creative information technology inc: Understanding Government Contract Law Terrence M. O'Connor, 2018-11-13 This updated classic offers clear and concise explanations of the basic legal concepts of government contract law for professionals at any stage of their career. Written in straightforward language for contracting officers, contract administrators, contractors, subcontractors, and others in the procurement field, this new edition has been updated with new cases and regulations. The book breaks down the complex arena of government contract law into its three most basic parts: the contracting parties, the contract itself, and legal challenges. It begins by examining key aspects of the contracting officer's job and provides guidance for navigating its different and often conflicting demands. The government contractor's responsibilities and challenges are also outlined. Government contracts come in a lot more varieties than the typical commercial contract, and they also tend to be long and confusing. The second part of the book introduces the different types of legal agreements the government uses to buy the goods and services it needs—and addresses the challenges of writing a perfectly clear contract and guidelines for interpreting an ambiguous one. The book concludes with an overview of the government contract litigation process. This is an essential text for students preparing to do the work of government contracts, an indispensable guide for those new to the work, and a valuable reference for contracting personnel who seek solutions to specific issues they face in their day-to-day work.

creative information technology inc: Cultural Mapping as Cultural Inquiry Nancy Duxbury, W.F. Garrett-Petts, David MacLennan, 2015-05-22 This edited collection provides an introduction to the emerging interdisciplinary field of cultural mapping, offering a range of perspectives that are international in scope. Cultural mapping is a mode of inquiry and a methodological tool in urban planning, cultural sustainability, and community development that makes visible the ways local stories, practices, relationships, memories, and rituals constitute places as meaningful locations. The chapters address themes, processes, approaches, and research methodologies drawn from examples in Australia, Canada, Estonia, the United Kingdom, Egypt, Italy, Malaysia, Malta, Palestine, Portugal, Singapore, Sweden, Syria, the United Arab Emirates, the United States, and Ukraine. Contributors explore innovative ways to encourage urban and cultural planning, community development, artistic intervention, and public participation in cultural mapping—recognizing that public involvement and artistic practices introduce a range of challenges spanning various phases of the research process, from the gathering of data, to interpreting data, to presenting findings to a broad range of audiences. The book responds to the need for histories and case studies of cultural mapping that are globally distributed and that situate the practice locally, regionally, nationally, and internationally.

creative information technology inc: Creative Ways of Using and Disseminating Federal Information United States. Congress. House. Committee on Government Operations. Government Information, Justice, and Agriculture Subcommittee, 1992 The purpose of the hearings presented in

this Congressional document was to highlight the enterprising, inventive, and imaginative ways that people use public information and ways that agencies disseminate it. Witnesses were called who could provide information about: (1) how federal data is used by people who make genuine contributions to the nation's economy and democratic processes; (2) the importance of making information available in electronic formats; (3) innovative and inexpensive ways of making information available; (4) the needs of users of federal information; (5) the techniques and technologies of information access; and (6) the impact of the high cost of public information. This report includes statements from 17 witnesses representing a variety of agencies, such as federal agencies, including the General Accounting Office; the Association of Research Libraries; the information industry, including USA Today and DIALOG; nonprofit organizations, such as the Regional Contracting and Assistance Center, which disseminates public information to assist in economic development; and public interest organizations, including OMB Watch, a research, educational, and advocacy organization that monitors Executive Branch activities. Also included are prepared statements submitted for the record by the witnesses and four appendices, which include three additional statements, an article from the Wall Street Journal, working notes, and a letter. creative information technology inc: Copyright Industries and the Impact of Creative Destruction Jiabo Liu, 2013 This book examines the relationship between the legal extension of copyright duration as an enduring means of copyright protection and the growth of the UK book publishing industry as a typical creative industry reliant on copyright. The book draws on Schumpeter's theory of creative destruction to analyse the implications of copyright law and policy on the book industry and illustrate the dynamic interaction between copyright expansion and the growth of the creative industries. The book reviews the historical development of UK copyright expansion and also considers copyright in the digital age. It explores the legal and economic concerns about copyright protection in general, and the expansion of copyright duration in particular. Using an innovative empirical method, it explores whether the expansion of the duration of copyright promotes or precludes the growth of book publishing industry. It goes on to suggest changes to copyright policy which would have an impact on the economics of innovation in the creative industries. This book will be of particular interest to scholars and students of Intellectual Property Law.
