Though initially one tends to be 'down in the dumps' after being unsuccessful in a case or being euphoric over a successful management of a dire emergency, in due course one develops an attitude of equanimity. This attitude is essential so that our own emotions do not affect our management plans. I have chosen two aphorisms in Medicine, 'Primum non nocere' and 'Primum succurere'. While attending to a patient, if we are not able to cure him or relieve him it is excusable but we have to do our best not to harm the patient in the process and if we happen to be in the vicinity of any one in need of urgent medical attention, we shall hasten to attend to him, are the respective connotations of these aphorisms. Sometimes, we have hesitation in attending to a patient in need of medical attention when the given situation does not belong to our expertise lest we err in the management, like a physician at the site of a road traffic accident. The Supreme Court has ruled that a medical professional should not hesitate on such grounds and must try to provide whatever care he can provide in such cases. That exactly is what 'Primum succurere' means. Emergencies in medicine include many sub specialties but to restrict the number of pages and the size of the Monograph, we are concentrating mainly on topics we face in our steady clinical practice as physicians. I have attempted to present the management of the medical emergencies in different scenarios, such as situations where no assistance or special tools are available to situation where all types of assistance and tools are available as in an intensive care unit. We have also included topics on the role of alternative medicine in emergency handling of cases. This emergency medicine, a new branch of medicine has become so indispensable presently that the MCI (Medical Council of India) and its BOG (Board of Governors) in their notification on November 14, 2019 state as follows. "No MBBS course nod to medical colleges in the country without emergency department (ED)". The measures call for all medical colleges to have freely functional ED as per the MCI norms by 31th march 2022, adding that all new medical colleges seeking LOP (Letter of Permission) w.e.f. 2021—2022 MBBS batch should ensure that a freely functional ED is in existence as per the MCI norms. best emergency medicine residency: Practical Teaching in Emergency Medicine Amal Mattu, Michael E. Winters, Joseph P. Martinez, 2011-09-07 Inherent to the teaching and practice of emergency medicine are specific challenges not found in other specialties - the unknowns of the emergency department, the need to identify life- and limb-threatening conditions, the pressure to solve problems and find solutions quickly, and the orchestration of clinical specialists and ancillary services. Because of these unique demands, books written by clinicians from other disciplines, that extrapolate their information from other specialties, aren't always suitable references for teachers of emergency medicine. This book is different - it shows how to incorporate effective teaching strategies into the unique teaching atmosphere of the emergency department, how to effectively lecture, lead small groups, give feedback, foster life-long faculty development skills, and much more - it is written by emergency medicine physicians for emergency medicine physicians. Practical Teaching in Emergency Medicine gets to the essential core of how to best teach the art of practicing emergency medicine - and provides the blueprint to become a better teacher, providing guidance on how to accomplish skilful teaching in busy emergency departments. It provides emergency physicians and trainees with the necessary tools to effectively and efficiently transmit information to learners in the often times chaotic emergency department environment.
