Overview of Crested Gecko Diet Repashy

The crested gecko diet Repashy is specifically formulated to provide a complete and balanced meal

replacement or supplement for crested geckos. Repashy is a brand known for producing high-quality powdered diets that can be mixed with water to create a nutritious paste. These diets are designed to mimic the natural feeding habits of crested geckos, which consume a variety of fruits, insects, and nectar in the wild.

Repashy offers several product lines suitable for crested geckos, including the “Crested Gecko Diet,” “Superfoods,” and “Bug Burger.” These products are crafted to deliver essential vitamins, minerals, protein, and fiber necessary for growth, vitality, and overall health. The ease of preparation and the palatability of Repashy diets make them a preferred choice among reptile keepers.

Product Variants for Crested Geckos

Repashy provides different formulations catering to the specific needs of crested geckos at various life stages. The original Crested Gecko Diet is formulated for daily feeding, while other blends like Superfoods focus on added nutrition through antioxidants and superfoods. Bug Burger offers a high-protein option that helps replicate the insectivorous component of the natural diet.

Key Ingredients in Repashy Diets

The primary ingredients in Repashy crested gecko diets typically include a mix of fruit purees, soy protein isolate or insect protein, calcium carbonate, vitamins, and prebiotics. These components ensure that geckos receive adequate nutrition without the risk of deficiencies commonly seen in poorly balanced homemade diets.

Nutritional Composition of Repashy Diets

Understanding the nutritional profile of crested gecko diet Repashy is crucial to appreciating why it is favored by many reptile experts. Repashy diets are formulated to provide a balanced ratio of macronutrients and micronutrients essential for healthy growth and maintenance.

Macronutrients

Repashy diets typically contain a balanced combination of:

- **Protein:** Typically around 12-15%, sourced from soy or insect protein to support muscle development and metabolic functions.
- **Fat:** Approximately 2-4%, providing energy and supporting skin and scale health.
- **Carbohydrates:** Derived mainly from fruit and fiber sources to promote digestive health and sustained energy release.

Micronutrients

Repashy formulations include essential vitamins such as A, D3, E, and several B-complex vitamins. Calcium and phosphorus are carefully balanced to promote strong bone development and prevent metabolic bone disease. The addition of prebiotics and probiotics supports gut health and nutrient absorption.

Benefits of Using Repashy for Crested Geckos

The crested gecko diet Repashy offers several significant advantages over other feeding methods, making it a reliable choice for pet owners focused on optimal reptile care.

Complete Nutrition

Repashy diets are designed to be nutritionally complete, reducing the risk of vitamin and mineral deficiencies. This completeness ensures that crested geckos receive all necessary nutrients in every

meal, supporting healthy growth and longevity.

Convenience and Consistency

Repashy powdered diets are easy to prepare by mixing with water, allowing consistent feeding and portion control. This convenience helps maintain regular feeding schedules and reduces the variability often seen with live insect or fresh fruit feeding.

Supports Health and Vitality

Regular feeding with Repashy supports immune function, reproductive health, and skin regeneration. The inclusion of antioxidants and superfoods in certain Repashy products helps combat oxidative stress and promotes overall vitality.

Reduced Risk of Parasites and Contamination

Unlike live insects or fresh foods, Repashy diets are processed and free from parasites and bacterial contamination, reducing health risks associated with captive reptile feeding.

How to Properly Feed Repashy to Crested Geckos

Proper preparation and feeding techniques ensure that crested geckos receive the maximum benefit from their Repashy diet. Understanding how to mix and serve the food is essential for encouraging feeding and maintaining health.

Mixing Instructions

Repashy powder should be mixed with clean, lukewarm water to create a smooth paste. The typical

ratio is approximately 1 part water to 1 part powder, but this can be adjusted based on desired consistency. It is important to mix thoroughly until no clumps remain to facilitate easy consumption by the gecko.

Feeding Schedule

Crested geckos should be fed a fresh portion of Repashy diet every 2-3 days. Juveniles may require more frequent feeding, while adults can thrive on a schedule of every 3-4 days. Uneaten food should be removed promptly to prevent spoilage and maintain enclosure hygiene.

Storage and Handling

Repashy powder should be stored in a cool, dry place to preserve nutritional quality. Once mixed, unused portions should be refrigerated and discarded after 24-48 hours to avoid bacterial growth.

Comparing Repashy with Other Diet Options

When selecting a diet for crested geckos, it is important to compare Repashy with alternative feeding options such as live insects, fresh fruits, or homemade diets. Each has its advantages and disadvantages.

Live Insects

Live insects like crickets and roaches provide natural prey stimulation and high protein but can be inconsistent nutritionally and may carry parasites. In addition, feeding live prey requires careful gut-loading and supplementation.

Fresh Fruits

Fresh fruit supplements replicate a part of the crested gecko's natural diet but lack sufficient protein and essential nutrients on their own. Fruits can also spoil quickly and attract pests if not managed properly.

Homemade Diets

Homemade diets may vary widely in nutritional adequacy. Without precise formulation, geckos can experience deficiencies or imbalances. Repashy offers a scientifically formulated alternative with consistent nutrient profiles.

Advantages of Repashy Over Other Diets

- Balanced, complete nutrition tailored specifically for crested geckos
- Convenient preparation and feeding
- Reduced health risks from contamination and parasites
- Consistent quality and nutrient content
- Longer shelf life compared to fresh food

Common Questions About Crested Gecko Diet Repashy

Owners and breeders often have questions regarding the use of Repashy diets to ensure proper care for their crested geckos. Below are answers to some frequently asked questions.

Is Repashy Suitable as a Sole Diet?

Yes, Repashy Crested Gecko Diet is designed to be a complete meal replacement and can be fed exclusively. Some owners choose to supplement with occasional live insects or fruits for variety, but Repashy alone meets all basic nutritional requirements.

Can Hatchlings Eat Repashy?

Young crested geckos can safely consume Repashy diets formulated for their specific developmental needs. It is important to offer a slightly thinner consistency to facilitate easier consumption for hatchlings.

How Often Should I Feed My Crested Gecko Repashy?

Feeding every 2-3 days is recommended for most crested geckos. Juveniles may require more frequent feeding, while adults can be fed less often. Monitoring weight and behavior will help determine the ideal schedule.

Are There Any Allergies or Sensitivities to Be Aware Of?

Some crested geckos may have sensitivities to soy or certain ingredients in Repashy formulas. Observing your gecko for adverse reactions when introducing the diet is important. Alternative Repashy products or supplements can be considered if sensitivities occur.

Frequently Asked Questions

What is Repashy and why is it recommended for crested gecko diets?

Repashy is a brand of powdered reptile food formulated specifically for crested geckos and other insectivorous and frugivorous reptiles. It is recommended because it provides balanced nutrition, including proteins, vitamins, and minerals essential for the health and growth of crested geckos.

Can crested geckos eat only Repashy, or do they need live insects as well?

Crested geckos can thrive on a diet primarily consisting of Repashy powdered food when properly prepared. However, some keepers supplement their diet with live insects like crickets or roaches to provide additional protein and variety.

How do you prepare Repashy powdered diet for a crested gecko?

To prepare Repashy, mix the powder with warm water according to the package instructions until it reaches a smooth, pudding-like consistency. Serve it fresh in a shallow dish or on a feeding spoon to your crested gecko.

Is Repashy safe for baby and juvenile crested geckos?

Yes, Repashy is safe and highly recommended for baby and juvenile crested geckos because it contains all the necessary nutrients to support their rapid growth and development.

How often should I feed my crested gecko Repashy diet?

Most keepers feed their crested geckos Repashy about 3-4 times a week, allowing the gecko to eat what it wants within a few hours. Fresh food should be removed to prevent spoilage.

Are there different Repashy formulas suitable for crested geckos?

Yes, Repashy offers several formulas such as Superfoods, Grub Pie, and Calcium Plus, each designed to meet various nutritional needs of crested geckos at different life stages or with specific

dietary preferences.

Can I mix Repashy diet with fresh fruits for my crested gecko?

While Repashy is nutritionally complete, some keepers like to mix it with small amounts of fresh fruit like mashed banana or mango to provide variety and encourage feeding, but it is not necessary.

What are common mistakes to avoid when feeding Repashy to crested geckos?

Common mistakes include overfeeding, not mixing the powder properly, leaving uneaten food in the enclosure too long, and not providing fresh water alongside the diet, all of which can affect the gecko's health.

crested gecko diet repashy: *Crested Gecko for Novices* Randy Banks, 2020-07-31 The crested gecko is a relatively large species of gecko from the forests of southern New Caledonia. They are one of the most popular pet lizards to keep in the world and easily the most popular arboreal gecko. The crested gecko is easily identified by its semi prehensile tail, triangular shaped head and protrusions over the eye socket resembling eyelashes. Naturally, they can be found in shades of grey, brown, red, orange and yellow but private breeders have refined these into many colour and pattern morphs. Crested geckos are most commonly found in the southern province of New Guinea but they have also been found on the surrounding islets and on the island of Grande Terre. Crested geckos are sweet, docile creatures. They can be tamed and handled; however, handlers must be careful they do not jump off the hand and into danger.
