history, physical examination, and specific investigative procedures. Each technique and procedure outlined contains detailed descriptions, strategies for patient preparation, and recommended follow up, accompanied by a comprehensive list of equipment. In this new edition, all content has been reviewed and expanded to reflect the most updated evidence-based clinical practice guidelines. Key Features: Clinical procedures that are on the leading edge in the expanded role of the advanced

practice clinician Detailed descriptions of advanced assessment techniques with plentiful tables and figures Special chapter on urinary incontinence includes diagnosis of bladder dysfunction Appendices contain patient information handouts and practice forms that can be adapted for practice Unique chapter: selection and insertion of the vaginal pessary New to this edition: NEW Chapter: Assessment of Transgender Persons Revisions of clinical guidelines and procedures for menopause, cervical cancer screening, and osteoporosis chapters Treatment summary sections for selected chapters such as PCOS, AUB, vulvodynia, obesity, and urinary incontinence
