free cna training in dc: Armed with Expertise Joy Rohde, 2013-08-01 During the height of the wars in Iraq and Afghanistan, the Pentagon launched a controversial counterinsurgency program called the Human Terrain System. The program embedded social scientists within military units to provide commanders with information about the cultures and grievances of local populations. Yet the controversy it inspired was not new. Decades earlier, similar national security concerns brought the Department of Defense and American social scientists together in the search for intellectual weapons that could combat the spread of communism during the Cold War. In *Armed with Expertise*, Joy Rohde traces the optimistic rise, anguished fall, and surprising rebirth of Cold War-era military-sponsored social research. Seeking expert knowledge that would enable the United States to contain communism, the Pentagon turned to social scientists. Beginning in the 1950s, political scientists, social psychologists, and anthropologists optimistically applied their expertise to military problems, convinced that their work would enhance democracy around the world. As Rohde shows, by the late 1960s, a growing number of scholars and activists condemned Pentagon-funded social scientists as handmaidens of a technocratic warfare state and sought to eliminate military-sponsored research from American intellectual life. But the Pentagon's social research projects had remarkable institutional momentum and intellectual flexibility. Instead of severing their ties to the military, the Pentagon's experts relocated to a burgeoning network of private consulting agencies and for-profit research offices. Now shielded from public scrutiny, they continued to influence national security affairs. They also diversified their portfolios to include the study of domestic problems, including urban violence and racial conflict. In examining the controversies over Cold War social science, Rohde reveals the persistent militarization of American political and intellectual life, a phenomenon that continues to raise grave questions about the relationship between expert knowledge and American democracy.

free cna training in dc: The Changing Of The Guard Martin L Lasater, 2019-07-11 The increased military power of China since the close of the Cold War has forced the United States to reconsider its security policy toward Taiwan. In this volume, Martin Lasater explores the many new factors that are now influencing U.S. calculations of one of its more enduring and important security interests in Asia. He considers such security concerns as the reduction of U.S. military forces in the western Pacific, a new arms race in the Taiwan Strait, Sino-American tensions over human rights and arms proliferation issues, increased calls for Taiwan's independence, the Clinton administration's concentration on domestic issues, and the shifting balance of power in the Asia Pacific—especially the PRC's growing influence. Considering the difficult issues President Clinton must weigh, Lasater provides a timely analysis of Taiwan's security in the 1990s within the broader context of Sino-American relations.

free cna training in dc: The New World of Police Accountability Samuel E. Walker, Carol A. Archbold, 2018-12-12 This book gives a brief yet thorough summary of the main components of police accountability in the 21st century. What works, what doesn't, and where are we going in the future? I love to use it with my undergraduate students to help them understand the complexities of policing in the modern era. —Janne E. Gaub, East Carolina University Completely revised to cover recent events and research, the Third Edition of *The New World of Police Accountability* provides an original and comprehensive analysis of some of the most important developments in police accountability and reform strategies. With a keen and incisive perspective, esteemed authors and policing researchers, Samuel Walker and Carol Archbold, address the most recent developments and provide an analysis of what works, what reforms are promising, and what has proven unsuccessful. The book's analysis draws on current research, as well as the President's Task Force on 21st Century Policing and the reforms embodied in Justice Department consent decrees. New to the Third Edition: The national crisis over police legitimacy and use of force, is put into context through extensive discussions of recent police shootings and the response to this national crisis, providing readers a valuable perspective on the positive steps that have been taken and the limits of those steps. Coverage of the issues related to police officer uses of force is now the prevailing topic in Chapter 3 and includes detailed discussion of the topic, including de-escalation, tactical decision making, and the important changes in training related to these issues. An updated examination of the impact of technology on policing, including citizens' use of recording devices, body-worn cameras, open data provided by police agencies, and use of social media, explores how technology contributes to police accountability in the United States. A complete, up-to-date discussion of citizen oversight of the police provides details on the work of selected oversight agencies, including the positive developments and their limitations, enabling readers to have an informed discussion of the subject. Detailed coverage of routine police activities that often generate public controversy now includes such topics as responding to mental health calls, domestic violence calls, and police stop and frisk practices. Issues related to policing and race relations are addressed head-on through a careful examination of the data, as well as the impact of recent reforms that have attempted to achieve professional, bias-free policing.
