Overview of Hemorrhoids and Symptoms

Hemorrhoids are a common medical condition affecting millions of people in the United States. They occur when the blood vessels in the rectal area become swollen and inflamed due to increased pressure. This pressure can result from factors such as straining during bowel movements, chronic constipation, pregnancy, or prolonged sitting. Hemorrhoids may be internal or external, each presenting distinct symptoms.

Common symptoms of hemorrhoids include itching, swelling, pain during bowel movements, and occasional bleeding. These symptoms can significantly affect daily comfort and quality of life, making effective treatment essential. Over-the-counter remedies, especially those available at CVS, provide accessible options to reduce inflammation, relieve pain, and promote healing.

Types of Hemorrhoid Medications at CVS

CVS offers a variety of hemorrhoid medications designed to address different symptoms and stages of hemorrhoid discomfort. These treatments are available in multiple forms to suit personal preferences and specific needs. The main types of hemorrhoid medicines found at CVS include creams, ointments, suppositories, and medicated wipes.

Creams and Ointments

Creams and ointments are topical treatments applied directly to the affected area. They often contain ingredients that reduce swelling, numb pain, and soothe irritation. These products are typically used for external hemorrhoids but can also provide relief for internal hemorrhoids when applied with an applicator.

Suppositories

Suppositories are designed for internal use and inserted into the rectum. They work by delivering medication directly to internal hemorrhoids, reducing inflammation and discomfort. Suppositories are particularly effective for hemorrhoids that are not easily accessible for topical treatment.

Medicated Wipes

Medicated wipes combine gentle cleansing with soothing and anti-inflammatory properties. They are convenient for maintaining hygiene without aggravating sensitive skin around the anus. These wipes help reduce irritation and can be used alongside other hemorrhoid treatments.

Hemorrhoids, being by far the most common among this class of ailments, and the greatest bone of contention regard ing the best manner of effecting a radical cure, will take precedence in our consideration, and receive the attention that their importance and dignity justly merits. It is an indisputable fact that until within the past few years, an operation for the radical cure of hemorrhoids was considered so formidable an undertaking, that their treat ment, outside of palliative measures, was almost entirely eschewed by the general practitioner.
