crime statistics albany ny: *Until We Reckon* Danielle Sered, 2019-03-05 The award-winning "radically original" (The Atlantic) restorative justice leader, whose work the Washington Post has called "totally sensible and totally revolutionary," grapples with the problem of violent crime in the movement for prison abolition A National Book Foundation Literature for Justice honoree A Kirkus "Best Book of 2019 to Fight Racism and Xenophobia" Winner of the National Association of Community and Restorative Justice Journalism Award Finalist for the Goddard Riverside Stephan Russo Book Prize for Social Justice In a book Democracy Now! calls a "complete overhaul of the way we've been taught to think about crime, punishment, and justice," Danielle Sered, the executive director of Common Justice and renowned expert on violence, offers pragmatic solutions that take the place of prison, meeting the needs of survivors and creating pathways for people who have committed violence to repair harm. Critically, Sered argues that reckoning is owed not only on the part of individuals who have caused violence, but also by our nation for its overreliance on incarceration to produce safety—at a great cost to communities, survivors, racial equity, and the very fabric of our democracy. Although over half the people incarcerated in America today have committed violent offenses, the focus of reformers has been almost entirely on nonviolent and drug offenses. Called "innovative" and "truly remarkable" by The Atlantic and "a top-notch entry into the burgeoning incarceration debate" by Kirkus Reviews, Sered's *Until We Reckon* argues with searing force and clarity that our communities are safer the less we rely on prisons and jails as a solution for wrongdoing. Sered asks us to reconsider the purposes of incarceration and argues persuasively that the needs of survivors of violent crime are better met by asking people who commit violence to accept responsibility for their actions and make amends in ways that are meaningful to those they have hurt—none of which happens in the context of a criminal trial or a prison sentence.

crime statistics albania ny: 21st Century Criminology: A Reference Handbook J. Mitchell Miller, 2009-08-06 Criminology has experienced tremendous growth over the last few decades, evident, in part, by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate levels across the U.S. and internationally. Evolutionary paradigmatic shift has accompanied this surge in definitional, disciplinary and pragmatic terms. Though long identified as a leading sociological specialty area, criminology has emerged as a stand-alone discipline in its own right, one that continues to grow and is clearly here to stay. Criminology, today, remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields. Contemporary criminology is also increasingly interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes, effects and responses to crime. 21st Century Criminology: A Reference Handbook provides straightforward and definitive overviews of 100 key topics comprising traditional criminology and its modern outgrowths. The individual chapters have been designed to serve as a first-look reference source for most criminological inquiries. Both connected to the sociological origins of criminology (i.e., theory and research methods) and the justice systems' response to crime and related social problems, as well as coverage of major crime types, this two-volume set offers a comprehensive overview of the current state of criminology. From student term papers and masters theses to researchers commencing literature reviews, 21st Century Criminology is a ready source from which to quickly access authoritative knowledge on a range of key issues and topics central to contemporary criminology. This two-volume set in the SAGE 21st Century Reference Series is intended to provide undergraduate majors with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail, or density as a journal article or research handbook chapter. 100 entries or mini-chapters highlight the most important topics, issues, questions, and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century. Curricular-driven, chapters provide students with initial footholds on topics of interest in researching term papers, in preparing for GREs, in consulting to determine directions to take in pursuing a senior thesis, graduate degree, career, etc. Comprehensive in coverage, major sections include The Discipline of Criminology, Correlates of Crime, Theories of Crime & Justice, Measurement & Research, Types of Crime, and Crime & the Justice System. The contributor group is comprised of well-known figures and emerging young scholars who provide authoritative overviews coupled with insightful discussion that will quickly familiarize researchers, students, and general readers alike with fundamental and detailed information for each topic. Uniform chapter structure makes it easy for students to locate key information, with most chapters following a format of Introduction, Theory, Methods, Applications, Comparison, Future Directions, Summary, Bibliography & Suggestions for Further Reading, and Cross References. Availability in print and electronic formats provides students with convenient, easy access wherever they may be.

crime statistics albania ny: An Introduction to Transnational Criminal Law Neil Boister, 2018-04-13 National borders are permeable to all types of illicit action and contraband goods,

whether it is trafficking humans, body parts, digital information, drugs, weapons, or money. Whilst criminals exist in a borderless world where territorial boundaries allow them to manipulate different markets in illicit goods, the authorities who pursue them can remain constrained inside their own jurisdictions. In a new edition of his ground-breaking work, Boister examines how states must cooperate to tackle some of the greatest security threats in this century so far, analyses to what extent vested interests have determined the course of global policy and law enforcement, and illustrates how responding to transnational crime itself becomes a form of international relations which reorders global political power and becomes, at least in part, an end in itself. Arguing that transnational criminal law is currently geared towards suppressing criminal activity, but is not as committed to ensuring justice, Boister suggests that it might be more strongly influenced by individual moral panics and a desire for criminal retribution than an interest in ensuring a proportional response to offences, protection of human rights, and the preservation of the rule of law.
