free business voicemail greetings mp3: Sound Streams Andrew J Bottomley, 2020-06-01 In talking about contemporary media, we often use a language of newness, applying words like “revolution” and “disruption.” Yet, the emergence of new sound media technologies and content—from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting—are not a disruption, but a continuation of the century-long

history of radio. Today's most innovative media makers are reintroducing forms of audio storytelling from radio's past. *Sound Streams* is the first book to historicize radio-internet convergence from the early '90s through the present, demonstrating how so-called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting. Various iterations of internet radio, from streaming audio to podcasting, are all new radio practices rather than each being a separate new medium: radio is any sound media that is purposefully crafted to be heard by an audience. Rather than a particular set of technologies or textual conventions, web-based broadcasting combines unique practices and features and ideas from radio history. In addition, there exists a distinctive conversationality and reflexivity to radio talk, including a propensity for personal stories and emotional disclosure, that suits networked digital media culture. What media convergence has done is extend and intensify radio's logics of connectivity and sharing; sonically mediated personal expression intended for public consideration abounds in online media networks. *Sound Streams* marks a significant contribution to digital media and internet studies. Its mix of cultural history, industry research, and genre and formal analysis, especially of contemporary audio storytelling, will appeal to media scholars, radio and podcast practitioners, audio journalism students, and dedicated podcast fans.

free business voicemail greetings mp3: From Great to Gone Peter Lorange, Jimmi Rembiszewski, 2016-04-15 The modern consumer is no longer attracted by single-minded, predictable and one-benefit-focused brand promises. The old-fashioned FMCG communication strategies based on television, radio and print with constant repetition have become outdated. From Great to Gone shows that what's needed are 'Lego' strategies, whereby the marketing and communication strategies are built up by many key facets (like building blocks) and delivered to the consumer through a mix of various touch points. Most importantly, you need to leave consumers to put all of that together themselves. There are major internal and external hurdles to transforming FMCGs successfully into FICGs - Fast Innovating Consumer Goods. It requires new brand strategies and flatter, more top-down than bottom-up, decision-making organisations and a 21st-century model for advertising agencies. Externally these companies need a new route to market through transformation of their old retail dependencies. Changes are also required in all communication delivery, reflecting modern consumers' connectivity and unlimited access to information. In the book the authors showcase what the winners of the 21st century have in common that has enabled them to become FICGs. New, unimagined models continue emerge, to which, with the authors' guidance producers and retailers may develop their own sustainable responses.
