Smith, Shaun Fanning, 2017-11-06 Give your kids their greatest chance at success *Who Do You Think You Are?* helps parents, school counselors, and administrators get teens thinking about—and interested in—their future careers. Success in college and beyond relies on thorough prior preparation; by identifying interests and passions early on, young people are better able to plan for the career they want by mapping out the academic path to support it. This book shows you how to guide teens along on this journey, and how to stick with them until they reach the goals they've set. From helping them discover just what it is they're interested in, to finding the institution that will help them flourish and setting out a clear plan of attack, this book provides invaluable insight from an expert in student success. No one expects every student to have a definitive life plan by high school graduation, but having some idea of direction is critical. Nearly 3.3 million students will graduate high school this year, and most will head straight to college—but just 20 percent of those who pursue an associate's degree complete within four years, and only 60 percent of those who pursue a bachelor's degree complete within six years. Even those who earn a degree may struggle to move from school to work. Those who do succeed have done so because they've planned their work and worked their plans. This book shows you how to help your child to be one of the success stories. Map out an academic plan to support each kid's field of interest Identify the best-fit institution to get them where they want to be Balance support and independence throughout your teen's journey Help your child be prepared for college so they can succeed far beyond Adults know that success in life comes from plenty of hard work and thorough preparation—but for kids in middle and high school, that lesson is just now beginning to hit home. *Who Do You Think You Are?* helps you guide them through the transition successfully, so they can come out the other side exactly where they want to be.

crucial conversations training certification: **Women of Color and Hair Bias in the Work Environment** Francis, Kula A., Clarke, Anna M., 2023-11-09 Professional women of color identify with various natural, Black hairstyles including braids, dread locs, twists, and other natural coiled styles. Black women who work in professional settings have historically encountered negative stares, remarks, and biases. They tend to be stereotyped on their level of professionalism and competency if they choose not to conform to mainstream hairstyles. Women wearing Black hairstyles are often perceived as less beautiful and less professional than those who wear Eurocentric hairstyles. Professional Black women are often challenged in these situations where they must decide how to manage their identity in the work environment. Too often, professional Black women apply and interview for positions where their natural hairstyle becomes the topic of interest. If given the opportunity for employment, subtle references may be made about their hairstyles, which suggests such hairstyles are not in alignment with the professional climate of an organization. This type of pressure makes Black women feel forced to conform to Eurocentric hairstyles. These expectations lead to feelings of social inadequacy, hurt, and discouragement of individuals in their workplace. The apprehensions with hair acceptance are even more concerning, when considering that the notion of straight groomed hair has been largely expected not only by Whites, but also by many people of color as well. *Women of Color and Hair Bias in the Work Environment* explores the experiences of

professional women of color who have had encountered feelings of uncertainty, self-consciousness, or differing treatment, and/or discrimination because of their natural hairstyle choices. The intent is to shine a light on the challenges professional women of color face and how these experiences impact their hiring and/or work environment. Covering topics such as hairstyle empowerment, ethics of hair bias, and diversity of hair, this book serves as an invaluable resource for educators, social workers, psychologists, organizational leadership, business professionals, and more. This book also allows women to be encouraged by stories of professional women who have overcome the societal burdens placed on natural hair.
