ice breaker questions for school: The Hidden Curriculum Rachel Gable, 2022-07-26 A revealing look at the experiences of first generation students on elite campuses and the hidden curriculum they must master in order to succeed College has long been viewed as an opportunity for advancement and mobility for talented students regardless of background. Yet for first generation students, elite universities can often seem like bastions of privilege, with unspoken academic norms and social rules. The Hidden Curriculum draws on more than one hundred in-depth interviews with students at Harvard and Georgetown to offer vital lessons about the challenges of being the first in the family to go to college, while also providing invaluable insights into the hurdles that all undergraduates face. As Rachel Gable follows two cohorts of first generation students and their continuing generation peers, she discovers surprising similarities as well as striking differences in their college experiences. She reveals how the hidden curriculum at legacy universities often catches first generation students off guard, and poignantly describes the disorienting encounters on campus that confound them and threaten to derail their success. Gable shows how first-gens are as varied as any other demographic group, and urges universities to make the most of the diverse perspectives and insights these talented students have to offer. The Hidden Curriculum gives essential guidance on the critical questions that university leaders need to consider as they strive to support first generation students on campus, and demonstrates how universities can balance historical legacies and elite status with practices and policies that are equitable and inclusive for all students.

ice breaker questions for school: Education without Schools Helen E. Lees, 2013-11-08 At a time when education and school choices are under increasing scrutiny, this topical book considers education more broadly than ever before. The author, an experienced teacher and researcher, highlights what happens when parents discover that an alternative to school education exists and is legal. This under-researched topic highlights the lack of governmental interest in alternative education and also considers the human rights issues, conflation with safeguarding, the relationship of the state to education and parental education choice. Focusing on the discovery of elective home education (EHE) in England as a case study for new and necessary arguments, the ideas discussed are also relevant internationally. The book considers the global fact of education as not just mainstream schooling, but how the dominance of schooling has affected our ability to conceive of education as diverse and different. This thought-provoking book will appeal to academic, teaching and policy-making audiences.

ice breaker questions for school: Create Your School Library Writing Center Timothy Horan, 2016-10-16 Colleges typically have writing centers to which students can bring their writing assignments to a peer tutor for assistance, but most high schools and middle schools do not. This book advocates for the creation of writing centers in 7-12 schools and explains why the school library is the best place for the writing center. There is a glaring absence of writing centers in today's K-12 schools. More and more students are being asked in college entrance testing to submit samples of their writing, and employers are expecting their workers to write correctly and clearly. This book addresses the critical lack of writing centers below the undergraduate level. It demonstrates how middle school and high school librarians can create writing centers in their school libraries, explains how to assist students through a one-on-one writing tutorial method, and gives students and teachers the tools for learning and understanding the complex art of writing. Author Timothy Horan—inventor of the School Library Writing Center—establishes why school libraries represent the best—and most logical—places to create writing centers, and why school librarians are the natural choice to direct writing center operations. He then takes readers through the process of creating a writing center from original conception up through opening day. Additional topics covered include how to publicize and grow your School Library Writing Center; maintaining your writing center for efficient operation on a daily basis as well as for years to come; how to become an effective writing center director and writing tutor; the most current technology that can be used to assist in the writing, composition, and research process; and working with English language learner (ELL) students within your writing center.
