

crime statistics in zimbabwe

crime statistics in zimbabwe provide critical insights into the patterns, prevalence, and nature of criminal activities within the country. Understanding these statistics is essential for policymakers, law enforcement agencies, researchers, and the public to address crime effectively and develop informed strategies for crime prevention. Zimbabwe, like many nations, faces a variety of crime challenges ranging from violent offenses to property crimes, which impact social stability and economic development. This article explores the most recent crime statistics in Zimbabwe, analyzes common types of crime, regional variations, trends over time, and the responses of law enforcement. Additionally, the article examines factors influencing crime rates and the implications for future policy and community safety initiatives. By delving into detailed crime data and expert analyses, readers will gain a comprehensive understanding of the current crime landscape in Zimbabwe.

- Overview of Crime Statistics in Zimbabwe
- Common Types of Crime
- Regional Crime Variations
- Trends and Patterns Over Time
- Factors Influencing Crime Rates
- Law Enforcement and Crime Prevention Efforts

Overview of Crime Statistics in Zimbabwe

Crime statistics in Zimbabwe are compiled by various government bodies, including the Zimbabwe Republic Police (ZRP), and independent organizations that track crime trends. These statistics offer a quantitative measure of crime incidence across different categories such as violent crime, property crime, and organized crime. The annual crime reports provide data on the number of reported cases, arrests, and convictions, which help to assess the effectiveness of the criminal justice system. Zimbabwe has experienced fluctuations in crime rates influenced by socio-economic conditions, political stability, and law enforcement capacity. Recent official reports indicate a mixed picture, with some crime categories showing a decline while others remain persistent challenges.

Sources and Reliability of Crime Data

The primary source of crime statistics in Zimbabwe is the Zimbabwe Republic Police, which collects data from police stations nationwide. Additionally, the Zimbabwe National Statistics Agency (ZIMSTAT) and international organizations provide complementary data. However,

underreporting remains a significant issue due to public distrust, fear of retaliation, and limited access to law enforcement in rural areas. Despite these challenges, crime data continues to be valuable for understanding crime dynamics and planning interventions.

Common Types of Crime

Zimbabwe faces a range of criminal activities, with certain types being more prevalent according to crime statistics in Zimbabwe. These crimes impact both urban and rural communities and have varying degrees of social and economic consequences.

Violent Crimes

Violent crimes such as assault, armed robbery, murder, and domestic violence are among the most concerning categories in Zimbabwe. These offenses often involve the use of weapons and result in serious physical harm or death. Domestic violence, in particular, is a significant social issue, with many cases going unreported due to cultural stigmas and insufficient legal protection for victims.

Property Crimes

Property crimes including burglary, theft, carjacking, and vandalism constitute a large portion of reported offenses. These crimes affect individuals, businesses, and public infrastructure, leading to financial losses and insecurity. Carjacking, a high-profile crime in urban centers, has prompted increased security measures by both citizens and authorities.

Economic and Cyber Crimes

Economic crimes such as fraud, corruption, and embezzlement have grown in prominence in Zimbabwe's crime landscape. Cybercrime is an emerging threat, with increased internet penetration exposing citizens and institutions to online fraud, identity theft, and scams. These crimes undermine economic development and public trust in institutions.

- Assault and violent attacks
- Armed robbery and carjacking
- Burglary and theft
- Domestic violence and sexual offenses
- Corruption and fraud
- Cybercrime and online scams

Regional Crime Variations

Crime statistics in Zimbabwe reveal notable regional differences, influenced by factors such as population density, economic activity, and law enforcement presence. Urban areas generally report higher crime rates compared to rural regions, although certain rural areas face specific challenges.

Urban Crime Hotspots

Major cities like Harare, Bulawayo, and Mutare experience higher incidences of violent crime, property crime, and commercial crime. The concentration of people, businesses, and wealth in these urban centers creates opportunities for criminals. Informal settlements and economically disadvantaged neighborhoods are particularly vulnerable to crime.

Rural Crime Characteristics

In rural areas, crime tends to be less frequent but includes unique forms such as cattle rustling, poaching, and disputes over land and resources. Limited police presence and infrastructure challenges can delay response times, complicating crime prevention efforts in these communities.

Trends and Patterns Over Time

Analyzing crime statistics in Zimbabwe over recent years shows evolving patterns influenced by social, economic, and political developments. Understanding these trends is essential for adapting law enforcement strategies and public policy.

Recent Increases and Decreases

Some categories such as armed robbery and carjacking have seen periodic spikes, often linked to economic hardships and increased availability of weapons. Conversely, efforts to combat certain crimes, including domestic violence and drug trafficking, have resulted in gradual decreases in reported cases. Seasonal variations also affect crime rates, with some crimes peaking during holiday periods.

Impact of Socioeconomic Factors

Economic instability, unemployment, and poverty are strongly correlated with crime rates in Zimbabwe. Periods of economic downturn typically coincide with rises in property crimes and social unrest. Conversely, economic improvements and social programs can contribute to crime reduction.

Factors Influencing Crime Rates

Multiple factors influence the crime statistics in Zimbabwe, shaping both the nature and frequency of criminal activities. These factors operate at individual, community, and systemic levels.

Economic Challenges

High unemployment rates and widespread poverty create fertile ground for criminal behavior as individuals seek alternative means of income. Economic hardship also strains community resources and social cohesion, reducing informal social controls that deter crime.

Political and Social Stability

Periods of political instability and social unrest often correlate with spikes in crime, as law enforcement agencies face challenges maintaining order. Political violence and protests sometimes escalate into criminal acts, further complicating the crime landscape.

Law Enforcement Capacity

The effectiveness of police forces, judicial systems, and correctional facilities directly impacts crime rates. Challenges such as limited resources, corruption, and inadequate training can hinder crime prevention and resolution, affecting overall crime statistics in Zimbabwe.

Law Enforcement and Crime Prevention Efforts

Zimbabwe's law enforcement agencies have implemented various strategies to address crime, informed by crime statistics in Zimbabwe and community needs. These efforts involve policing reforms, community engagement, and legislative changes aimed at enhancing public safety.

Policing Strategies

The Zimbabwe Republic Police has adopted both reactive and proactive approaches, including increased patrols in high-crime areas, intelligence-led policing, and specialized units targeting organized crime and cybercrime. Partnerships with community groups and private security firms have also been emphasized.

Community-Based Initiatives

Community policing programs aim to build trust between law enforcement and citizens,

encouraging crime reporting and collaborative problem-solving. Public awareness campaigns focus on crime prevention, domestic violence, and fraud, empowering communities to participate actively in safety efforts.

Legal and Policy Reforms

Legislative measures have been introduced to strengthen penalties for serious crimes, improve victim protection, and regulate firearms. Ongoing reforms seek to modernize the criminal justice system to ensure timely and fair prosecution of offenders, thus enhancing deterrence.

1. Increased police presence in crime hotspots
2. Community policing and public engagement
3. Strengthening of legal frameworks and penalties
4. Use of technology for crime detection and prevention
5. Collaboration with international agencies for cross-border crime control

Frequently Asked Questions

What are the most common types of crime reported in Zimbabwe?

The most common types of crime reported in Zimbabwe include theft, burglary, assault, and armed robbery, with increasing concerns over domestic violence and cybercrime.

How has the crime rate in Zimbabwe changed over the past five years?

Over the past five years, Zimbabwe has experienced fluctuations in crime rates, with some urban areas seeing a rise in violent crimes and property-related offenses, while rural areas have generally reported lower crime levels.

What regions in Zimbabwe have the highest crime rates?

Urban centers such as Harare and Bulawayo tend to have higher crime rates compared to rural areas, with particular hotspots in high-density suburbs where socio-economic challenges are more pronounced.

How reliable are crime statistics reported by Zimbabwean authorities?

Crime statistics in Zimbabwe are sometimes criticized for underreporting and lack of transparency, due to limited resources, reporting challenges, and concerns about data accuracy, which can affect the overall reliability of the figures.

What measures is the Zimbabwean government taking to address rising crime rates?

The Zimbabwean government has implemented increased police patrols, community policing initiatives, and legislative reforms aimed at strengthening law enforcement and judicial responses to crime.

How does Zimbabwe's crime rate compare to other countries in Southern Africa?

Zimbabwe's crime rate is comparable to some neighboring countries, with similar challenges related to economic conditions and urbanization; however, certain crimes such as armed robbery and domestic violence are notably prevalent in Zimbabwe.

Additional Resources

1. Crime Trends and Patterns in Zimbabwe: A Statistical Overview

This book provides a comprehensive analysis of crime trends in Zimbabwe over the past two decades. Utilizing official crime data and surveys, it highlights shifts in crime rates, types of offenses, and regional variations. The author also discusses the social and economic factors influencing these patterns, offering valuable insights for policymakers and law enforcement agencies.

2. Understanding Crime Data in Zimbabwe: Methods and Challenges

Focusing on the methodologies behind crime data collection, this book explores how crime statistics are gathered, reported, and interpreted in Zimbabwe. It addresses common challenges such as underreporting, data inconsistencies, and the impact of political factors. The text serves as a guide for researchers and practitioners aiming to use crime data effectively.

3. Urban Crime and Its Statistical Realities in Zimbabwean Cities

This book examines crime statistics specifically in urban areas of Zimbabwe, such as Harare and Bulawayo. It analyzes the relationship between urbanization, poverty, and crime rates, providing a detailed demographic breakdown of offenders and victims. The findings shed light on urban crime prevention strategies tailored to Zimbabwe's unique context.

4. Gender and Crime in Zimbabwe: Statistical Insights

Exploring the intersection of gender and crime, this book presents data on how crime affects different genders in Zimbabwe. It discusses trends in gender-based violence, domestic abuse, and female offending rates, supported by statistical evidence. The author also considers cultural and legal factors influencing these dynamics.

5. *The Impact of Economic Factors on Crime Rates in Zimbabwe*

This publication investigates how economic conditions, such as unemployment and inflation, correlate with crime rates in Zimbabwe. Using statistical analysis, it reveals significant links between economic hardship and increases in certain types of crime. The book offers policy recommendations to address economic drivers of criminal behavior.

6. *Crime Statistics and the Justice System in Zimbabwe: An Analytical Approach*

This book examines how crime data interacts with the Zimbabwean justice system, including the police, courts, and correctional facilities. It evaluates the effectiveness of law enforcement using statistical indicators and discusses issues of data transparency and accountability. The analysis provides a critical perspective on justice sector reforms.

7. *Child and Youth Crime in Zimbabwe: Statistical Perspectives*

Focusing on juvenile delinquency, this book presents crime statistics relating to children and young people in Zimbabwe. It explores factors contributing to youth crime, such as education, family environment, and peer influence, supported by quantitative data. The work aims to inform interventions targeting youth offenders.

8. *Rural Crime Dynamics in Zimbabwe: A Statistical Study*

This book sheds light on crime patterns in Zimbabwe's rural areas, often overlooked in national statistics. It analyzes types of rural crime, including livestock theft and property crimes, with a focus on regional disparities. The author discusses the implications for rural development and security policies.

9. *Comparative Crime Statistics: Zimbabwe in the Southern African Context*

This comparative study situates Zimbabwe's crime statistics within the broader Southern African region. It identifies similarities and differences in crime trends, rates, and reporting practices across neighboring countries. The book provides a regional perspective useful for cross-border crime prevention and cooperation initiatives.

crime statistics in zimbabwe: Sociology A-Level (ZIMSEC) Past Exam Questions and Model Answers David Chitate , 2024-06-06 This book contains the most comprehensive question bank and model answers for ZIMSEC A-Level exam questions. It also includes syllabus review notes and exercises. Examiners provide observations and tips and point out common errors that students make when answering questions. If you use this book faithfully, you can't fail, and the Grade A is very much within your reach.

crime statistics in zimbabwe: Crime Types and Criminals Frank E. Hagan, 2010 A good introduction to crime types and criminology to provide students with a grounding to the start of their studies.

crime statistics in zimbabwe: Crime and Punishment around the World Graeme R.

Newman, 2010-10-19 This comprehensive, detailed account explores crime and punishment throughout the world through the eyes of leading experts, local authors and scholars, and government officials. It is a subject as old as civil society, yet one that still fuels debate. Now the many and varied aspects of that subject are brought together in the four-volume *Crime and Punishment around the World*. This unprecedented work provides descriptions of crimes—and the justice systems that define and punish them—in more than 200 nations, principalities, and dependencies. Each chapter examines the historical, political, and cultural background, as well as the basic organization of the subject state's legal and criminal justice system. It also reports on the types and levels of crime, the processes leading to the finding of guilt, the rights of the accused, alternatives to going to trial, how suspects are prosecuted for their crimes, and the techniques and conditions of typical punishments employed. Comprising a study that is at once extraordinarily comprehensive and minutely detailed, the essays collected here showcase the variety and the universality of crime and punishment the world over.

crime statistics in zimbabwe: Handbook of Research on Urban Governance and Management in the Developing World Mugambwa, Joshua, Katusiimeh, Mesharch W., 2018-05-09 With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The *Handbook of Research on Urban Governance and Management in the Developing World* is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations.

crime statistics in zimbabwe: June 2000 Prison Population Census Report , 2001

crime statistics in zimbabwe: *Pan-African Issues in Crime and Justice* Biko Agozino, 2017-07-05 Criminology is an established discipline, yet non-Western criminology is still relatively ignored in the literature. Drawing upon materials from countries in Africa, the Caribbean, North and South America, and Europe, this stimulating book reflects on the experiences of people of African descent to offer a convergence of criminologies in and outside the West.

crime statistics in zimbabwe: *Contagion and Chaos* Andrew T. Price-Smith, 2008-12-05 An analysis of infectious disease as a threat to national security that examines the destabilizing effects of the 1918 Spanish Flu pandemic, HIV/AIDS in sub-Saharan Africa, SARS, and Mad Cow Disease. Historians from Thucydides to William McNeill have pointed to the connections between disease and civil society. Political scientists have investigated the relationship of public health to governance, introducing the concept of health security. In *Contagion and Chaos*, Andrew Price-Smith offers the most comprehensive examination yet of disease through the lens of national security. Extending the analysis presented in his earlier book *The Health of Nations*, Price-Smith argues that epidemic disease represents a direct threat to the power of a state, eroding prosperity and destabilizing both its internal politics and its relationships with other states. He contends that the danger of an infectious pathogen to national security depends on lethality, transmissability, fear, and economic damage. Moreover, warfare and ecological change contribute to the spread of disease and act as “disease amplifiers.” Price-Smith presents a series of case studies to illustrate his argument: the Spanish influenza pandemic of 1918-19 (about which he advances the controversial claim that the epidemic contributed to the defeat of Germany and Austria); HIV/AIDS in sub-Saharan Africa (he contrasts the worst-case scenario of Zimbabwe with the more stable Botswana); bovine spongiform encephalopathy (also known as mad cow disease); and the SARS contagion of 2002-03. Emerging infectious disease continues to present a threat to national and international security, Price-Smith argues, and globalization and ecological change only accelerate the danger.

crime statistics in zimbabwe: *Heritage Crime* Louise Grove, Suzie Thomas, 2014-10-06

Bringing together leading academics and practitioners from across the globe, this unique collection explores the emerging field of heritage crime studies. Moving beyond the traditional focus on illicit antiquities, the volume identifies the diversity of crimes that affect heritage and outlines various approaches to prevention.

crime statistics in zimbabwe: The World of Crime Jan Van Dijk, 2007-12-21 This book is important for students who want to put domestic crime and justice issues and criminological theories in an international perspective....It is more than likely that this book will also interest all those who are professionally or privately interested in issues of crime, corruption, terrorism, law enforcement, criminal justice and sustainable development. —Johnson Thomas, BUSINESS INDIA In today's interdependent world, governments must become more transparent about their crime and justice problems. *The World of Crime: Breaking the Silence on Problems of Security, Justice and Development Across the World* seeks to break the conspiracy of silence regarding statistical information on these sensitive issues. It subsequently analyzes the macro causes of crime such as rapid urbanization, economic inequality, gender discrimination, abuse of alcohol, and drugs and availability of guns. Furthermore, the book analyzes the impact of crime on individuals and societies. Using a wealth of statistical information, the author underlines the need of greater international efforts to tackle transnational problems of crime. Key Features Presents 13 chapters, which are organized in 4 main parts, that cover measurement challenges, common crimes, emerging global crimes, criminal justice, and international perspectives on crime and justice Contains statistical data taken from 2005 International Crime Victim Surveys Includes high quality figures such as scatter plots, graphs, and maps Features summary reviews and figure footnotes at the ends of each chapter Intended Audience: The book is intended as a supplementary text for introduction to criminology, criminal justice, and comparative justice courses and is also appropriate for those professionally interested in security, criminal justice and development.

crime statistics in zimbabwe: Prison Population Census Report, 2000

crime statistics in zimbabwe: Comparative Economics in a Transforming World Economy, third edition J. Barkley Rosser, Jr., Marina V. Rosser, 2018-01-26 An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements, with updated country case studies. Comparative economics, with its traditional dichotomies of socialism versus capitalism, private versus state, and planning versus market, is changing. This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field. This new edition examines a wide variety of institutional and systemic arrangements, many of which reflect deep roots in countries' cultures and histories. The book has been updated and revised throughout, with new material in both the historical overview and the country case studies. It offers a broad survey of economic systems, then looks separately at market capitalism, Marxism and socialism, and "new traditional economies" (with an emphasis on the role of religions, Islam in particular, in economic systems). It presents case studies of advanced capitalist nations, including the United States, Japan, Sweden, and Germany; alternative paths in the transition from socialist to market economies taken by such countries as Russia, the former Soviet republics, Poland, China, and the two Koreas; and developing countries, including India, Iran, South Africa, Mexico, and Brazil. The new chapters on Brazil and South Africa complete the book's coverage of all five BRICS nations; the chapter on South Africa extends the book's comparative treatment to another continent. The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues. Each chapter ends with discussion questions.

crime statistics in zimbabwe: The Politics of Everyday Crime in Africa Danielle C. Kushner, 2018-12-12 This book offers distinct insights into the sources of state legitimacy in Africa by incorporating an analysis of non-state actors' role in service delivery. The author examines how citizens' reliance on non-governmental security actors such as street committees, neighborhood watches and community police forums, shape their attitudes toward the state and their political

participation. Broadly, this project contributes to our understanding of citizens' everyday experiences of crime and violence at the local level, and why they matter, politically.

crime statistics in zimbabwe: A Guided Reader to Research in Comparative

Criminology/criminal Justice John Winterdyk, 2009 With this publication the editors offer the first comprehensive text designed to assist, facilitate and guide interested researchers in how to engage in comparative criminological/criminal justice research. The editors have collected a series of nine articles which serve to illustrate examples to facilitate the reader in how to conduct such research. Each of the articles is accompanied with a series of questions and useful web-links to further assist the reader and/or student.

crime statistics in zimbabwe: Shona Women in Zimbabwe--A Purchased People? John

Chitakure, 2016-09-29 The position and treatment of women in every religion, culture, and society have been subjects of concern for a long time. In every society, women fight for their emancipation from exploitive and oppressive patriarchal structures. The most contentious issues include domestic violence, gender discrimination and inequality in the areas of employment, leadership, and marriage. Domestic violence tops the list and is the worst enemy of any progressive and democratic society. It dehumanizes, disfigures, and demeans its victims and survivors. *Shona Women in Zimbabwe--a Purchased People* explores the causes of domestic violence--the cultural practice of bridewealth, in particular--and assesses the extent to which it contributes to the proliferation of domestic violence among the Shona people of Zimbabwe. It then explores the Christian traditions, particularly, the Roman Catholic Church, in search of resources that can be used to emancipate Shona women from patriarchal subjugation. Finally, the book offers a pastoral response that is informed by the experiences of the Shona women, their cultural resources, and the Roman Catholic religious tradition.

crime statistics in zimbabwe: Femicide in War and Peace Shalva Weil, 2023-05-22 This

book discusses the phenomenon of femicide—the killing of women globally because of their gender—in peacetime and in war. Femicide in war is different from femicide in peace, and yet the dividing line between the two is thin. Violence against women happens in many forms—from emotional, psychological, and financial abuse, and barriers to personal autonomy, to physical and sexual abuse terminating in murder. It includes infanticide, sex selection, misogynistic laws and cultural practices and can include genital mutilation, forced sterilization, or forced pregnancy. Women experience these forms of violence during peacetime, as well as in times of crisis, conflict, or national insecurity. The Covid-19 pandemic led to an increase in violence against women, as they were thrown back to their violent partners, who were released from jail because of the global plague. This volume draws upon cases from both Global North and Global South to give a detailed view of crimes against women and how femicide is perceived in different countries. It brings together scholars from diverse countries and disciplines and from many parts of the world where femicide has never or rarely been reported. This book will be a beneficial read for advanced students and researchers of Gender Studies, War and Conflict Studies, and Terrorism. It was originally published in *Peace Review*.

crime statistics in zimbabwe: FCS Criminology L2 Gerhard Swanepoel, 2008

crime statistics in zimbabwe: Crime and Policing in Post-Apartheid South Africa Mark Shaw,

2002-06-13 [A] cogent and well-informed discussion of the South African Police Service and the organisational problems it faces. —Stephen Ellis Since the mid-1990s, South Africa has experienced a crime wave of such unprecedented proportions that the ability of the new democracy to form a stable civil society and govern effectively has been called into question. In this timely book, Mark Shaw describes how a police force that was so effective under apartheid became so ineffectual in the face of rising crime. He shows how an increase in violent crime shapes society, police, and government, and discusses possible solutions for the current crisis. International crimes such as war, terrorism, and organized crime are explored along with crimes that affect individual security, such as armed robbery, murder, and rape. *Crime and Policing in Post-Apartheid South Africa* draws attention to both the national and the international dimensions of crime in this society in transition.

crime statistics in zimbabwe: Global Report on Crime and Justice Graeme R. Newman, 1999 Research and data gathered by the UN Centre for International Crime Prevention. The work combines a wealth of information about crime and justice from UN member states and beyond, and presents emerging crime trends and operations of criminal justice systems on a comparative basis.

crime statistics in zimbabwe: Open Science in Africa Katie Wilson, Rania Mohamed Hassan Baleela, Heila Pienaar, Martie Van Deventer, Dale Peters, 2023-08-30 There is an ongoing transition in the research enterprise towards Open Science (OS), increasing transparency in researchers' collaboration, knowledge exchange, and how science is organized. The Open Access (OA) movement can be seen as a case study of the challenges that this transition can present. For example, despite all the advantages of OA and the fact that the concept is exceptionally strong as a principle, it is yet to be implemented across all institutions, particularly in Africa. Even though research productivity from the African continent has increased over the last two decades, the global north still dominates the scholarly communication and publication sphere. High article processing charges (APCs) can make it difficult for some African researchers to publish in highly rated- and respected academic journals, which are critical to their career advancement. Fee waivers and discounts are available but eligibility and percentages vary by publisher and predatory publishing presents a challenge to African researchers. In addition, the exclusion of many African publication sources from the major bibliographic databases such as Scopus and the Web of Science skews and limits bibliometric analysis and influences the outcomes of world university rankings. This Research Topic aims to investigate the transition to OS in the African continent. This will include researchers' and other stakeholders' (support services, policy makers) concerns regarding OS as well as the advantages it offers them. Moreover, the role of new technologies is also of interest in the implementation of OA as it is the knowledge divide between different countries and regions. It is also crucial to address what needs to change in the research enterprise to make OS a worthwhile venture/practice for most researchers and research role-players and how they can cope with the contradictory challenges.

crime statistics in zimbabwe: Crime and Punishment Philip Steele, 2003 Moral Dilemmas is a series that presents balanced and thought-provoking views on some of today's most topical and controversial issues. Background information and up-to-date case studies are discussed in a sensitive and factual way, supported by photography and relevant quotes to highlight key points. Crime and Punishment looks at how criminal justice systems operate and change in Britain and elsewhere, and at the origins of these systems, from the early Body of Civil Law drawn up by the Roman Emperor Justinian I to the American Bill of Rights. It explores some of the psychological and social causes of criminal behaviour and the role of the law in preventing and punishing crime and raises questions about law and order in dictatorships and democracies.
