forty in spanish language: American Alchemy Brian Roberts, 2003-06-19 California during the gold rush was a place of disputed claims, shoot-outs, gambling halls, and prostitution; a place populated by that rough and rebellious figure, the forty-niner; in short, a place that seems utterly unconnected to middle-class culture. In *American Alchemy*, however, Brian Roberts offers a surprising challenge to this assumption. Roberts points to a long-neglected truth of the gold rush: many of the northeastern forty-niners who ventured westward were in fact middle-class in origin, status, and values. Tracing the experiences and adventures both of these men and of the unseen forty-niners--women who stayed back East while their husbands went out West--he shows that, whatever else the gold seekers abandoned on the road to California, they did not simply turn their backs on middle-class culture. Ultimately, Roberts argues, the story told here reveals an overlooked chapter in the history of the formation of the middle class. While the acquisition of respectability reflects one stage in this history, he says, the gold rush constitutes a second stage--a rebellion against standards of respectability.

forty in spanish language: Contemporary Latina/o Media Arlene Dávila, Yeidy M. Rivero, 2014-09-12 The cultural politics creating and consuming Latina/o mass media. Just ten years ago, discussions of Latina/o media could be safely reduced to a handful of TV channels, dominated by Univision and Telemundo. Today, dramatic changes in the global political economy have resulted in an unprecedented rise in major new media ventures for Latinos as everyone seems to want a piece of the Latina/o media market. While current scholarship on Latina/o media have mostly revolved around important issues of representation and stereotypes, this approach does not provide the entire story. In *Contemporary Latina/o Media*, Arlene Dávila and Yeidy M. Rivero bring together an impressive range of leading scholars to move beyond analyses of media representations, going behind the scenes to explore issues of production, circulation, consumption, and political economy that affect Latina/o mass media. Working across the disciplines of Latina/o media, cultural studies, and communication, the contributors examine how Latinos are being affected both by the continued Latin Americanization of genres, products, and audiences, as well as by the whitewashing of "mainstream" Hollywood media where Latinos have been consistently bypassed. While focusing on Spanish-language television and radio, the essays also touch on the state of Latinos in prime-time television and in digital and alternative media. Using a transnational approach, the volume as a whole explores the ownership, importation, and circulation of talent and content from Latin America, placing the dynamics of the global political economy and cultural politics in the foreground of contemporary analysis of Latina/o media.
