crow wing historical society: The Spirit Lake Massacre Thomas Teakle, 2022-09-16 In 'The Spirit Lake Massacre,' Thomas Teakle delves into the poignant historical account of a harrowing event in 19th-century American frontier history. Weaving through the narrative with a meticulous eye for detail, Teakle captures not only the chronological unfolding of the event but also the emotional and cultural repercussions that it held for the people associated with Lake Okoboji and Spirit Lake in Iowa. Teakle's literary craftsmanship situates his work within the canon of historical narratives by blending archival rigor with a compelling prose style. He encapsulates the broader historical context of settler-native conflicts within the microcosm of this tragic incident, making it an essential read for understanding the complex dynamics of the American frontier era. Thomas Teakle brings to 'The Spirit Lake Massacre' a profound understanding, undoubtedly influenced by his personal connection to the region and its history. His scholarship perhaps springs from a deep-seated need to explore and elucidate regional histories that echo larger national narratives. crow wing historical society: Peter of the Prairies Dale Gibson, Sandra Mosher Anderson, 2025-02-21 It is as a diarist that Peter Garrioch (1811-1888), teacher, free trader, trail-blazer, contrarian, smuggler, missionary, farmer, community leader, politician, postmaster, and justice of

the peace, has taken his place in the history of Rupert's Land and Western Canada. From 1837 to 1847, Peter kept a sporadic personal journal, setting down in a distinctive, often humorous, sometimes angry, voice, both his own activities and the momentous, picayune, comic, tragic, or everyday events of the frontier life he observed around him as he developed into a leader of the Metis opposition to the Hudson's Bay Company's trading practices. Based on the unpublished typescript and notes of the diarist's nephew, George Henry Gunn (1865 - 1945), the editors have added explanatory notes, appendices, and historical context to their publication of Peter's vivid diary account.

crow wing historical society: *The "Good War" in American Memory* John Bodnar, 2010-10-01 The "Good War" in American Memory dispels the long-held myth that Americans forged an agreement on why they had to fight in World War II. John Bodnar's sociocultural examination of the vast public debate that took place in the United States over the war's meaning reveals that the idea of the good war was highly contested. Bodnar's comprehensive study of the disagreements that marked the American remembrance of World War II in the six decades following its end draws on an array of sources: fiction and nonfiction, movies, theater, and public monuments. He identifies alternative strands of memory—tragic and brutal versus heroic and virtuous—and reconstructs controversies involving veterans, minorities, and memorials. In building this narrative, Bodnar shows how the idealism of President Franklin Roosevelt's Four Freedoms was lost in the public commemoration of World War II, how the war's memory became intertwined in the larger discussion over American national identity, and how it only came to be known as the good war many years after its conclusion.

crow wing historical society: *Chief Bender's Burden* Tom Swift, 2008-01-01 The greatest American Indian baseball player of all time, Charles Albert Bender, was, according to a contemporary, the coolest pitcher in the game. Using a trademark delivery, an impressive assortment of pitches that may have included the game's first slider, and an apparently unflappable demeanor, he earned a reputation as baseball's great clutch pitcher during tight Deadball Era pennant races and in front of boisterous World Series crowds. More remarkably yet, Chief Bender's Hall of Fame career unfolded in the face of immeasurable prejudice. This skillfully told and complete account of Bender's life is also a portrait of greatness of character maintained despite incredible pressure of how a celebrated man thrived while carrying an untold weight on his shoulders. With a journalist's eye for detail and a novelist's feel for storytelling, Tom Swift takes readers on Bender's improbable journey from his early years on the White Earth Reservation, to his development at the Carlisle Indian School, to his big break and eventual rise to the pinnacle of baseball. The story of a paradoxical American sports hero, one who achieved a once-unfathomable celebrity while suffering the harsh injustices of a racially intolerant world, Chief Bender's Burden is an eye-opening and inspiring narrative of a unique American life.

crow wing historical society: *William W. Warren* Theresa M. Schenck, 2007-01-01 This is the first full-length biography of William W. Warren (1825-53), an Ojibwe interpreter, historian, and legislator in the Minnesota Territory. Devoted to the interests of the Ojibwe at a time of government attempts at removal, Warren lives on in his influential book *History of the Ojibway*, still the most widely read and cited source on the Ojibwe people. The son of a Yankee fur trader and an Ojibwe-French mother, Warren grew up in a frontier community of mixed cultures. Warren's loyalty to government Indian policies was challenged, but never his loyalty to the Ojibwe people. In his short life the issues with which he was concerned included land rights, treaties, Indian removal, mixed-blood politics, and state and federal Indian policy. Theresa M. Schenck has assembled a remarkable collection of newly discovered documents. Dozens of letters and other writings illuminate not only Warren's heart and mind but also a time of radical change in American Indian history. These documents, combined with Schenck's commentary, provide historical and contextual perspective on Warren's life, on the breadth of his activities, and on the complexity of the man himself; as such they offer a useful and long-awaited companion to Warren's *History of the Ojibway*.

crow wing historical society: *When Mortals Play God* John Erickson, 2022-09-15 American

history is full of examples of discrimination in all forms, but never before has the wreckage from America's infatuation with eugenics and its state-sanctioned policy of hate toward the mentally ill been put in such personal terms. In this extraordinary debut book, Pulitzer Prize winning journalist John Erickson answers the questions that have long haunted an immigrant family: Why was a mother in her early twenties imprisoned and then sterilized? What caused her three children to be taken from her and placed in an orphanage that later preyed on children? What led her oldest son to commit an unspeakable act of violence? And, finally, whatever happened to her youngest son who disappeared from her life and was never seen by the family again? This is a tragic story, yet strangely an uplifting one. Because just as officials believed immorality and mental illness were as genetically linked as eye and hair color, various family members would prove them wrong. In a story that will make you seethe with anger and well with tears, *When Mortals Play God* shows how valuable life is, and how grit and determination can sometimes relegate evil and injustice to a back seat.

crow wing historical society: *Jay Cooke's Gamble* M. John Lubetkin, 2014-04-23 In 1869, Jay Cooke, the brilliant but idiosyncratic American banker, decided to finance the Northern Pacific, a transcontinental railroad planned from Duluth, Minnesota, to Seattle. M. John Lubetkin tells how Cooke's gamble reignited war with the Sioux, rescued George Armstrong Custer from obscurity, created Yellowstone Park, pushed frontier settlement four hundred miles westward, and triggered the Panic of 1873. Staking his reputation and wealth on the Northern Pacific, Cooke was soon whipsawed by the railroad's mismanagement, questionable contracts, and construction problems. Financier J. P. Morgan undermined him, and the Crédit Mobilier scandal ended congressional support. When railroad surveyors and army escorts ignored Sioux chief Sitting Bull's warning not to enter the Yellowstone Valley, Indian attacks—combined with alcoholic commanders—led to embarrassing setbacks on the field, in the nation's press, and among investors. Lubetkin's suspenseful narrative describes events played out from Wall Street to the Yellowstone and vividly portrays the soldiers, engineers, businessmen, politicians, and Native Americans who tried to build or block the Northern Pacific.
