The federal Fair Housing Act of 1968 was passed in a time of turmoil, conflict, and often conflagration in cities across the nation. It took the assassination of Dr. Martin Luther King, Jr. to finally secure its passage. The Kerner Commission warned in 1968 that to continue present policies is to make permanent the division of our country into two societies; one largely Negro and poor, located in the central cities; the other, predominantly white and affluent, located in the suburbs and outlying areas. The Fair Housing Act was passed with a dual mandate: to end discrimination and to dismantle the segregated living patterns that characterized most cities. The Fight for Fair Housing tells us what happened, why, and what remains to be done. Since the passage of the Fair Housing Act, the many forms of housing discrimination and segregation, and associated consequences, have been documented. At the same time, significant progress has been made in counteracting discrimination and promoting integration. Few suburbs today are all white; many people of color are moving to the suburbs; and some white families are moving back to the city. Unfortunately, discrimination and segregation persist. The Fight for Fair Housing brings together the nation's leading fair housing activists and scholars (many of whom are in both camps) to tell the stories that led to the passage of the Fair Housing Act, its consequences, and the implications of the act going forward. Including an afterword by Walter Mondale, this book is intended for everyone concerned with the future of our cities and equal access for all persons to housing and related opportunities.

fortune society queens new york: Captives Jarrod Shanahan, 2022-05-17 The definitive history of America's most notorious jail and the violent rise of New York City's law-and-order movement Captives combines a thrilling account of Rikers Island's descent into infamy with a dramatic retelling of the last seventy years of New York politics from the vantage point of the city's jails. It is the story of a crowded field of contending powers—city bureaucrats and unions, black power activists and guards, crooked cops and elected leaders—struggling for power and influence, a tale culminating in mass incarceration and the triumph of neoliberalism. It is a riveting chronicle of how the Rikers Island of today—and the social order it represents—came to be. Conjuring sweeping cinematic vistas, Captives records how the tempo of history was set by bloody and bruising clashes between guards and prisoners, between rank and filers and union bosses, between reformers and reactionaries, and between police officers and virtually everyone else. Written by a one-time Rikers prisoner, Captives draws on extensive archival research, decades of journalism, interviews, prisoner testimonials, and firsthand experience to deliver an urgent intervention into our national discussion about the future of mass incarceration and the call to abolish prisons. The contentious debate about the future of the Rikers Island penal colony rolls onward, and Captives is a must-read for anyone interested in the island and what it represents.

fortune society queens new york: An Economist Walks into a Brothel Allison Schrager, 2019-04-02 A Financial Times Book of the Month pick for April! Is it worth swimming in shark-infested waters to surf a 50-foot, career-record wave? Is it riskier to make an action movie or a horror movie? Should sex workers forfeit 50 percent of their income for added security or take a chance and keep the extra money? Most people wouldn't expect an economist to have an answer to these questions—or to other questions of daily life, such as who to date or how early to leave for the airport. But those people haven't met Allison Schrager, an economist and award-winning journalist who has spent her career examining how people manage risk in their lives and careers. Whether we realize it or not, we all take risks large and small every day. Even the most cautious among us cannot opt out—the question is always which risks to take, not whether to take them at all. What most of us don't know is how to measure those risks and maximize the chances of getting what we want out of life. In An Economist Walks into a Brothel, Schrager equips readers with five principles for dealing with risk, principles used by some of the world's most interesting risk takers. For instance, she interviews a professional poker player about how to stay rational when the stakes are

high, a paparazzo in Manhattan about how to spot different kinds of risk, horse breeders in Kentucky about how to diversify risk and minimize losses, and a war general who led troops in Iraq about how to prepare for what we don't see coming. When you start to look at risky decisions through Schrager's new framework, you can increase the upside to any situation and better mitigate the downside.

fortune society queens new york: *City Time* David Campbell, Jarrod Shanahan, 2025-01-07 A unique insider perspective of daily life in New York City's most notorious house of correction While most people behind bars at Rikers Island are detainees awaiting the settlement of their cases, a smaller population have already been convicted and are serving sentences deemed too short for the state prison system. These stints are called "city time." The sentences range from a few days to a year, and are generally served within large, open dormitories lacking in privacy and sanitation. Within these spaces, incarcerated people reproduce an elaborate set of rules, rituals, and relationships, as a means both of survival and of giving meaning to the time taken from them. Written by David Campbell and Jarrod Shanahan, who both served sentences at Rikers, *City Time* reflects its authors' personal experiences and observations of short-stay incarceration to present a nuanced and vivid account of a social world kept locked away from the public eye. The authors reconstruct the daily realities of sanitation, nourishment, recreation, work, and other necessary activities, and emphasize the complex interpersonal relationships that emerge in response to city time. Simultaneously, they paint a grim and urgent picture of structural racism, class violence, and the disastrous lack of mental health and substance abuse resources for poor New Yorkers, who are shuttled in and out of city time sentences as "frequent flyers." Beginning with the authors' own processes of intake, and ending with the ritual of late-night release, *City Time* takes readers behind the splashy headlines to depict, in intimately human terms, the rich and variegated social world unfolding, at this very moment, on Rikers Island.

fortune society queens new york: *Reform Nation* Colleen P. Eren, 2023-09-12 How one law tells the story of America's modern criminal justice movement In late 2018, the First Step Act was signed into law by President Donald Trump just hours before a government shutdown. It was one of few major pieces of federal criminal justice reform since the 1970s to move toward reversing the incarceration frenzy that had characterized United States policy. While it did not amount to revolutionary reform, in *Reform Nation*, Colleen P. Eren investigates it as a symbol for the larger movement's trajectory. Its unlikely passage during a period of political polarization was testament to the power of a new constellation of advocates, stakeholders, and strange bedfellow alliances. These intriguing and complex dynamics are indicative of a longer, twenty-year shift in which the movement became nationalized and mainstreamed. Using in-depth interviews with major players in the national movement, formerly incarcerated activists, celebrities, and donors, this is the first book to turn the mirror back on the criminal justice reform movement itself—the frames used, the voices heard, the capital activated among elite participants, and the bitter controversies. This snapshot in time raises much larger questions about how our democratic processes inform criminal justice policy, and where we are going in the decades to come.

fortune society queens new york: *The Politics of Imprisonment* Vanessa Barker, 2009-08-26 The attention devoted to the unprecedented levels of imprisonment in the United States obscure an obvious but understudied aspect of criminal justice: there is no consistent punishment policy across the U.S. It is up to individual states to administer their criminal justice systems, and the differences among them are vast. For example, while some states enforce mandatory minimum sentencing, some even implementing harsh and degrading practices, others rely on community

sanctions. What accounts for these differences? The Politics of Imprisonment seeks to document and explain variation in American penal sanctioning, drawing out the larger lessons for America's overreliance on imprisonment. Grounding her study in a comparison of how California, Washington, and New York each developed distinctive penal regimes in the late 1960s and early 1970s--a critical period in the history of crime control policy and a time of unsettling social change--Vanessa Barker concretely demonstrates that subtle but crucial differences in political institutions, democratic traditions, and social trust shape the way American states punish offenders. Barker argues that the apparent link between public participation, punitiveness, and harsh justice is not universal but dependent upon the varying institutional contexts and patterns of civic engagement within the U.S. and across liberal democracies. A bracing examination of the relationship between punishment and democracy, The Politics of Imprisonment not only suggests that increased public participation in the political process can support and sustain less coercive penal regimes, but also warns that it is precisely a lack of civic engagement that may underpin mass incarceration in the United States.

This means taking those ideas to come out for that one big score or package and throwing them in the garbage where they belong. There are no big packages, or scores left for you. Until you understand this, you are already defeated, and on your way back for another bid. What will it be this time? One year, four to twelve, six to eighteen, life? After all the time spent incarcerated and seeing so many individuals return to prison or being killed, your goal is still to go back to the neighborhood and do it again. So here is how that works..... The above paragraph is taken from one of the steps. My book the 5 Steps to a Successful Re-Entry is a solution focused, easy to read, direct, honest and personal approach to addressing the problem of recidivism. Although intended for the incarcerated and formerly incarcerated. It is also for the family and communities these men and women will be returning to. I strongly believe that recidivism can be greatly reduced and ultimately defeated by utilizing the steps provided within this book.

With the recent critical and financial success of Fun Home and Hamilton, and its emphasis on new play development, The Public's contemporary history has been equally remarkable, even as world crises and social changes have tested the mettle of its foundation of accessible and "radically inclusive" theatre for all. One Public: New York's Public Theater in the Era of Oskar Eustis presents the broader organization, its creative methodology, and its enormous growth over the past 20 years. Framed by the tenure and leadership of its current artistic director, the book tells the contemporary story, recorded over many interviews with iconic practitioners and performers ranging from Diane Paulus, Tony Kushner and Lynn Nottage to Kevin Kline, Chelsea Clinton and Lin-Manuel Miranda. Case-study driven, One Public uses oral history accounts and authorial experience to illuminate The Public Theater, Eustis and their cultural influence on the city of New York and the greater United States. The story highlights the successes and challenges of an institution at once espousing a mission of inclusivity and community-based arts creation, while also developing Broadway hits and international fame.
