csi construction services inc: *Construction Graphics* Keith A. Bisharat, 2025-02-21 Learn how managers of the construction process use construction graphics to analyze, evaluate, and organize the labor, equipment, and materials required to fulfill the design professionals' instructions regarding a project. Construction drawings are, in their essence, a set of goals, the graphic and written instructions provided by architects and engineers to construction professionals that adequately manifest the outcomes sought for a project. Construction professionals translate those instructions into discreet processes and sequences of work, to which values—in both time and money—can be attributed. *Construction Graphics* has long stood as the essential treatment of this subject from the constructor's point of view. Now updated from the second edition, the third edition reflects advances in technology and project delivery systems and offers an analysis of how the ideas discussed throughout the text might be applied in the context of one system in a commercial building. *Construction Graphics* continues to be an indispensable volume for anyone managing construction work. Readers of the third edition of *Construction Graphics* will also find: Enhanced treatment of technology as it operates in construction project delivery and the relationship between design professionals and builders Exercises at the end of each chapter, with detailed answers in a helpful appendix Illustrations and figures throughout to emphasize key concepts *Construction Graphics* is ideal for students in construction management, construction engineering, architecture, architectural engineering, project management, and interior design programs in community college and four-year university programs.

csi construction services inc: *Thumbs Down* David Cauthen, 2011-01-14 The telephone's insistent ringing at three in the morning snatched Sam Workman from dreamless sleep. Hello, he mumbled. This is a warning, said a digitally altered voice. Leave Betterton now! If you don't, you won't live long enough to regret it. Who is this? Sam angrily demanded to a dead line. Unknown name, unknown number, blinked the call identifier. Coward! Workman growled and slammed down the receiver. The call was the first episode in a conspiracy to force Sam and his business, B&W Concrete, out of Betterton or destroy them. Followed were attempts to oust B&W from two construction projects, a hospital addition and an engine plant, totaling \$400 million in construction costs to yield B&W \$10 million profits. Sam retains attorney Penn Roman to stem the tide of disastrous actions drowning B&W in a flood of claims of incompetency and fraud and more threats and violence against Sam, Penn, and Penns family. When a testing lab employee working on the projects disappears, and the newspaper prints libelous articles condemning B&W, Penn and Sam find themselves entangled in a web of greed, deceit, violence, and murder. Courageously, they face the schemers in an explosive and telling trial to the finish.
