Permanent exhibits at the Fort Walton Science Center include detailed explorations of marine biology, physics, environmental science, and astronomy. These exhibits are carefully curated to provide comprehensive information supported by interactive components such as touch screens, models, and experiment stations.

Hands-On Learning Stations

Hands-on stations are a hallmark of the Fort Walton Science Center experience. These areas allow visitors to conduct simple experiments, engage with scientific equipment, and observe phenomena firsthand. Examples include physics demonstrations involving motion and energy, biology stations focusing on local ecosystems, and technology exhibits showcasing robotics and engineering principles.

Temporary and Traveling Exhibits

In addition to permanent installations, the science center regularly hosts temporary and traveling exhibits. These special displays introduce new themes and cutting-edge scientific topics, providing fresh content and encouraging repeat visits. Past exhibits have included space exploration, renewable energy technologies, and interactive art-science collaborations.

- Marine life and ecosystems
- Physics and motion experiments
- Environmental science and conservation
- Astronomical phenomena and space science
- Robotics and engineering challenges

Educational Programs and Workshops

Education forms the cornerstone of the Fort Walton Science Center's offerings. The center provides a variety of programs and workshops tailored to different age groups and educational levels, enriching school curricula and fostering independent scientific inquiry.

School Group Visits

The science center accommodates school groups with guided tours and curriculum-aligned activities. These visits are designed to complement classroom instruction, providing experiential learning opportunities that reinforce key scientific concepts through interactive engagement.

Summer Camps and After-School Programs

Seasonal summer camps and after-school programs at the Fort Walton Science Center offer in-depth exploration of specific scientific fields. These programs promote project-based learning, teamwork, and problem-solving skills in a fun and supportive environment.

Workshops for Educators and Families

The center also hosts workshops aimed at educators and families to enhance science teaching strategies and encourage home-based learning. These sessions cover topics such as inquiry-based science education, integrating technology in lessons, and conducting safe and effective experiments at home or school.

Special Events and Community Engagement

The Fort Walton Science Center actively engages with the local community through special events, outreach initiatives, and collaborative partnerships. These efforts extend the center's impact beyond its physical location, fostering a culture of science appreciation throughout the region.

Public Lectures and Demonstrations

Regularly scheduled public lectures and live demonstrations provide opportunities for community members to learn from experts in various scientific fields. These events are designed to be accessible and informative, encouraging public participation in science discourse.

Science Fairs and Competitions

Hosting science fairs and competitions is a key aspect of the center's strategy to motivate student involvement in STEM. These events showcase young scientists' projects, promote innovation, and offer recognition and awards to encourage continued pursuit of scientific interests.

Collaborations with Local Organizations

The science center partners with schools, universities, environmental groups, and technology companies to enhance program offerings and reach diverse audiences. These collaborations often lead to joint events, research projects, and community service initiatives that benefit the broader Fort Walton area.
