free case management training online: [Report on the global arbovirus surveillance and response capacity survey 2021-2022](#) World Health Organization, 2025-03-14 In 2021-2022 the World Health Organization (WHO) conducted a survey to assess current surveillance and response guidelines and practices across WHO Member States to identify critical areas that require strengthening. WHO gathered data from 167 countries and territories on the structure and coverage of their arbovirus surveillance systems, laboratory and entomological capacity, clinical management

capacity, epidemic preparedness, access to expertise and staffing. The survey findings confirmed that preparedness and response system attributes and stages of development differ between countries, often reflecting surveillance and response measures developed in response to endemic or epidemic Aedes-borne arbovirus circulation. In many low-resourced settings, in particular, surveillance infrastructure is unlikely to detect transmission even though competent vectors are known to be present. In 2022 WHO launched the Global Arbovirus Initiative (GLAI) for Aedes-borne arboviral diseases to strengthen the coordination, communication, capacity-building, research, preparedness and response needed to mitigate the growing risk of epidemics due to arboviral diseases. The findings of the survey have informed the objectives and priority activities of the GLAI and will serve as a baseline against which progress can be measured.

free case management training online: The Fear-free Organization Paul Brown, Joan Kingsley, Sue Paterson, 2015-07-03 Evidence from neuroscience shows that individuals and organizations are more successful when people are encouraged to take risks, explore new ideas, and channel their energies in ways that work for them. It is no wonder that organizations are actively looking at how they can improve and maintain the psychological health and wellbeing of their employees to the benefit of all concerned. The Fear-free Organization reveals how our new understanding of the neurobiology of the self - how the brain constructs the person - can transform for the better the way our businesses and organizations work. Academic yet accessible, The Fear-free Organization addresses head on the issue that scared people spend a lot more time plotting their survival than working productively. The book helps leaders understand the neurobiology of fear, face the damage it is doing, and replace it with building relationships, managing energy flow and fostering trust. It guides you in making your workplace one that's full of energy, not adrenalin; focused on possibility, not profit; and generates independent thinking, not obedience so you can promote the psychological wellbeing that is strongly correlated with greater energy, motivation and better cognitive function.
