fragile in spanish language: *Language in Mind* Dedre Gentner, Susan Goldin-Meadow, 2003-03-14 The idea that the language we speak influences the way we think has evoked perennial fascination and intense controversy. According to the strong version of this hypothesis, called the Sapir-Whorf hypothesis after the American linguists who propounded it, languages vary in their semantic partitioning of the world, and the structure of one's language influences how one understands the world. Thus speakers of different languages perceive the world differently. Although the last two decades have been marked by extreme skepticism concerning the possible effects of language on thought, recent theoretical and methodological advances in cognitive science have given the question new life. Research in linguistics and linguistic anthropology has revealed striking differences in cross-linguistic semantic patterns, and cognitive psychology has developed subtle techniques for studying how people represent and remember experience. It is now possible to test predictions about how a given language influences the thinking of its speakers. *Language in Mind* includes contributions from both skeptics and believers and from a range of fields. It contains work in cognitive psychology, cognitive development, linguistics, anthropology, and animal cognition. The topics discussed include space, number, motion, gender, theory of mind, thematic roles, and the ontological distinction between objects and substances. Contributors Melissa

fragile in spanish language: In and Out of Africa Joanna Boampong, 2012-11-30 New areas of intellectual endeavours including postcolonial, transatlantic, global, and cultural studies have facilitated conversations that cut across traditional academic boundaries. Indeed, aside from precipitating more stimulating intellectual dialogues, the advent of multi-disciplinarity has also enabled literary and cultural theorists, critics, students, and teachers to connect and to integrate diverse academic disciplines and schools of thought in the pursuit of a common task. Of the many areas that have benefited from this trend, it is perhaps in the realm of Afro-Hispanic, Luso-Brazilian, and Latin American studies that one notices a vibrant conversation that deals with the deep historical, social, economic, and political bonds that have connected and still connect Africa to the Hispanic and Luso-Brazilian worlds. As these bonds acquire profound meanings in the late 20th and early 21st centuries, scholars from diverse academic backgrounds find new ways to explore these connections. It is in the spirit of this endeavour that the creative artists, scholars of cultural and literary theory and critics whose works are presented in this anthology, attempt to examine wide-ranging themes from colonization, slavery, imperialism, religion, music, and literature. Most of the essays in this collection address long-standing issues related to identity construction, linguistic legacies, religious and cultural beliefs and practices. Others confront questions of migration and immigration, configurations of female agency, and Hispanic pedagogy in Africa and elsewhere. What makes this volume unique and interesting is not only the idea of exploring, examining, and thinking the old in new ways and the new in old ways but also, advancing the conversation of the relationship between Africa and the Afro-Hispanic, Luso-Brazilian, and Latin American worlds through different intellectual and artistic prisms.

fragile in spanish language: Avenues of Translation Regina Galasso, Evelyn Scaramella, 2019-04-15 Winner of the 2020 SAMLA Studies Book Award — Edited Collection Cities both near and far communicate in a variety of ways. Travel between, through, and among urban centers initiates contact, and cities themselves are sites of ever-changing cultural and historical encounters. Predictable and surprising challenges and opportunities arise when city borders are crossed, voices meet, and artistic traditions find their counterparts. Using the Latin word for "translation," *translatio*, or "to carry across," as a point of departure, *Avenues of Translation* explores how

translation perpetuates, diversifies, deepens, and expands the literary production of cities in their greater cultural context, and how translation shapes an understanding of and access to a city's past and present literary and cultural practices. Thinking about translation and the city is a way to tell the backstories of the cities, texts, and authors that are united by acts of translation. Published by Bucknell University Press. fragile in spanish language: *Heteroglossia as Practice and Pedagogy* Adrian Blackledge, Angela Creese, 2013-12-17 This volume presents evidence about how we understand communication in changing times, and proposes that such understandings may contribute to the development of pedagogy for teaching and learning. It expands current debates on multilingualism, asking which signs are in use and in action, and what are their social, political, and historical implications. The volume's starting-point is Bakhtin's 'heteroglossia', a key concept in understanding the tensions, conflicts, and multiple voices within, among, and between those signs. The chapters provide illuminating accounts of language practices as they bring into play, both in practice and in pedagogy, voices which index students' localities, social histories, circumstances, and identities. The book documents the performance of linguistic repertoires in an era of profound social change caused by the shifting nature of nation-states, increased movement of people across territories, and growing digital communication. "Our thinking on language and multilingualism is expanding rapidly. Up until recently we have tended to regard languages as bounded entities, and multilingualism has been understood as knowing more than one language. Working with the concept of heteroglossia, researchers are developing alternative perspectives that treat languages as sets of resources for expressing meaning that can be drawn on by speakers in communicatively productive ways in different contexts. These perspectives raise fundamental questions about the myriad of ways of

knowing and using language(s). This collection brings together the contributions of many of the key researchers in the field. It will provide an authoritative reference point for contemporary interpretations of 'heteroglossia' and valuable accounts of how 'translanguaging' can be explored and exploited in the fields of education and cultural studies." Professor Constant Leung, King's College London, UK. From rap and hip hop to taxi cabs, and from classrooms to interactive online learning environments, each of the chapters in this volume written by well-known and up-and-coming scholars provide fascinating accounts drawing on a wide diversity of rich descriptive data collected in heteroglossic contexts around the globe. Creese and Blackledge have brought together a compelling collection that builds upon and expands Bakhtin's construct of heteroglossia. These scholars help to move the field away from the view of languages as separate bounded system by providing detailed examples and expert analyses of the ways bilinguals and multilinguals draw upon their linguistic repertoires for effective and meaningful communication. fragile in spanish language: *MERCOSUR and the European Union* Mikhail Mukhametdinov, 2018-05-07 The book draws comparison between MERCOSUR and the European Union to explain variation of regionalism and to expose its limits. The project is based on the idea that contemporary examples of regionalism should be evaluated against several propositions of multiple integration theories rather than against a single theory. In order to systematically explain why and how integration outcomes in MERCOSUR differ from those in the EU, the author develops an analytical framework for the comparison of the two blocs. MERCOSUR is compared with the EU by the use of the various criteria of economic interdependence, economic convergence, intra-bloc size and interest asymmetries, cultural diversity and geostrategic motivations, which are identified as the salient parameters of integration theories.
