crime and intelligence analysis certificate: Treaties and Treachery Kurt R. Nelson, 2011-05-15 Distributed by the University of Nebraska Press for Caxton Press The seven years from 1853 to 1859 are probably more important to the Pacific Northwest than any period of its recorded history. It was in the 1850s that officials began carving the Oregon Territory into the states. It was the period when most Native American tribes signed treaties that were supposed to protect their future. It was also when the natives of the region learned that no matter what the treaties promised, they would have little control over their destiny. So they fought a hopeless battle to preserve their way of life. Both settlers and Natives Americans believed they were God's chosen people. With hindsight, we can see with clarity the injustices done. But neither side can claim purity of action. Atrocities were committed by both. For almost every major tribe of the Northwest, the 1850s marked the end of their way of life. This is the story of how cultures clashed. This is the story of one corner of our country, and how its history shapes its course today.

Old friends feature in several, such as "On The Internet Nobody Knows You're a Dog," where a musician turns PI to track down a stalker. And "One-Upmanship Wreck" shows how far tensions can escalate between neighbours before someone wants a final solution. And among the "Gifted Girls" at summer camp, a scholarship kid who is also the daughter of a cop notices a thing or two about the death of an unpopular instructor. It's a "Lucky Day" when a winning lottery ticket is found ... or is it? In "The Seal's Deadly Game," an animal's playfulness might prevent a death or cause one. "A Genteel Game" could reveal the next CEO at a corporate retreat if a murderer isn't unmasked first. In "Fixed," European football mixes with a one-night stand to enmesh a journalist, and in "King LARP," a live-action role playing event at B&B turns deadly. People play dangerous games. crime and intelligence analysis certificate: Improving Intelligence Analysis Stephen Marrin, 2012-08-21 This book on intelligence analysis written by intelligence expert Dr. Stephen Marrin argues that scholarship can play a valuable role in improving intelligence analysis. Improving intelligence analysis requires bridging the gap between scholarship and practice. Compared to the more established academic disciplines of political science and international relations, intelligence studies scholarship is generally quite relevant to practice. Yet a substantial gap exists nonetheless. Even though there are many intelligence analysts, very few of them are aware of the various writings on intelligence analysis which could help them improve their own processes and products. If the gap between scholarship and practice were to be bridged, practitioners would be able to access and exploit the literature in order to acquire new ways to think about, frame, conceptualize, and improve the analytic process and the resulting product. This volume contributes to the broader discussion regarding mechanisms and methods for improving intelligence analysis processes and products. It synthesizes these articles into a coherent whole, linking them together through common themes, and emphasizes the broader vision of intelligence analysis in the introduction and conclusion chapters. The book will be of great interest to students of intelligence studies, strategic studies, US national security, US foreign policy, security studies and political science in general, as well as professional intelligence analysts and managers.
