forte sports medicine carmel: Physiological Bases of Sports Performance Mark

Hargreaves, John A. Hawley, 2003 Takes an in-depth look at how the body responds to high physical activity in exercise and sport, and on how to enhance performance through a variety of physiological techniques, such as training, nutrition and ergogenic aids.

forte sports medicine carmel: Towards a psychophysiological approach in physical activity, exercise, and sports, volume II Pedro Forte, Daniel Leite Portella, Diogo Monteiro, José Eduardo Teixeira, 2024-07-12 This Research Topic is the second volume of the article collection: Towards a Psychophysiological Approach in Physical Activity, Exercise, and Sports. Please see the first volume here:

<https://www.frontiersin.org/research-topics/39747/towards-a-psychophysiological-approach-in-physical-activity-exercise-and-sports/magazine>. In recent years, there has been an increase in interest in mental health disorders as a result of mediatic coverage of Olympic athletes' mental health struggles, and also due to the COVID-19 pandemic lockdowns. These phenomena helped to further exacerbate a problem already extensively present in sport and society. Therefore, applying a psychophysiological approach to physical activity, exercise, and sports research has become very popular. Indeed, mental fatigue and mental disorders are not only psychological in origin, but also require an explanation from a psychophysiological perspective due to the effective interconnection between the psychological and physiological dimensions. Psychological variables can also influence performance and the psychophysiological system has a strong effect on the control of physical capacities. Moreover, pacing behaviour, decision-making, self-regulation, and effort perception can also explain the role of the brain in physical activity and exercise management. Thus, the aim of this Research Topic is to share the impact of a psychophysiological approach in physical activity, exercise, and sports. The goal of this Topic is to address the following: • Factors determining performance, including technical/tactical, physiological, cognitive, and psychosocial; • training and competition demand; • training interventions and testing in sports; • acute and chronic effects of training in psychophysiological variables; • coaching in sports; • strength and conditioning, mental health, and performance; • recent developments within sports sciences research. This Research Topic endeavors to explore at specific themes related to physiological stress and mental well-being. Additionally, we aim to provide evidence to coaches and sports scientists highlighting the relationship between training and competition demands, related to performance. We also want to analyze the effects of strength and conditioning training, and coaching effects (acute and chronic) on psychological and physiological. Finally, it is our intention to provide scientific literature with evidence for a relationship between movement, behavior and cognition with physiological performance: the psychophysiological approach.

Füsün Toraman, Nil Tekin, Ikuko Murakami, Öznur Körükcü, Sara Carmel, Selahattin Fehmi Akçiçek, Sema Oğlak, Suzan Yazıcı, Terence Seedsman, Thomas Klie, Zuhale Güler, Tarihsel açıdan bakıldığında, yaşlılık iki açıdan değerlendirmek zorunda olduğumuz bir kavramdır. Bir taraftan değişen sınırlarını, diğer taraftan geçmişteki enderliğini göz önüne almadan yaşlılığın bugünkü anlamlarını kavramakta zorluk çekebiliriz. Hatta buna bir “gerontokratik” olarak tanımlanan toplumları da eklemeliyiz. Yaşlılara saygının vurgulandığı toplumlarda da tüm yaşlılar aynı saygıyı görmemiş, aynı iktidar gücüne layık görülmemişlerdir. Aksine yaşlıya saygı kavramının görece olduğu anlaşılmaktadır. Değer atıfları, bakış tarzları, kişisel tecrübeler, anlamlandırmalar ve ideolojiler yaşlının konumu ve kaderini tayin etmiştir ve etmeye devam etmektedir. Kafalarda canlanan yaşlı görüntülerinin oluşumunda sosyokültürel koşullar rol oynamaktadır. Henüz bir alfabesi olmayan arkaik toplumlardaki yaşlı algılarını bugünkü toplumun yaşlı algıları ile karşılaştırırken dikkatli olunmalıdır. O toplumlarda

yaşlılar tecrübe ve geleneksel bilgilerin taşıyıcıları olarak algılandıkları için yüksek saygınlık sahibiydiler. Ama belirtildiği gibi hepsi değil, sadece din adamları ve kâhinler buna layık görülmüşlerdir. Fakat çok çabuk da bu saygınlığı yitirdikleri bilinmektedir. Çünkü bulundukları yüksek pozisyonu, yaşları ilerlediği için elde etmemişlerdir. Arkaik toplumlarda tek başına bırakılıp ölüme terk edilen, boğularak veya döve döve öldürme olayları normal gelenekler arasında yer alıyordu. Soğuk ve verimsiz topraklarda göçebe hayatı yaşayan toplumlarda yaşlıların katli; besin kıtlığı, ekonomik kıtlık ve yaşlıların “sihirli gücünden” korkan gençlerin uyguladıkları bir yöntemdi. Bu yüzden eskiden beri kadın erkek ayrımı yapılmadan yaşlılara saygı duymakla övünen toplumların yaşlılığın tarihsel süreçteki değişen anlamlarını iyi kavramaları gerekmektedir. Özellikle bugün ileri yaşlıların hızla çoğaldığı, aralarında bizim de yer aldığımız toplumlar açısından bu tavsiyenin önemi, bu ciltte ele aldığımız yaşlılıkta bakım ve sağlık konusu açısından apayrı anlamlar kazanmaktadır. Bir ansiklopedi niteliği taşıyan elinizdeki kitap, geceli gündüzlü üç yıllık yoğun bir emeğin sonucudur. Gerontoloji alanının dünya çapında tanınan ve duayen olarak kabul gören uzmanlarının bölüm yazarları olarak eşsiz bilgilerini ve tecrübelerini aktardığı iki ciltten oluşan bu kitaptaki bölümleri büyük bir heyecanla ve keyifle okuyacağınızı düşünüyoruz. İki cilt olarak hazırlanan bu kitapta demografiden psikolojiye, antropolojiden sosyolojiye, ekonomiden yaşam ve çevre bilimlerine, eğitimden teknolojiye, siyasetten sosyal refaha, biyolojiden psikiyatriye, uzun dönemli bakımdan koruyucu sağlığa, beslenmeden engelliliğe, aile yapılarından yaşlılara yönelik şiddete geniş bir yelpazede Gerontoloji Biliminin konuları ele alınmıştır.

forte sports medicine carmel: Operative und interventionelle Gefäßmedizin Eike Sebastian Debus, Walter Gross-Fengels, 2020-04-14 Das klinische Wissen zu den Erkrankungen der Gefäße und zur invasiven Gefäßtherapie ist umfassend und detailliert in diesem Buch zusammengefasst - eine unerschöpfliche Informationsquelle für jeden operativ, interventionell oder konservativ tätigen Gefäßspezialisten! Der aktuelle Kenntnisstand zu den physiologischen und pathophysiologischen Grundlagen ist ebenso dargestellt wie die modernen diagnostischen und therapeutischen Verfahren. Den Schwerpunkt bilden die Kapitel, in denen alle systemischen und regionalen Erkrankungen der Gefäße ausführlich beschrieben werden. Auch seltene Erkrankungen und Konstellationen sind berücksichtigt. Für jede Indikation werden die Therapieoptionen sorgfältig abgewogen und konkrete Empfehlungen zum praktischen operativen und interventionellen Vorgehen gegeben. In der 2. Auflage wurden die Kapitel durchweg aktualisiert und zum Teil komplett neu verfasst: · neben Experten aus dem deutschen Sprachraum wurden für einzelne Themen auch internationale Spezialisten als Autoren gewonnen. · zusätzliche Kapitel zu diagnostischen Verfahren (wie PET/CT), therapeutischen Methoden (wie allogene und xenogene Materialien) und klinischen Fragestellungen (wie Portanlage und PICC, Damage Control Surgery bei Gefäßverletzungen und intestinale Aneurysmen) wurden ergänzt. Parallel zur gedruckten Ausgabe erscheint erstmals eine online-Version, die als Live Reference-Ausgabe kontinuierlich aktualisiert wird.
