critical intelligence minor rutgers: US Intelligence and Al Qaeda Peter de Werd, 2020-09-21 This book sets out a new analytic methodology: analysis by contrasting narratives (ACN), which states that defining an enemy and attempting to counter threats can contribute to the manifestation of that threat. Peter de Werd applies ACN to the problem the US faced in understanding and responding to the phenomenon of Al Qaeda in the 1990s. He demonstrates how this approach can fill a gap in intelligence studies by enhancing the understanding of complex intelligence problems and strengthening the practice of intelligence analysis. Adopting a reflexivist theoretical stance, the book underlines the importance of an integrated approach to interpretation and action, and of a continuous dialogue between intelligence and policy.

critical intelligence minor rutgers: Blurring Intelligence Crime Willem Bart de Lint, 2021-03-14 This book explores the conundrum that political fortune is dependent both on social order and big, constitutive crime. An act of outrageous harm depends on rules and protocols of crime scene discovery and forensic recovery, but political authorities review events for a social agenda, so that crime is designated according to the relative absence or presence of politics. In investigating this problem, the book introduces the concepts 'intelligence crime' and 'critical forensics.' It also reviews as an exemplar of this phenomenon 'apex crime,' a watershed event involving government in the support of a contested political and social order and its primary opponent as the obvious offender, which is then subject to a confirmation bias. Chapters feature case study analysis of a selection of familiar, high profile crimes in which the motives and actions of security or intelligence actors are considered as blurred or smeared depending on their interconnection in transactional political events, or according to friend/enemy status.

critical intelligence minor rutgers: Frontiers of Human Centricity in the Artificial Intelligence-Driven Society 5.0 Sameh Reyad, 2024-12-07 According to Serpa (in MDPI encyclopedia) [3], Society 5.0 can be realized as a concept and a guide for social development, with a profound impact on current societal structures in multiple levels. Society 5.0 achieves advanced convergence between cyberspace and physical space, enabling AI-based on big data and robots to perform or support as an agent the work and adjustments that humans have done up to now. Deguchi et al., [4] define Society 5.0 as a highly intelligent society based on generation, processing, exchange of data, and more specifically knowledge, through the connection of the physical environment with the cyberspace. Achieving Society 5.0 with these attributes would enable the world to realize economic development while solving key social problems. It would additionally contribute to achieving the SDGs established by the United Nations. Despite the differences in formulation of the names of these periods and societies, it is obvious that each of them became a basis for step like growth in developed society; at, specific time periods, scale, character and depth of these changes are different in different countries. Consequently, to address the aims of the book, it seeks exploratory, empirical, interpretive, and theoretical research built on either primary or secondary data. The approaches suggested are not exhaustive and can be extended upon by the researchers. In addition, the book will contribute towards the UN's sustainable development goals. In support of UN's efforts towards a more digital economy, this book aims to debate and discuss the history, genesis, future, opportunities, and challenges of transitioning to Society 5.0. and provides a holistic perspective on a variety of topics special topics which contribute towards the optimal attainment of the SDGs, particularly in terms of social dimensions. Finally, this book provides a

platform for researchers, academics, and professionals to the transition and technological enablers of industrial revolutions through empirical or exploratory studies that use a variety of innovative approaches. The target audience of the book includes researchers and scholars who will find in its comprehensive knowledge about industry 4, industry 5, society 5 and its contribution to economic growth and sustainable development goals (SDGs). Furthermore, the book's secondary target audience are teachers, managers, strategists, professionals, governments, and policymakers.

critical intelligence minor rutgers: *Black Children of Incarcerated Parents Speak Truth to Power* Britany Jenine Gatewood, Bahiyyah Miallah Muhammad, Sydni Myat Turner, 2023-11-16 This book centers directly impacted Black children who have lived through parental incarceration. Their stories are told from holistic perspectives incorporating the full range of collateral consequences. Shifting from the Eurocentric and capitalistic viewpoint, they move us beyond negative outcomes to a positive prism by providing insider perspective, strategy, advice, and compelling experiences. We center Black children of incarcerated parents' (BCOIP's) rich narratives to show how they are conscious thinkers with perspectives that can help reimagine all Black children's lives and futures. These stories help readers better understand the importance of exploring the revolutionary ways BCOIP continue to survive, thrive, and transform amid the dynamic challenges surrounding mass incarceration. The book shifts the social dialogue from fear of intergenerational crime and incarceration to resilience, success, Black joy, and self-love, and moves from sympathetic into an empathetic agenda. The book brings to the forefront counter-storytelling through oral narratives that fill a gap in literature that leaves out the voices of children of incarcerated parents who are doctors, lawyers, professional athletes, musicians, community leaders, activists, professors, teachers, bestselling authors, and much more. These are vital experiences to share because not all BCOIP will end up in prison, jail, or a detention center. *Black Children of Incarcerated Parents Speak Truth to Power* will be of great interest to scholars from the humanistic social sciences and humanities. It is also a timely resource for students (high school, undergraduate, and graduate) in sociology, criminology, corrections, humanities, social work, counseling, education, social justice, and related courses, as well as agency administrators, community organizations servicing families of the incarcerated, specifically incarcerated parents and the children of incarcerated parents, themselves.

Siegel, 2022-03-04 During his 31-year tenure as director of the U.S. National Library of Medicine (NLM), Donald A.B. Lindberg M.D. dramatically increased access to knowledge about health issues, medicine, medical care, the health professions, and health literacy. As an enthusiastic visionary with a plan, his aim was to bring about a more efficient transfer and use of information and data. Dr. Lindberg and the NLM helped transform and reshape medicine and the health system in the 20th and 21st centuries. Dr. Lindberg envisioned, encouraged, and supported the development of electronic health records and telemedicine. Coupled with the evolution of the Internet, these technologies made health systems more efficient for research, the delivery of clinical services, the education of health professionals, bioethics, improving the public's health literacy, and disease prevention strategies. Dr. Lindberg also was committed to enhancing the capacity of underserved and minority populations to make use of

NLM's health information resources. Transforming Biomedical Informatics and Health Information Access is a tribute to Don Lindberg and the NLM. The book is divided into four sections. The first documents the advances in biomedical informatics during Dr. Lindberg's career, emphasizing the contributions made by teams of talented individuals at the NLM. The second section describes how the NLM's creation of new methods of access to diverse biomedical databases improved information access for healthcare professionals, biomedical researchers, and the public. The third section explains how NLM's outreach programs improved access to health information among underrepresented audiences and communities. The more informal fourth section provides brief memoirs about Dr. Lindberg's life, character, and humanism.

critical intelligence minor rutgers: *Leadership Across Boundaries* Nathan Harter, 2020-11-29 Leadership Across Boundaries: A Passage to Aporia theorizes on leadership in an unprecedented manner by stepping outside of conventional leadership theory and importing into leadership studies the implications of certain innovations in the social sciences, such as pluralism, complexity theory, and the dialogical turn, to change the way scholars discuss and study leadership. Leadership Across Boundaries anchors theoretical passages that generate a new way of imagining what it means to lead and follow with concrete examples about Martin Luther, the Common Law, dialogue as a practice, a painting by Diego Velázquez, synchronized fireflies, and the strange career of Francis of Assisi. This book acknowledges the limitations of existing leadership research as being too leader-centric, simplistic, static, and in many cases oblivious to the power of images to shape our understanding. To rectify these limitations, Leadership Across Boundaries examines alternative images of leadership grounded in concrete examples that present leadership in an unprecedented light. The book includes a discussion of invigorating ideas of homeward leadership (looking backward), extra-ordinary leadership (going forward), and what will be defined as the perennial need for aikido politics. An interdisciplinary text, Leadership Across Boundaries: A Passage to Aporia will appeal not only to scholars, instructors, and students of leadership, but also to those in the many fields in which leadership theory applies, such as history, economics, sociology, archetypal psychology, the law, political philosophy, applied mathematics, and the martial arts.

critical intelligence minor rutgers: *Mexico* George W Grayson, 2017-07-28 * Mexico was named an Outstanding Academic Title of 2010 by Choice Magazine. Bloodshed connected with Mexican drug cartels, how they emerged, and their impact on the United States is the subject of this frightening book. Savage narcotics-related decapitations, castrations, and other murders have destroyed tourism in many Mexican communities and such savagery is now cascading across the border into the United States. Grayson explores how this spiral of violence emerged in Mexico, its impact on the country and its northern neighbor, and the prospects for managing it. Mexico's Institutional Revolutionary Party (PRI) ruled in Tammany Hall fashion for seventy-nine years before

losing the presidency in 2000 to the center-right National Action Party (PAN). Grayson focuses on drug wars, prohibition, corruption, and other antecedents that occurred during the PRI's hegemony. He illuminates the diaspora of drug cartels and their fragmentation, analyzes the emergence of new gangs, sets forth President Felipe Calderón's strategy against vicious criminal organizations, and assesses its relative success. Grayson reviews the effect of narcotics-focused issues in U.S.-Mexican relations. He considers the possibility that Mexico may become a failed state, as feared by opinion-leaders, even as it pursues an aggressive but thus far unsuccessful crusade against the importation, processing, and sale of illegal substances. Becoming a failed state involves two dimensions of state power: its scope, or the different functions and goals taken on by governments, and its strength, or the government's ability to plan and execute policies. The Mexican state boasts an extensive scope evidenced by its monopoly over the petroleum industry, its role as the major supplier of electricity, its financing of public education, its numerous retirement and health-care programs, its control of public universities, and its dominance
