foundations of business 7th edition ebook: Serious Leisure and Individuality Elie Cohen-Gewerc, Robert A. Stebbins, 2013-04-18 What does it mean to be an individual and how can an individual exist within society? *Serious Leisure and Individuality* examines the circumstances in the modern world that make for individual distinctiveness, and the role of these conditions in personal and social life. The individual, said Friedrich Nietzsche, has always had to struggle to keep from being overwhelmed by the tribe. If you try it, you will be lonely often, and sometimes frightened. But no price is too high to pay for the privilege of owning yourself. Elie Cohen-Gewerc and Robert Stebbins explore the road to finding that privilege. They approach individuality by examining its relationship to freedom and being free, and by defining and elaborating on the concept of leisure space. They also look at individuality's place in community, citizenship, and globalization. The complex relationship between individuality and alienation is put under the microscope to highlight the negative side of being distinctive, which has adverse consequences for the individual and society. There are many studies on the modern individual that centre almost entirely on the person facing his local community and broader society. What is missing in the literature - and what *Serious Leisure and Individuality* provides - is a broad, comprehensive examination of individuality, particularly as it is rooted in leisure and the leisure-like areas of work.

foundations of business 7th edition ebook: Intelligent Information Technology Gautam Das, V.P. Gulati, 2004-12-03 The 7th International Conference on Information Technology (CIT 2004) was held in Hyderabad, India, during December 20-23, 2004. The CIT 2004 was a forum where researchers from various areas of information technology and its applications could stimulate and exchange ideas on technological advancements. CIT, organized by the Orissa Information Technology Society (OITS), has emerged as one of the major international conferences in India and is fast becoming the premier forum for the presentation of the latest research and development in the critical area of information technology. The last six conferences attracted reputed researchers from around the world, and CIT 2004 took this trend forward. This conference focused on the latest research findings on all topics in the area of information technology. Although the natural focus was on computer science issues, research results contributed from management, business and other disciplines formed an integral part. We received more than 200 papers from over 27 countries in the areas of computational intelligence, neural networks, mobile and adhoc networks, security, databases, software engineering, signal and image processing, and Internet and WWW-based computing. The programme committee, consisting of eminent researchers, academicians and practitioners, finally selected 43 full papers on the basis of reviewer grades. This proceedings contains the research papers selected for presentation at the conference and this is the first time that the proceedings have been published in the Lecture Notes in Computer Science (LNCS) series. The poster papers are being printed as a separate conference proceedings.
