Are you looking for a job in video podcasting? Anyone with a digital video camcorder, microphone, computer and some technical savvy can launch an Internet video podcast show to inform, direct or enlighten. You can offer foresight, insight, or hindsight. Open a business or find a job creating and delivering digital video recordings-usually free-as podcasts. If you want to make money with video podcasting, offer to

sell a sponsor's publicity and advertising on your video, or an author's creative works, interviews, or sermons. You can even show people how to fill out tax forms using a video podcast for instruction on most any subject people can learn independently. People who subscribe to video podcasts usually want to view for free. You can charge for a course to train or teach a class by video lecture and/or demonstration, but what if you want an actual paid job in video podcasting? And can you make more money in video than in the older, audio MP3 file 'radio' podcasting? Careers in video podcasting are beginning to bloom as seen by a variety of podcasting associations, news publications, and career information. Even job listings unrelated to podcasting are 'broadcast' by RSS feeds. Create your own job in podcasting by showing others how to find new trends and applications in their careers. Make informational, how-to, and motivational video podcasts. What if you want to use video podcasting to actually get hired? Are there jobs right now in video podcasting? Or is the field still primarily for trade publication publishers, syndicators, and video entrepreneurs on the Web?

best podcast for starting a small business: How to Start, Teach, & Franchise a Creative Genealogy Writing Class or Club Anne Hart, 2008-06-12 It's easy to start, teach, and franchise a

creative genealogy writing club, class, or publication. Start by looking at the descriptions of each business and outline a plan for how your group operates. Flesh out each category with your additional research pertaining to your local area and your resources. Your goal always is to solve problems and get measurable results or find accurate records and resources. Or research personal history and DNA-driven genealogy interpretation reporting. You can make keepsake albums/scrapbooks, put video online or on disc, and create multimedia text and image with sound productions or work with researching records in archives, oral history, or living legacies and time capsules. A living legacy is a celebration of life as it is now. A time capsule contains projects and products, items, records, and research you want given to future generations such as genograms of medical record family history, family newsletters, or genealogy documents, diaries, photos, and video transcribed as text or oral history for future generations without current technology to play the video discs. Or start and plan a family and/or school reunion project or franchise, business or event. Another alternative is the genealogy-related play or skit, life story, or memoir.

best podcast for starting a small business: Start Small, Stay Small Rob Walling, 2010 Start Small, Stay Small is a step-by-step guide to launching a self-funded startup. If you're a desktop, mobile or web developer, this book is your blueprint to getting your startup off the ground with no outside investment. This book intentionally avoids topics restricted to venture-backed startups such as: honing your investment pitch, securing funding, and figuring out how to use the piles of cash investors keep placing in your lap. This book assumes: You don't have \$6M of investor funds sitting in your bank account You're not going to relocate to the handful of startup hubs in the world You're not going to work 70 hour weeks for low pay with the hope of someday making millions from stock options There's nothing wrong with pursuing venture funding and attempting to grow fast like Amazon, Google, Twitter, and Facebook. It just so happened that most people are not in a place to do this. Start Small, Stay Small also focuses on the single most important element of a startup that most developers avoid: marketing. There are many great resources for learning how to write code, organize source control, or connect to a database. This book does not cover the technical aspects developers already know or can learn elsewhere. It focuses on finding your idea, testing it before you build, and getting it into the hands of your customers.
