fred meyer interview questions: Motherhood after Incarceration Melissa Thompson, Summer Newell, 2021-03-31 *Motherhood after Incarceration: Community Reintegration for Mothers in the Criminal Legal System* explores the relationships of women with their children immediately after periods of incarceration. The analysis draws on in-depth interviews with 39 women who are mothers and who had recently been released in the Portland, Oregon, metropolitan area. Using data collected from these interviews, the authors address three interrelated questions: (1) How does incarceration affect mother/child bonds? (2) What obstacles interfere with successful reintegration of these mothers into the community? (3) Do mothers who regain immediate custody of their children after incarceration reintegrate better than those with delayed (or no) resumption of child custody? Implications of these findings for policy are explored. The research results demonstrate the struggles justice-involved mothers experience over time as they seek to reintegrate into the community and resolve their relationships with their children, while also struggling with employment, housing, family relationships, and avoiding situations that might ultimately lead to recidivism. The authors suggest that policies for reducing recidivism among reentering women should provide more resources for housing, childcare, mental health, and job training and coaching. Further, there are often behavioral and emotional repercussions associated with the lengthy separation of mother and child, which highlights the need for parenting support for these mothers and their children, including social and emotional counseling, and resources directed toward the maintenance of family ties. This book's detailed look at motherhood after incarceration, both for mothers with custody and without, will appeal to academics, policy makers, community advocates and activists, and undergraduate and graduate students in social science courses on correctional policy, gender and crime, and social work.

fred meyer interview questions: Reading Mennonite Writing Robert Zacharias, 2022-05-17 Mennonite literature has long been viewed as an expression of community identity. However, scholars in Mennonite literary studies have urged a reconsideration of the field’s past and a reconceptualization of its future. This is exactly what *Reading Mennonite Writing* does. Drawing on the transnational turn in literary studies, Robert Zacharias positions Mennonite literature in North

America as “a mode of circulation and reading” rather than an expression of a distinct community. He tests this reframing with a series of methodological experiments that open new avenues of critical engagement with the field’s unique configuration of faith-based intercultural difference. These include cross-sectional readings in nonnarrative literary history; archival readings of transatlantic life writing; Canadian rewritings of Mexican film’s deployment of Mennonite theology as fantasy; an examination of the fetishistic structure of ethnicity as a “thing” that has enabled Mennonite identity to function in a post-identity age; and, finally, a tentative reinvestment in ideals of Mennonite community via the surprising routes of queerness and speculative fiction. In so doing, Zacharias reads Mennonite writing in North America as a useful case study in the shifting position of minor literatures in the wake of the transnational turn. Theoretically sophisticated, this study of minor transnationalism will appeal to specialists in Mennonite literature and to scholars working in the broader field of transnational literary studies.
