The narrative regarding criminal violence in Mexico tends to highlight the negative, while minimizing success stories: this book is different. It explains the reasons why the region of La Laguna succeeded in reducing the statistics of homicides and missing persons and how it started to attend to the families of victims. There were two key factors: 1) federal, state, and local government pushing aside party differences in order to coordinate efforts, and 2) dialogue and response to the petitions of social actors. The result is the best security model in Mexico.

Tragically, treasure-hunting has had a deep impact on these maritime cultural resources, especially on shipwrecks. In the last 20 years, archaeologists have been fighting the battle against these treasure hunters in an attempt to preserve these resources as a source of cultural heritage, rather than allow them to be viewed solely as a means for financial reward. Case studies written primarily by Latin American and Caribbean archaeologists demonstrate exciting and cutting edge research, conservation, site preservation, and interpretation. As a result, this groundbreaking book documents the emerging research interests of maritime archaeologists in Latin America and the Caribbean.

Matlock, 2019-06-15 Signs of Reincarnation provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records, anthropological studies, and contemporary research. Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain, it does not require the acceptance of any radically new concepts or the abandonment of well-established findings in mainstream psychology or biology. This book offers students, scholars, and anyone interested in the possibility of reincarnation an essential grounding in beliefs, cases, and theory, while opening doors for future research into the extension of consciousness beyond our present lives.

Their titles reveal their central themes, but Burroway feels confident and free to range wide from the main trunk, looping out into her life and her metaphors, then back again, probing through and confessing all because, for the real writer who has come so far, it seems now there is no point in not.--Fourth GenreJanet Burroway followed in the footsteps of Sylvia Plath. Like Plath, she was an early Mademoiselle guest editor in New York, an Ivy League and Cambridge student, an aspiring poet-playwright-novelist in the period before feminism existed, a woman who struggled with her generation's conflicting demands of work and love. Unlike Plath, Janet Burroway survived. In sixteen essays of wit, rage, and reconciliation, *Embalming Mom* chronicles loss and renaissance in a life that reaches from Florida to Arizona across to England and home again. Burroway brilliantly weaves her way through the dangers of daily life--divorcing her first husband, raising two boys, establishing a new life, scattering her mother's ashes and sorting the meager possessions of her father. Each new danger and challenge highlight the tenacious will of the body and spirit to heal. Ordinary life is more dangerous than war because nobody survives, Burroway contemplates in the essay *Danger and Domesticity*, yet each of her meditations reminds us that it's our daily rituals and trials that truly keep us alive. Janet Burroway is the author of plays, poetry, children's books, and seven novels, including *The Buzzards*, *Raw Silk*, *Opening Nights*, and *Cutting Stone*. Her textbook *Writing Fiction*, now in its fifth edition, is used in more than three hundred colleges and universities in the United States; a further text, *Imaginative Writing*, is due out in 2002. She is Robert O. Lawton Distinguished Professor at Florida State University in Tallahassee.

cremation society of laguna: Alternative Leadership Strategies in the Prehispanic Southwest Barbara J. Mills, 2015-09-01 In considerations of societal change, the application of classic evolutionary schemes to prehistoric southwestern peoples has always been problematic for scholars. Because recent theoretical developments point toward more variation in the scale, hierarchy, and degree of centralization of complex societies, this book takes a fresh look at southwestern prehistory with these new ideas in mind. This is the first book-length work to apply new theories of social organization and leadership strategies to the prehispanic Southwest. It examines leadership strategies in a number of archaeological contexts—from Chaco Canyon to Casas Grandes, from Hohokam to Zuni—to show striking differences in the way that leadership was constructed across the region. These case studies provide ample evidence for alternative models of leadership in middle-range societies. By illustrating complementary approaches in the study of political organization, they offer new insight into power and inequality. They also provide important models of how today's archaeologists are linking data to theory, providing a basis for comparative analysis with other regions.
