francesca chambers political party: Nasty Politics Thomas Zeitzoff, 2023 A novel explanation for why politicians insult, accuse, and threaten their opponents, even though voters say they don't like it. Why do politicians engage in nasty politics? Why do they use insult, accusations, intimidation, and in rare cases violence against their domestic political opponents? In *Nasty Politics*, Thomas Zeitzoff answers these questions by examining this global political trend in the US, Ukraine, and Israel and looking at how key leaders such as Trump, Zelensky, and Netanyahu use it. Drawing on surveys, case studies, in-depth interviews, databases of nasty politics, and large social media datasets, Zeitzoff shows that across all three countries, the public generally doesn't like nasty politics and it increases the threat of political violence. But it can also be a way to signal toughness to voters, which is especially important in threatening times. Featuring a powerful theory of why nastiness takes hold in democratic polities, *Nasty Politics* highlights how it influences the kinds of politicians who run for office and deepens our understanding for why so many politicians now rely on outsized anger and withering insults for political gain.

francesca chambers political party: President Trump and the News Media Jim A. Kuypers, 2020-06-17 In *President Trump and the News Media: Moral Foundations, Framing, and the Nature of Press Bias in America*, political communication researcher Jim A. Kuypers takes readers on a rhetorical framing tour de force, this time incorporating elements of Moral Foundations Theory to investigate the ideological underpinnings of press reports. Using a rhetorical version of framing analysis, Kuypers analyzes four major speeches by President Trump and compares them with the reporting on those speeches by the mainstream news media. The moral foundations of both Trump and the news media are examined to assess their respective moral/ideological underpinnings. The results turn framing theory on its head by demonstrating how frames do not give rise to moral assessments as previously thought, but rather the presence of moral foundations provide moral substance to frames as they are developed and found throughout news coverage. The results reveal how journalists inject bias consciously and unconsciously into hard news stories, and that their moral foundations act to privilege liberal concerns and denigrate conservative concerns. Kuypers conveys how news media framing acted to treat President Trump not as a source of news, but as a political opponent while at the same time helping the political opposition of the President. By evaluating journalistic practices through the lens of their own published ethical standards, Kuypers argues that contemporary journalistic practices are damaging the American Republic and makes the case for immediate incorporation of viewpoint diversity within news organizations. Scholars of communications, journalism, and political science will find this book particularly interesting.

francesca chambers political party: The 2016 American Presidential Campaign and the News Jim A. Kuypers, 2018-03-14 This book examines perhaps the most contentious election in modern US history—the 2016 United States presidential election. It is unique in its discussion of a wide range of issues affecting the news media coverage of the election, coming from an equally diverse range of intellectual perspectives including the rhetorical, social-scientific, communication studies, and media studies. With eleven chapters grounded in hard evidence and communication theory, *The 2016 American Presidential Campaign and the News: Implications for American Democracy and the Republic* examines significant topics such as fake news, media construction of Hillary Clinton's and Donald Trump's campaign personalities, media bias, visual meme depictions of the candidates, identity politics in the news, Trump's Twitter use, entertainment news, and social media as news. These chapters individually and collectively provide a direct commentary on the implications of the 2016 campaign news coverage for the future of the American Republic and political communication in the media.

francesca chambers political party: The Debasement of Human Rights Aaron Rhodes, 2018-04-17 The idea of human rights began as a call for individual freedom from tyranny, yet today it is exploited to rationalize oppression and promote collectivism. How did this happen? Aaron Rhodes, recognized as “one of the leading human rights activists in the world” by the University of Chicago, reveals how an emancipatory ideal became so debased. Rhodes identifies the fundamental

flaw in the Universal Declaration of Human Rights, the basis for many international treaties and institutions. It mixes freedom rights rooted in natural law—authentic human rights—with “economic and social rights,” or claims to material support from governments, which are intrinsically political. As a result, the idea of human rights has lost its essential meaning and moral power. The principles of natural rights, first articulated in antiquity, were compromised in a process of accommodation with the Soviet Union after World War II, and under the influence of progressivism in Western democracies. Geopolitical and ideological forces ripped the concept of human rights from its foundations, opening it up to abuse. Dissidents behind the Iron Curtain saw clearly the difference between freedom rights and state-granted entitlements, but the collapse of the USSR allowed demands for an expanding array of economic and social rights to gain legitimacy without the totalitarian stigma. The international community and civil society groups now see human rights as being defined by legislation, not by transcendent principles. Freedoms are traded off for the promise of economic benefits, and the notion of collective rights is used to justify restrictions on basic liberties. We all have a stake in human rights, and few serious observers would deny that the concept has lost clarity. But no one before has provided such a comprehensive analysis of the problem as Rhodes does here, joining philosophy and history with insights from his own extensive work in the field.

francesca chambers political party: Fascism, Communism and the Consolidation of Democracy Gerhard Besier, 2006 The authoritarian and totalitarian systems of individual countries have long been studied independently of each other. The separation of Eastern and Western Europe was used as a parameter by historians. This also applies to the analysis of Communism and Mussolini's Fascism. Only in recent years has the comparative perspective in the regional, chronological and system-oriented sense been applied, thus allowing many phenomena to be correctly understood and assessed. Central and Eastern Europe is tied to Western and Southern Europe by the experience of dictatorship and the ongoing need to evaluate and come to terms with these dictatorships. In the present anthology Mussolini's Fascism, National Socialism and Communism are examined comparatively. Similarities, connections and mutual influences in these dictatorships are sought. Finally, the transition from dictatorship to democracy is examined. With this collection of essays the editors intend to give impulse for inter-European comparative research on dictatorships and democracy.

francesca chambers political party: *The Politics of New Immigrant Destinations* Stefanie Chambers, 2017-07 Migration to new destinations in Europe and the United States has expanded dramatically over the past few decades. Within these destinations, there is a corresponding greater variety of ethnic, cultural, and/or religious diversity. This timely volume, *The Politics of New Immigrant Destinations*, considers the challenges posed by this proliferation of diversity for governments, majority populations, and immigrants. The contributors assess the effectiveness of the policy and political responses that have been spawned by increasing diversity in four types of new immigrant destinations: “intermediate” destination countries—Ireland and Italy; culturally distinct regions experiencing new migration such as Catalonia in Spain or the American South; new destinations within traditional destination countries like the state of Utah and rural towns in England; and “early migration cycle” countries including Latvia and Poland. *The Politics of New Immigrant Destinations* examines how these new destinations for immigrants compare to traditional destinations, with respect to their policy responses and success at integrating immigrants, offering perspectives from both immigrants and natives. Contributors include: Dace Akule, Amado Alarcón, Rhys Andrews, Francesca Campomori, Tiziana Caponio, Scott Decker, Erica Dobbs, Melissa M. Goldsmith, Aleksandra Grzymała-Kazłowska, Claudio A. Holzner, Magdalena Lesińska, Paul Lewis, Helen B. Marrow, Laura Morales, Katia Pilati, Marie Provine, Monica Varsanyi, and the editors.

francesca chambers political party: **The Role of the Charity Commission and Public Benefit** Great Britain. Parliament. House of Commons. Public Administration Select Committee, 2013 This report into the implementation of the Charities Act 2006 finds the Charity Commission being asked to do too much, with too little. The charitable sector is at the heart of UK society,

involving millions of people and £9.3 billion received in donations in 2011/2012. Around 25 new applications for charitable status are received by the Charity Commission every working day. Among the reports findings are: one of the keys tests set by the Charities Act 2006 for determining charitable status-the public benefit test-is critically flawed; the Government should revise the statutory objectives for the Charity Commission, to allow the Commission to focus its limited resources on regulating the sector; the proposal to increase the financial threshold for compulsory registration of a charity with the Charity Commission should be rejected; charities should publish their spending on campaigning and political activity. PASC criticises the way the Charity Commission has interpreted public benefit under the Act. The Committee also considered the impact of face-to-face fundraising, or chugging-on the street or on the doorstep-and warns that self-regulation has failed so far to generate the level of public confidence which is essential to maintain the reputation of the charitable sector. The evidence was clear that the regulation of fundraising remains a concern for many members of the public. Two in three people have reported feeling uncomfortable as a result of the fundraising methods used by some charities.

francesca chambers political party: Intergenerational Justice Lukas H. Meyer, 2017-05-15 The essays selected for this volume show how relations between past, current and future generations have become a major subject of philosophical research since the 1970s. The relations between people alive today with people who may exist in the future and people now deceased, differ from relations between contemporaries and in ways that raise new conceptual, logical and substantive questions. Among the questions addressed in this volume are: what is the status of people now deceased and people who may exist in the future? Can the latter be harmed by the actions of people alive today? What duties of justice do we have towards people with whom we can neither interact nor co-operate, and can people who are indirect victims of past injustices legitimately claim compensation? Answers to these questions are relevant in a number of policy

areas, most notably in issues regarding reparations for historical injustice and responding to climate change and its consequences.

francesca chambers political party: Information Disorder Michael Filimowicz, 2023-05-31

This book focuses on the recent rise of “infodemics” as forms of disinformation, misinformation and mal-information saturate contemporary media platforms, shaping public opinion to advance agendas. The internet in general and social media in particular have relativized, through their global, complex and instantaneous information flows, assumptions about truth and authority in fact-based content. This has created new opportunities for state actors to use information beyond traditional conceptions of propaganda to directly assault a public’s conception of reality. Additionally, almost anyone has the capability to challenge evidential claims through narratives and imagery alone as there is a wide appetite online for alternative realities. This requires new approaches to media literacy in education, the creative arts and our acts of media consumption and dissemination. The volume covers the ways that social media platforms amplify and catalyze the messages of politicians and influencers, the ambivalence of algorithms that can both generate and detect problematic information, how fake news imitates the style of memes to gain widespread social traction and virality, and how artists have intentionally created “sicko AIs” in new media performances to highlight the ethical risks of increasingly “intelligent” technologies. Scholars and students from many backgrounds, as well as policy makers, journalists and the general reading public, will find a multidisciplinary approach to questions posed by information disorder research from the fields of communication, social psychology, human-computer interaction, journalism, media, semiotics and new media art.

francesca chambers political party: Social Justice through Inclusion Francesca R.

Jensenius, 2017-06-30 Across the world, governments design and implement policies with the explicit goal of promoting social justice. But can such institutions change entrenched social norms? And what effects should we expect from differently designed policies? Francesca R. Jensenius' *Social Justice through Inclusion* is an empirically rich study of one of the most extensive electoral quota systems in the world: the reserved seats for the Scheduled Castes (SCs, the former untouchables) in India's legislative assemblies. Combining evidence from quantitative datasets from the period 1969-2012, archival work, and in-depth interviews with politicians, civil servants, and voters across India, the book explores the long-term effects of electoral quotas for the political elite and the general population. It shows that the quota system has played an important role in reducing caste-based discrimination, particularly at the elite level. Interestingly, this is not because the system has led to more group representation - SC politicians working specifically for SC interests - but because it has made possible the creation and empowerment of a new SC elite who have gradually become integrated into mainstream politics. This is a study of India, but the findings and discussions have broader implications. Policies such as quotas are usually supported with arguments about various assumed positive long-term consequences. The nuanced discussions in this book shed light on how electoral quotas for SCs have shaped the incentives for politicians, parties, and voters,

and indicate the trade-offs inherent in how such policies of group inclusion are designed.

francesca chambers political party: The History of Migration in Europe Francesca Fauri, 2014-10-03 The History of Migration in Europe belies several myths by arguing, for example, that immobility has not been the normal condition of people before the modern era. Migration (far from being an income-maximizing choice taken by lone individuals) is often a household strategy, and local wages benefit from migration. This book shows how successes arise when governments liberalize and accompany the international movements of people with appropriate legislation, while failures take place when the legislation enacted is insufficient, belated or ill shaped. Part I of this book addresses mainly methodological issues. Past and present migration is basically defined as a cross-cultural movement; cultural boundaries need prolonged residence and active integrationist policies to allow cross-fertilization of cultures among migrants and non-migrants. Part II collects chapters that examine the role of public bodies with reference to migratory movements, depicting a series of successes and failures in the migration policies through examples drawn from the European Union or single countries. Part III deals with challenges immigrants face once they have settled in their new countries: Do immigrants seek integration in their host culture? Through which channels is such integration achieved, and what roles are played by citizenship and political participation? What is the identity of migrants and their children born in the host countries? This text's originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of perspectives and using a multi-disciplinary approach, including economic, political and sociological contributions.

francesca chambers political party: Amnesty in the Age of Human Rights Accountability Francesca Lessa, Leigh A. Payne, 2012-05-28 This edited volume brings together well-established and emerging scholars of transitional justice to discuss the persistence of amnesty in the age of human rights accountability. The volume attempts to reframe debates, moving beyond the limited approaches of 'truth versus justice' or 'stability versus accountability' in which many of these issues have been cast in the existing scholarship. The theoretical and empirical contributions in this book offer new ways of understanding and tackling the enduring persistence of amnesty in the age of accountability. In addition to cross-national studies, the volume encompasses eleven country cases of amnesty for past human rights violations: Argentina, Brazil, Cambodia, El Salvador, Guatemala, Indonesia, Rwanda, South Africa, Spain, Uganda and Uruguay. The volume goes beyond merely describing these case studies, but also considers what we learn from them in terms of overcoming impunity and promoting accountability to contribute to improvements in human rights and democracy.

In both nations, the State played an important role as Entrepreneur in the 20th century but with different aims in each country. The crisis of 2008/2009 compels us to reconsider State intervention in the economy as a tool that cannot be undervalued.
