frank fritz health update 2023: *Single-cell analysis on the pathophysiology of autoimmune diseases* Shiang-Jong Tzeng, InKyeom Kim , Kuang-Hui Sun, 2024-07-11 Despite increasing research to facilitate the understanding of the pathophysiology of autoimmune disorders, the exact cause of the incident of autoimmunity is unknown. Current concepts on the occurrence of autoimmune

diseases are thought to involve autoantigens, genetic predisposition, disease triggers, and the breakdown of immune tolerance. In addition to the breakdown of immunological tolerance, one key characteristic of autoimmune disease is that within a single disease there is considerable variability in the clinical manifestation and severity in patients. Single-cell omics have emerged as an effective means of unraveling the complexity and heterogeneity of chronic disease development and therapeutic responses. Recently, advances in cutting-edge spatial profiling of diverse cell types have increased our understanding of how distinct cells interact and orchestrate at specific locations across a tissue landscape in both physiological and pathological contexts at the single-cell level.

frank fritz health update 2023: *The German Federal Commissioner* Daniel Jochum, 2025-07-28 Scholars have described the delegation of power from politics to administration with the help of the principal-agent theory. This framework examines challenges in the constellation of a superior, i.e. principal, and their subordinate, i.e. agent. Recruitment is a major way in which political power can be delegated to the administration. However, it is unclear how constellations in which the agent is a hybrid between politics and administration are to be assessed. Germany is familiar with the hybrid institution of the German Federal Commissioner (GFC), uniting elements of both politics and administration. GFCs or 'Bundesbeauftragte' are formally not part of ministerial hierarchy, nor of the cabinet. Also, their constitutional position is blurred because many of them hold simultaneous posts within in the legislative. For this hybrid institution, the delegation mechanisms are unclear, especially in recruitment. This contradicts the fact that GFCs are of high public interest; in its first official act, the new German Merz government abolished half of all GFCs. The present study attempts to get to the bottom GFC recruitment by applying them to the principal-agent framework.

frank fritz health update 2023: The Art Dealer's Apprentice David Guenther, 2024-03-05 The

Art Dealer's Apprentice tells the story of how the author moved to New York in 1989 as a young Midwesterner, found a job at an Upper East Side gallery, and became the protégé of Carla Panicali, an Italian countess and major international art world figure. From Carla – an extraordinary woman whom he deeply admired – the author learned to navigate the treacherous waters of authenticity, power and money in the art business and his own life. As gallery director, he gradually piloted the gallery through a sea of fakes, frauds, and unscrupulous colleagues, competitors, collectors and experts, until the art market crashed, and in the ensuing crisis, in the increasingly money-driven art world of the 1990s, he came to question even the authenticity of his friendship with Carla. In *The Art Dealer's Apprentice*, the author recounts how he learned the New York art business from the inside, including the roles of dealers, auction houses, runners, collectors and experts; the personal histories of famous artists and the art historical importance and salability of their work; and how paintings and sculptures were (or were not) authenticated and sold, often based, surprisingly, on factors having little to do with the artwork itself. The author also details how international business was done, in some cases through illicit transport of artworks, payoffs to experts, and Swiss bank accounts. Increasingly disillusioned, the author ultimately concludes that by the early 1990s, the art business was no longer really about art.

frank fritz health update 2023: **Red Moon Rising** Greg Autry, Peter Navarro, 2024-05-07

The space race was a critical determining factor in the Cold War. After its Sputnik miracle, the Soviets' loss of the race to the Moon undermined the international mystique of Communism and crushed the USSR's dreams of world domination. America's wildly successful Apollo program, by sharp contrast, brought America global glory and prestige—along with a plethora of “miracle technologies” that accelerated economic growth and strengthened US national security for half a century. We are now embroiled with a brutal and autocratic Communist China in a new cold war and second, far more consequential, race to the Moon—whichever country seizes the commanding heights of the moon will have preferential access to vast lunar resources that will determine the quality of life on Earth and the political and moral character of the human diaspora as it advances into the solar system. America should win Space Race 2.0 and is leading an international and

commercial coalition to do so. Yet, Communist China is giving no ground even as its rockets soar above us. The clear risk: Timid and visionless policy makers in the White House and Congress may well surrender the ultimate high ground to the butchers of Beijing. Greg Autry and Peter Navarro have been warning of this competition for more than a decade. Both were influential in the construction of America's triumphant space agenda during the Trump administration. In this book, they take you through the technology, economics, and history of this important topic and provide policy recommendations that will win the Space Race for America. "Space superiority is one of the most important goals for long-term American survival. Greg Autry and Peter Navarro clearly describe the challenges we face in outer space—and the devastating consequences if America cedes space leadership to other nations. The dangers we face are real. If we don't confront them, the future could be catastrophic for America and the world." —Newt Gingrich, 50th Speaker of the United States House of Representatives "This superbly researched book is equivalent to the warnings by Winston Churchill in the 1930s regarding the catastrophic failure of leadership by the West to counter Nazi Germany and the Empire of Japan before the onset of WWII.... If we prevail in this space race—which makes the one with the Soviets in the 1960s look like child's play by comparison—the political, social, and economic benefits to the world will be beyond measure." —Courtney Stadd, Former Director, Commercial Space Policy at the White House National Space Council; Former NASA Chief of Staff; and currently Executive Vice President, Beyond Earth Institute "This book needs to be on the desk of every official in the Pentagon, Congress, the White House, and the Western World, not to mention everyone who wants to understand the Space Race 2.0 now fully engaged between the USA and China in the context of a world that is increasingly hostile to the values of our American republic and Western civilization in general." —Homer Hickam, NASA Engineer and Author of *Rocket Boys* (aka *October Sky*) "The threat of the 21st century...the authors nailed it. The United States is an aerospace nation...from the beaches of Kitty Hawk to the International Space Station to the James Webb Space Telescope and beyond...this and all of the benefits of access to and use of space for the betterment of humankind are at risk.... The authors paint a clear picture of the threats to the free use of space from basic commerce to international security. A must-read!" —Major General (Ret.) Lee Levy, Member of the NASA Advisory Council

frank fritz health update 2023: Deviance Leon Anderson, 2024-04-15 *Deviance: Social Constructions and Blurred Boundaries* is designed for courses on social deviance that take a strong sociological perspective. The book draws on up-to-date scholarship across a wide spectrum of deviance categories, providing a symbolic interactionist analysis of the deviance process. The book addresses positivistic theories of deviant behavior within a description of the deviance process that encompasses the work of deviance claims-makers, rule-breakers, and social control agents. Students are introduced to the sociology of deviance and learn to analyze several kinds of criminal deviance that involve unwilling victims—such as murder, rape, street-level property crime, and white-collar crime. Students also learn to examine several categories of lifestyle and status deviance and develop skills for critical analysis of criminal justice and social policies. Overall, students gain an understanding of the sociology of deviance through cross-cultural comparisons, historical overview of deviance in the U.S., and up-close analysis of the lived experience of those who are labeled deviant as well as responses to them in the U.S. today
