crime statistics syracuse ny: Hate Crimes James B. Jacobs, Kimberly Potter, 2000-12-28 In the early 1980s, a new category of crime appeared in the criminal law lexicon. In response to concerted advocacy-group lobbying, Congress and many state legislatures passed a wave of hate crime laws requiring the collection of statistics on, and enhancing the punishment for, crimes motivated by certain prejudices. This book places the evolution of the hate crime concept in socio-legal perspective. James B. Jacobs and Kimberly Potter adopt a skeptical if not critical stance, maintaining that legal definitions of hate crime are riddled with ambiguity and subjectivity. No matter how hate crime is defined, and despite an apparent media consensus to the contrary, the authors find no evidence to support the claim that the United States is experiencing a hate crime epidemic--instead, they cast doubt on whether the number of hate crimes is even increasing. The authors further assert that, while the federal effort to establish a reliable hate crime accounting system has failed, data collected for this purpose have led to widespread misinterpretation of the state of intergroup relations in this country. The book contends that hate crime as a socio-legal category represents the elaboration of an identity politics now manifesting itself in many areas of the law. But the attempt to apply the anti-discrimination paradigm to criminal law generates problems and anomalies. For one thing, members of minority groups are frequently hate crime perpetrators. Moreover, the underlying conduct prohibited by hate crime law is already subject to criminal punishment. Jacobs and Potter question whether hate crimes are worse or more serious than similar crimes attributable to other anti-social motivations. They also argue that the effort to single out hate

crime for greater punishment is, in effect, an effort to punish some offenders more seriously simply because of their beliefs, opinions, or values, thus implicating the First Amendment. Advancing a provocative argument in clear and persuasive terms, Jacobs and Potter show how the recriminalization of hate crime has little (if any) value with respect to law enforcement or criminal justice. Indeed, enforcement of such laws may exacerbate intergroup tensions rather than eradicate prejudice.

crime statistics syracuse ny: Dastardly Discourse Meg Gorzycki, 2020-03-09 Screaming at the television, compulsively firing off tart little tweets, and blogging until we are blue; these signal that we are feeling the effects of dastardly discourse. We live in a world where people feel entitled to use words to hurt, exploit, and publicly degrade humanity. We daily consume rhetoric that makes a mockery of decency and civility. Leaders of key social institutions, including government, news media, and religious organizations, who are supposed to be role models of reasoned and compassionate communication are often the ones with the loudest lies and the hardest hate. We can change the channel. We can unplug. We can even encourage others to do the same. We may not do so, however, until we grasp what is fundamentally at risk in our current norms of communication. Nasty words are just the tip of the dastardly discourse iceberg. What lies beneath is a steady flow of propaganda that aims to control our personal narratives. This book is about that propaganda, the importance of owning our own narratives, and improving our own rhetorical capital—the ability to analyze and evaluate information—for the sake of sustaining human dignity, decency, and civility.
