crown heights crime statistics: Preserving Neighborhoods Aaron Passell, 2021-01-19

Historic preservation is typically regarded as an elitist practice. In this view, designating a neighborhood as historic is a project by and for affluent residents concerned with aesthetics, not affordability. It leads to gentrification and rising property values for wealthy homeowners, while displacement afflicts longer-term, lower-income residents of the neighborhood, often people of color. Through rich case studies of Baltimore and Brooklyn, Aaron Passell complicates this story, exploring how community activists and local governments use historic preservation to accelerate or slow down neighborhood change. He argues that this form of regulation is one of the few remaining urban policy interventions that enable communities to exercise some control over the changing built environments of their neighborhoods. In Baltimore, it is part of a primarily top-down strategy for channeling investment into historic neighborhoods, many of them plagued by vacancy and abandonment. In central Brooklyn, neighborhood groups have discovered the utility of landmark district designation as they seek to mitigate rapid change with whatever legal tools they can. The contrast between Baltimore and Brooklyn reveals that the relationship between historic preservation and neighborhood change varies not only from city to city, but even from neighborhood to neighborhood. In speaking with local activists, Passell finds that historic district designation and enforcement efforts can be a part of neighborhood community building and bottom-up revitalization. Featuring compelling narrative interviews alongside quantitative data, *Preserving Neighborhoods* is a nuanced mixed-methods study of an important local-level urban policy and its surprisingly varied consequences.

crown heights crime statistics: Racial Inequality in New York City since 1965 Benjamin P. Bowser, Chelli Devadutt, 2019-09-01 A comprehensive exploration of racial inequality in New York City since 1965. In the past, the study of racial inequality in New York City has usually had a narrow focus, examining particular social problems affecting ethnic-racial groups. In contrast, this book provides a comprehensive overview of racial inequality in the city's economy, housing, and education sectors over the last half-century. A collection of original essays by some of New York's most well-known and emerging urban experts, *Racial Inequality in New York City since 1965* explores what city government has done and failed to do to address racial inequality. It examines the changes in circumstances of Asian, Latino, West Indian, and African American New Yorkers, outlining how theirs have either improved or deteriorated relative to their white counterparts. The contributors also analyze how practices and policies in policing, public housing, public health, and community services have maintained racial inequality and discuss how political participation can increase social capital among city residents in order to reduce racial inequality. The book concludes

by offering a compendium of practical recommendations and actions that can be implemented to address racial inequality in the city. "This book provides a broad and up-to-date survey of social and demographic trends in New York City. Unlike many other works, it crosses policy arenas and is not shy in advocating community action." — J. Phillip Thompson, New York City Deputy Mayor for Strategic Policy Initiatives
