ice breaker questions for high school students: Teaching Unprepared Students Kathleen F. Gabriel, 2023-07-03 As societal expectations about attending college have grown, professors report increasing numbers of students who are unprepared for the rigors of postsecondary education—not just more students with learning disabilities (whose numbers have more than tripled), but students (with and without special admission status) who are academically at-risk because of inadequate reading, writing and study skills. This book provides professors and their graduate teaching assistants—those at the front line of interactions with students—with techniques and approaches they can use in class to help at-risk students raise their skills so that they can successfully complete their studies. The author shares proven practices that will not only engage all students in a class, but also create the conditions—while maintaining high standards and high expectations—to enable at-risk and under-prepared students to develop academically and graduate with good grades. The author also explains how to work effectively with academic support units on campus. Within the framework of identifying those students who need help, establishing a rapport with them, adopting inclusive teaching strategies, and offering appropriate guidance, the book presents the theory teachers will need, and effective classroom strategies. The author covers teaching philosophy and goals; issues of discipline and behavior; motivation and making expectations explicit; classroom climate and learning styles; developing time management and study skills; as well as the application of “universal design” strategies. The ideas presented here—that the author has successfully employed over many years—can be easily integrated into any class.

ice breaker questions for high school students: Vietnamese Language, Education and Change In and Outside Vietnam Phan Le Ha, Dat Bao, Joel Windle, 2024-05-21 This open access edited book attempts to break new ground in investigating multiple facets of Vietnamese language, education and change in global contexts, engaging with global Vietnam through complex lenses of language and education. Issues of language, globalization, and global identities have often been framed through the lens of hierarchical/binary power relations, and/or through a dichotomy between hyper-central languages, such as English, and revisualized or marginalized local language and cultures. In this book, this dichotomy is turned on its head by considering how Vietnam and Vietnamese are constructed in and outside Vietnam and enacted in global spaces of classrooms, textbooks, student mobility, community engagement, curriculum, and intercultural contacts. Vietnamese is among the world's most spoken languages and is ranked in the top 20th in terms the number of speakers. Yet, at the same time, as a 'peripheral' or 'southern' global language as often seen in the Global North-Global South spectrum, the dynamics of multilingual and multicultural encounters involving Vietnamese generate distinctive dilemmas and tensions, as well as pointing to alternative ways of thinking about global phenomena from a fresh angle. Rather than being outside of the global, Vietnamese - like many other 'non-central' global languages - is present in diasporas, commercial, and transnational structures of higher education, schooling, and in the more conventional settings of primary and secondary school, in which visions of culture and language also evoke notions of heritage and tradition as well as bring to the fore deep seated ideological conflicts across time, space, communities, and generations. Relevant to students and scholars researching language, education, identity, multiculturalism, and their intersections, particularly related to Vietnam, but also in Southeast Asia and beyond, this volume is a pioneering investigation into overlooked contexts and languages from a global, southern-oriented perspective. This book presents an eclectic collection of 15 chapters unified by an interest in developing and teaching the Vietnamese language. To my knowledge, there has been no previous attempt to make the national language of Vietnam a focus for as many perspectives as are documented in the book. In this regard, the book makes an original and intriguing contribution to the literature on Vietnamese culture, including the culture of Vietnam's expanding diaspora. The book is pioneering in the extent to which it draws attention to the many roles played by a national language in a nation's political, social and cultural development. It also documents the challenges of preserving a national language in settings where it is at risk of being marginalized. It is pleasing that so many of the contributing authors are young Vietnamese scholars who can provide a distinctly Vietnamese perspective on concepts and practices of global significance. - Dr. MartinHayden, Emeritus Professor of Higher Education, Southern Cross University, Australia Vietnamese Language, Education and Change In and Outside Vietnam brings together an excellent collection of chapters that highlight the diverse and important but under-explored roles Vietnamese language plays in different settings within and outside Vietnam. The fifteen chapters of this much needed book provide unique insights into various aspects and meanings of Vietnamese language. Collectively, the volume contributes to broadening our view about the evolution and transformation of Vietnamese language under the impacts of local, national, regional and global forces. The book invites readers to engage in a reflective and intersectional approach to rethinking and re-examining our understandings of the changes and developments of Vietnamese language over the history of the country. - Dr Ly Tran, Professor, Centre for Research for Educational Impact (REDI), Deakin University, Australia, and Founder: Australia-Vietnam International Education Centre

School counselors have an enormous impact on students' achievement and their success in their post-secondary education, yet initiatives to improve student outcomes often overlook them. Important steps covered in this curriculum include Making the transition to ninth grade successful Using technology in the advising process, such as online resources for college and career research, assessing interests, and structuring advising sessions Preparing for standardized testing and using it to motivate students about the college application process Assisting students in researching careers and colleges, making the most of college visits, applying for college, and writing the application essay Equally important, the book focuses on the counselor and his or her role as an advocate and leader for students and details running a guidance office, working with parents, and writing Secondary School Reports.
