Overview of Crime Rates in Bangladesh

Crime statistics in Bangladesh reveal the country's ongoing struggle with maintaining law and order amid rapid population growth and urban development. National crime data, collected from police reports and government agencies, indicate fluctuations in crime rates over recent years. While some crime categories have seen a decline due to improved policing strategies, others have risen, reflecting socioeconomic challenges. The overall crime rate per 100,000 people serves as a key indicator to measure safety and security levels across the country.

Trends in Crime Rates

Recent statistics show that violent crimes, including homicide and assault, have experienced moderate decreases, whereas property crimes such as theft and burglary remain prevalent. Cybercrime has emerged as a significant threat, with increasing cases of online fraud and identity theft reported. The government's focus on digitization and internet penetration has inadvertently contributed to this rise. Monitoring these trends is critical for developing targeted crime prevention policies.

Comparative Analysis with Neighboring Countries

When comparing Bangladesh's crime rates with those of neighboring countries such as India and Myanmar, it is evident that some crime categories are relatively lower, while others pose greater challenges. For example, drug-related offenses and human trafficking have distinct patterns influenced by geographic proximity and border dynamics. Understanding these regional differences helps contextualize Bangladesh's crime situation in a broader South Asian framework.

Types of Crimes Reported

Crime statistics in Bangladesh categorize offenses into several major types, each reflecting different societal issues and law enforcement challenges. Common crime categories include violent crimes, property crimes, cyber offenses, drug-related crimes, and corruption. Detailed analysis of these crime types provides insights into prevalent criminal activities and emerging threats.

Violent Crimes

Violent crimes encompass offenses such as murder, assault, robbery with violence, and domestic violence. Although the overall violent crime rate has shown a slight decline, certain areas report higher incidences due to local conflicts or socio-political unrest. Domestic violence cases have gained increased attention, with advocacy groups pushing for better legal protection and support for victims.

Property Crimes

Property crimes, including theft, burglary, and vehicle-related offenses, constitute a significant portion of reported crimes. Economic hardship and urban congestion contribute to the persistence of these offenses. Law enforcement agencies often prioritize property crime investigations to reduce public fear and financial losses.

Cybercrime

With the expansion of internet access, cybercrime has become a growing concern in Bangladesh. Crimes such as online scams, hacking, data breaches, and digital harassment are increasingly reported. The government has introduced specialized cyber units to combat these offenses and raise public awareness about digital security.

Drug-Related Crimes

Drug trafficking and substance abuse-related offenses continue to challenge law enforcement in Bangladesh. The country's location along drug trafficking routes contributes to the prevalence of narcotics-related crimes. Efforts to control drug distribution and provide rehabilitation support are ongoing priorities.

Corruption and White-Collar Crimes

Corruption, bribery, and other white-collar crimes affect governance and economic development. Anti-corruption bodies actively monitor and prosecute such offenses, although challenges remain in ensuring transparency and accountability across institutions.

Regional Crime Distribution

Crime statistics in Bangladesh show significant regional variations, reflecting economic disparities, population density, and local governance effectiveness. Urban centers like Dhaka and Chittagong experience higher crime rates compared to rural areas, primarily due to higher population concentrations and economic activity.

Urban vs. Rural Crime Patterns

Urban areas report more property crimes, cyber offenses, and violent incidents linked to social tensions. In contrast, rural regions tend to have fewer reported crimes but face issues such as land disputes and localized violence. Understanding these differences is essential for allocating law enforcement resources effectively.

High-Crime Districts

Certain districts consistently report elevated crime levels due to factors like poverty, unemployment, and inadequate policing. Identifying these hotspots allows authorities to implement targeted interventions and community policing initiatives tailored to local needs.

Factors Influencing Crime Rates

Multiple social, economic, and environmental factors influence crime statistics in Bangladesh. Analyzing these determinants helps explain the causes behind crime trends and supports the development of preventive strategies.

Socioeconomic Conditions

Poverty, unemployment, and lack of education are strongly correlated with higher crime rates. Economic deprivation often drives individuals toward criminal activities as a means of survival or protest. Addressing these root causes is critical for long-term crime reduction.

Population Growth and Urbanization

Rapid urbanization increases the risk of crime by creating densely populated neighborhoods with limited social cohesion and strained public services. Overcrowding and inadequate infrastructure contribute to higher incidences of theft, assault, and other offenses.

Cultural and Social Factors

Traditional social structures, gender roles, and community norms also impact crime patterns. Issues such as domestic violence and honor-based crimes reflect complex cultural dynamics that require sensitive and informed policy responses.

Law Enforcement and Crime Prevention

Effective law enforcement plays a critical role in interpreting and responding to crime statistics in Bangladesh. The government, police agencies, and civil society collaborate to enhance public safety through various initiatives.

Police and Judicial System

The Bangladesh Police is responsible for crime investigation, prevention, and maintaining public order. Improvements in training, technology adoption, and community policing have contributed to better crime management. The judiciary works alongside law enforcement to ensure fair trials and uphold legal standards.

Government Initiatives and Policies

Various government programs focus on crime prevention through social development, public awareness campaigns, and legal reforms. Anti-corruption measures, cybercrime units, and drug control policies demonstrate a multi-faceted approach to combating crime.

Community and NGO Involvement

Non-governmental organizations and community groups actively participate in crime prevention efforts by providing victim support, advocating for legal reforms, and promoting education. Their involvement enhances the overall effectiveness of crime reduction strategies.

1. Crime rates fluctuate due to multiple factors including socioeconomic conditions and urbanization.
2. Violent crimes, property crimes, cybercrime, drug offenses, and corruption are the primary crime categories in Bangladesh.
3. Urban areas, especially Dhaka and Chittagong, report higher crime rates than rural regions.
4. Socioeconomic deprivation and rapid urban growth significantly contribute to elevated crime levels.
5. Law enforcement agencies and government policies continue evolving to address emerging crime challenges.

crime statistics in bangladesh: Routledge Handbook of South Asian Criminology K. Jaishankar, 2019-08-01 Although the literature and cultural practices of the South Asian region demonstrate a rich understanding of criminology, this handbook is the first to focus on crime, criminal justice, and victimization in Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka. South Asia's rapid growth in population and economy continues to introduce transformations in social behaviors, including those related to criminality and victimization. Readers of this handbook will gain a comprehensive look at criminology, criminal justice, and victimology in the South Asian region, including processes, historical perspectives, politics, policies, and victimization. This collection of chapters penned by scholars from all eight of the South Asian nations, as well as the US, UK, Australia, and Belgium, will advance the study and practice of criminology in the South Asian region and carry implications for other regions. The Routledge Handbook of South Asian Criminology provides a wealth of information on criminological issues and their effect on the countries and governments' efforts to mitigate them. It is essential reading for students and scholars of South Asian criminology, criminal justice, and politics.

crime statistics in bangladesh: Organized Crime and Corruption Across Borders T. Wing Lo, Dina Siegel, Sharon Kwok, 2019-09-10 This book explores China's Belt and Road Initiative and the criminogenic potential for economic, financial, and socio-cultural cooperation across countries,

where some are known for weak law enforcement and high levels of corruption. It examines whether these flows of capital are increasing the amount of organized crime in the newly linked regions and how law enforcement agencies are responding. Bringing together experts across the Global South and Europe, this book considers transnational organized crime and corruption across One Belt One Road (OBOR). It examines crime and corruption in China and its international United Front tactic; analyzes various forms of transnational organized crime such as trafficking of illegal drugs, looted antiquities, and wildlife and counterfeit products; and presents studies on corruption and organized crime in selected OBOR countries including Russia, Kazakhstan, Lithuania, Czech Republic, Poland, and Bangladesh. This book makes a significant contribution to the development of southern criminology and will also be of interest to those engaged with transnational organized crime, political economy, international relations, and Asian and Chinese studies.

crime statistics in bangladesh: Crime and Punishment around the World Graeme R. Newman, 2010-10-19 This comprehensive, detailed account explores crime and punishment throughout the world through the eyes of leading experts, local authors and scholars, and government officials. It is a subject as old as civil society, yet one that still fuels debate. Now the many and varied aspects of that subject are brought together in the four-volume Crime and Punishment around the World. This unprecedented work provides descriptions of crimes—and the justice systems that define and punish them—in more than 200 nations, principalities, and dependencies. Each chapter examines the historical, political, and cultural background, as well as the basic organization of the subject state's legal and criminal justice system. It also reports on the types and levels of crime, the processes leading to the finding of guilt, the rights of the accused, alternatives to going to trial, how suspects are prosecuted for their crimes, and the techniques and conditions of typical punishments employed. Comprising a study that is at once extraordinarily comprehensive and minutely detailed, the essays collected here showcase the variety and the universality of crime and punishment the world over.

crime statistics in bangladesh: The Gangs of Bangladesh Sally Atkinson-Sheppard, 2019-08-28 This book presents a study of street children's involvement as workers in Bangladeshi organised crime groups based on a three-year ethnographic study in Dhaka. The book argues that 'mastaans' are Bangladeshi mafia groups that operate in a market for crime, violence and social protection. It considers the crimes mastaans commit, the ways they divide labour, and how and why street children become involved in these groups. The book explores how street children are hired by 'mastaans', to carry weapons, sell drugs, collect extortion money, commit political violence and conduct contract killings. The book argues that these young people are neither victims nor offenders; they are instead 'illicit child labourers', doing what they can to survive on the streets. This book adds to the emerging fields of the sociology of crime and deviance in South Asia and 'Southern criminology'.

crime statistics in bangladesh: The International Crimes Tribunal in Bangladesh Miriam Beringmeier, 2018-07-16 The International Crimes Tribunal in Bangladesh was established in 2010 with the aim of bringing to trial perpetrators of crimes committed during the Liberation War in 1971, through which the country seceded from Pakistan. The International Crimes Tribunal is a domestic tribunal based on the International Crimes Tribunals Act from 1973 and the rules of procedure enacted by the Tribunal itself. The initiation of these trials almost 40 years after the war entails several challenges. The publication examines to what extent the Tribunal's legal framework as well as its jurisprudence comply with international standards as established in international treaties, customary international law and in the jurisprudence of international criminal law. To this end, the substantive law and its interpretation as well as the procedural standards applied at these trials are examined thoroughly. At the same time, the analysis takes into account the political environment surrounding the Tribunal's work and assesses its impact on the country's process of coming to terms with the past.--

crime statistics in bangladesh: Rethinking Development in South Asia Farid Uddin

Ahamed, M. Saiful Islam, Amir Mohammad Nasrullah, 2022-03-17 This book challenges the way development has been conceptualized and practiced in South Asian context, and argues for its deconstruction in a way that would allow freedom, choice and greater well-being for the local people. Far from taking development for granted as growth and advancement, this book unveils how development could also be a destructive force to local socio-cultural and environmental contexts. With a critical examination of such conventional development practices as hegemonic, patriarchal, devastating and failure, it highlights how the rethinking of development could be seen as a matter of practice by incorporating people's interest, priorities and participation. The book theoretically challenges the conventional notion of hegemonic development and proposes alternative means, and, practically, provides nuances of ethnographic knowledge which will be of great interest to policy planners, development practitioners, educationists and anyone interested in knowing more about how people think about their own development.

crime statistics in bangladesh: Researching Cybercrimes Anita Lavorgna, Thomas J. Holt, 2021-07-29 This edited book promotes and facilitates cybercrime research by providing a cutting-edge collection of perspectives on the critical usage of online data across platforms, as well as the implementation of both traditional and innovative analysis methods. The accessibility, variety and wealth of data available online presents substantial opportunities for researchers from different disciplines to study cybercrimes and, more generally, human behavior in cyberspace. The unique and dynamic characteristics of cyberspace often demand cross-disciplinary and cross-national research endeavors, but disciplinary, cultural and legal differences can hinder the ability of researchers to collaborate. This work also provides a review of the ethics associated with the use of online data sources across the globe. The authors are drawn from multiple disciplines and nations, providing unique insights into the value and challenges evident in online data use for cybercrime scholarship. It is a key text for researchers at the upper undergraduate level and above.

crime statistics in bangladesh: Cyber law in Bangladesh Mohammad Ershadul Karim, 2020-03-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law the law affecting information and communication technology (ICT) in Bangladesh covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Bangladesh will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

crime statistics in bangladesh: *Intelligence Services in South Asia* Ryan Shaffer, ASM Ali Ashraf, 2025-02-18 This book explores colonial and post-colonial intelligence services in South Asia. It traces the genealogy of the institutions to analyze changes and continuities throughout the region. The volume also provides a framework for analyzing how intelligence services developed in these countries by looking at both internal and external issues, and shows how vital and sometimes interconnected these issues are for understanding intelligence in South Asia. It demonstrates how some countries and intelligence services borrowed from the colonial era and others started new

institutions to protect national security in response to the shifting demands of the Cold War and post-Cold War era. Bringing together a group of international scholars, the anthology delves into the intelligence services of Afghanistan, Bangladesh, Bhutan, India, the Maldives, Myanmar, Nepal, Pakistan and Sri Lanka and traces how these national services developed in similar and diverse ways. This book will be of much interest to students of intelligence studies, Asian politics, security studies and International Relations.

crime statistics in bangladesh: Dhaka Megacity Ashraf Dewan, Robert Corner, 2013-09-09
The book Dhaka Megacity: Geospatial Perspectives on Urbanisation, Environment and Health presents the use of geospatial techniques to address a number of environmental issues, including land use change, climatic variability, urban sprawl, population density modelling, flooding, environmental health, water quality, energy resources, urban growth modelling, infectious diseases and the quality of life. Although the work is focused on the Megacity of Dhaka in Bangladesh, the techniques and methods that are used to research these issues can be utilized in any other areas where rapid population growth coupled with unplanned urbanization is leading to environmental degradation. The book is useful for people working in the area of Geospatial Science, Urban Geography, Environmental Management and International Development. Since the chapters in the book cover a range of environmental issues, this book describes useful tools for assisting informed decision making, particularly in developing countries.

crime statistics in bangladesh: Nation and Its Modes of Oppressions in South Asia Sajal Nag, 2022-12-30 This volume examines nationhood as a concept and how it became the basis of political discourse in South Asia. It studies the emergence of nationalism in modern states as a powerful, omnipotent, and omnipresent form of political identity in the nineteenth and twentieth centuries. This book examines the idea of a nation, as it originated in medieval Europe, as an unending process of 'othering' individuals, groups, and communities to establish its hegemony, exclusivity, and absolute power within a political discourse. It sheds light on how these new political frameworks in the name of nationalism resulted in conflicts and bloodshed. It unleashed politics of retribution and facilitated majoritarianism, minority persecution, and collective authoritarianism which devastated individuals and collectivities. Further, the author also discusses various prominent ideas and contemporary theories on nationalism alongside pivotal socio-cultural factors which have significantly shaped the formation of modern nation states and their politics. Topical and nuanced, this book will be indispensable to researchers, scholars, and readers interested in nationalism, political science, modern history, political theory, political philosophy, political sociology, political history, post-colonial studies, and South Asia studies.

crime statistics in bangladesh: Women, Mobility and Incarceration Rimple Mehta, 2018-09-03 This book explores how Bangladeshi women from poor and undereducated/semi-educated backgrounds who have crossed the Indo-Bangladesh border find themselves in prisons serving sentences under the Foreigners Act, 1946. Drawing on original fieldwork, this book explores these women's understanding of borders and state sovereignty and how the women - from conservative rural and semi-rural backgrounds which impose a strict moral code - adjust to the socio-cultural context of an Indian prison, where being an inmate is dishonourable in their community. This book examines the implicit challenge in these women's action and decisions to these codes of honour, to accepted social norms of their religion and community, and ultimately, the dominantly patriarchal system that marks South Asian society. Further, it focuses on the negotiations that the Bangladeshi women make with the social and political borders they encounter in the process of crossing the Indo-Bangladesh border without requisite documents needed by the state for entry into a foreign land; how they cope with the daily challenges of living during their imprisonment in a correctional home; and their feelings about their impending return to Bangladesh. Women who are apprehended and criminalised for crossing borders must negotiate with not only the normative understanding of borders which is inherently masculine in nature, but also the gender biased lens through which female mobility is viewed: therefore, they not only cross political borders but also social borders. This book maps the

associations between women's experiences of mobility and incarceration, and their linkages with social and political borders and the fraught experiences of being in a 'foreign' territorial space. It will be important reading for criminologists, sociologists, and those engaged in penology, women's studies and migration studies.

crime statistics in bangladesh: Poverty, Gender and Health in the Slums of Bangladesh

Sabina Faiz Rashid, 2024-04-24 Poverty, Gender and Health in the Slums of Bangladesh provides comprehensive ethnographic accounts that depict the daily life experiences and health hardships encountered by young women and their families living in the slums of Dhaka city and the injustices they face. The analysis focuses on two specific historical eras: 2002-2003 and 2020-2022 and shows that despite recent improvements in employment opportunities and greater mobility for young women, their lives reflect ongoing challenges reminiscent of those faced two decades earlier. While national and global organizations acknowledge the nation's economic and social progress, those on the outskirts of society continue to grapple with enduring poverty. They are excluded from the advantages of economic growth, oppressed by unjust local, national, and global systems, discriminatory laws, and policies. Their struggles go unnoticed as they confront a slew of challenges, including slum evictions, enforced lockdowns, income losses, food insecurity, and ongoing crises related to health, injuries, fatalities, and exploitation and harassment by law enforcement and influential individuals within the slum and the city. After two decades, these obstacles persist, and life remains tenuous, with health severely compromised. This book will appeal to students, academics, and researchers in the fields of Public Health, Medical Anthropology, Gender Studies, Urban Studies, Development Studies, Social Sciences, as well as professionals engaged in urban health and poverty-related work.

crime statistics in bangladesh: The New Punitiveness John Pratt, David Brown, Mark

Brown, Simon Hallsworth, Wayne Morrison, 2013-06-17 Throughout much of the western world more and more people are being sent to prison, one of a number of changes inspired by a 'new punitiveness' in penal and political affairs. This book seeks to understand these developments, bringing together leading authorities in the field to provide a wide-ranging analysis of new penal trends, compare the development of differing patterns of punishment across different types of societies, and to provide a range of theoretical analyses and commentaries to help understand their significance. As well as increases in imprisonment this book is also concerned to address a number of other aspects of 'the new punitiveness': firstly, the return of a number of forms of punishment previously thought extinct or inappropriate, such as the return of shaming punishments and chain gangs (in parts of the USA); and secondly, the increasing public involvement in penal affairs and penal development, for example in relation to length of sentences and the California Three Strikes Law, and a growing accreditation of the rights of victims. The book will be essential reading for students seeking to understand trends and theories of punishment on law, criminology, penology and other courses.
