berkeley executive leadership program: *Women as Transformational Leaders* Michele A. Paludi, Breena E. Coates, 2011-09-22 This compilation of scholarly reviews and personal reflections on women and leadership styles focuses on multicultural and organizational issues—empowering information that female leaders can use to break through the glass ceiling. Secretary of State Hillary Clinton and Supreme Court Justice Sonia Sotomayor are just two of the most visible examples among the hundreds of thousands of women nationwide today in leadership positions. Female leaders at the grassroots to global levels are everywhere, lending credence to the idea that the glass ceiling for women may finally be thinning. This two-volume work provides an exhaustive examination of the scholarly research on women leaders and the leadership philosophies that have enabled their

success. Volume one of *Women as Transformational Leaders: From Grassroots to Global Interests* presents an overview of stereotypes, attributions, and stigma about women leaders that focuses on social and psychological reasons for discrimination against women leaders. The second volume addresses cultural and organizational issues, including global leadership to eliminate violence against women and international insights on women and transformational leadership. The subject of transformational leadership is viewed within several disciplines, including women's studies, religion, the public sector, and private sector, documenting how far women have advanced—and how their leadership style typically differs from that of men.

berkeley executive leadership program: Value Creation through Executive Development Solomon Akrofi, 2018-12-07 The ability of organisations to generate long-term value and growth depends to a very large extent on the capacity of the executive cohort to conceive and implement strategic initiatives through a well-motivated and enabled workforce. However, generating consistent value in today's volatile, uncertain, complex and ambiguous (VUCA) and rapidly evolving digital economic landscape can be challenging and, therefore, executives need to update their capabilities regularly to align with the changing value drivers required for long-term growth. To achieve the expected value and growth at a more sustainable level, executive development must be managed as a strategic asset and optimised through effective design and implementation and the effects must be proactively evaluated through meaningful leading indicators and actual 'hard' measures. *Value Creation through Executive Development*, therefore, offers a well-supported and clearly structured approach to address the gap between executive development initiatives and the creation of long-term organisational value and growth. This book provides a valuable resource to executives and management development professionals who have experienced frustration about the lack of non-value-adding executive development programmes. It also serves as a professional resource for managers of executive and management development programmes, organisational development departments and organisational development consultants, allowing them to integrate this material into existing programmes to achieve value-centric outcomes and to achieve long-term performance targets. Additionally, it serves as a teaching resource for participants in executive/management development courses or seminars globally; offering them the capacity to conduct value-centric initiatives and gain the capacity to influence the tactical, operational and strategic dimensions of their organisational performance.

berkeley executive leadership program: Black Female Leaders in Academia: Eliminating the Glass Ceiling With Efficacy, Exuberance, and Excellence Butcher, Jennifer T., 2022-06-24 Discussions surrounding the bias and discrimination against women in business have become paramount within the past few years. From wage gaps to a lack of female board members and leaders, various inequities have surfaced that are leading to calls for change. This is especially true of Black women in academia who constantly face the glass ceiling. The glass ceiling represents the metaphor for prejudice and discrimination that women may experience in the attainment of leadership positions. The glass ceiling is a barrier so subtle yet transparent and strong that it prevents women from moving up. There is a need to study the trajectory of Black females in academia specifically from faculty to leadership positions and their navigation of systemic roadblocks encountered along their quest to success. *Black Female Leaders in Academia: Eliminating the Glass Ceiling With Efficacy, Exuberance, and Excellence* features full-length chapters authored by leading experts offering an in-depth description of topics related to the trajectory of Black female leaders in higher education. It provides evidence-based practices to promote excellence among Black females in academic leadership positions. It also addresses several leadership models that claim an ethical component. The new edition also includes new chapters on the ethics of care and toxic leadership, and new case studies for all chapters. berkeley executive leadership program: *Why Congress Needs Women* Michele A. Paludi, 2016-01-18 This book addresses women's civil strategies for negotiation and leadership through careful analysis of social science research and management theory as well as interviews with women legislators, documenting how women in Washington are affecting the development of the world at all levels. In October 2013, after the war between Republican and Democratic men in Congress resulted in a government shutdown, Time magazine referred to the women legislators as the only adults left in Washington. In *Why Congress Needs Women: Bringing Sanity to the House and Senate*, editor Michele A. Paludi and various contributors explain how women in Washington have redefined leadership and power by embracing a transformational leadership style: a style that incorporates empowerment, ethics, nurturance, inclusiveness, and social justice, transcending their own self-interests for the good of the group—or, in the case of the shut-down, for the good of the nation. A resource that will prove invaluable for anyone interested in politics and leadership as well as students taking courses in politics, women's studies, gender studies, or management, the chapters provide an in-depth review of the ways women in Washington are striving to find lasting solutions to our nation's challenges. The contributors document the mindset and methodologies women legislators are using to achieve their legislative goals and work toward creating gender-equitable environments in Washington's well-established climate where bullying, harassment, and sexual exploitation is perceived as normative. Insights from interviews with women senators and congress members enhance the scholarship discussed in this book.

Coll, 2016-12-05 In this book, 50 experts study the lives of U.S. veterans at work, at home, and in American society as they navigate issues regarding health, gender, public service, substance abuse, and homelessness. The aftermath of modern war includes a population of veterans whose needs last for many decades—far longer than the war itself. This in-depth study looks at life after the military, considering the dual conundrum of a population benefiting from the perks of their duty, yet continuing to deal with trauma resulting from their service, and of former servicemen and servicewomen trying to fit into civilian life—in a system designed to keep them separate. Through two comprehensive volumes, essays shed light on more than 30 topics involving or affecting former servicemen and servicewomen, offering a blueprint for the formal study of U.S. veterans in the future. Contributions from dozens of experts in the field of military science cover such issues as unemployment, homelessness, disability, access to higher education, health, media portrayal, criminal justice, substance abuse, guns, suicide, and politics. Through information gleaned from surveys, interviews, participant observations, secondary analyses, and content analyses, the chapters reveal how veterans are able to successfully contribute to civilian life and show how the American workforce can benefit from their unique set of skills.
