Most of that teaching has happened within the classroom and many professionals have spent their lives instructing others on various aspects of communication. Inside this second edition, the editors have assembled a fully comprehensive and contemporary discussion of topics and issues concerning the teaching of communication. The chapters contained herein--contributed by key voices throughout the communication discipline--address conceptual as well as practical issues related to communication instruction. The contents of this new edition reflect the dramatic changes that have occurred in communication education since the publication of the first edition in 1990. This book focuses initially on the goals of communication education, then delves into the preparation of specific communication courses. It includes assistance for instructors in organizing instructional content and discusses the use of instructional strategies and tools, as well as offering ideas on evaluating the processes and products of instruction. The volume also covers unique teaching assignments that may be encountered, from the basic course to continuing education, and addresses 2-year college teaching, directing forensic programs, distance education, and consulting. It concludes with important professional issues faced by both new and experienced communication instructors, including ethics and political issues within classrooms and departments. **ice breaker questions for classroom: Melting the ice: Engaging and educational ice-breaker activities for every learning session** Jen Schneider, 2023-04-14 The first five minutes of a classroom experience are critical. The tone set in a session's opening minutes can significantly impact and influence, in both positive and negative ways, the quality and nature of the subsequent learning experience. How students spend that time can also have a positive impact on their learning in both the short and long term. When the opening minutes of a class are approached as an opportunity to build student connections, collaboration, and community, all learners benefit. As more and more learning experiences occur in synchronous and asynchronous online learning environments, strategies that both welcome students to online sessions and support student learning are increasingly important. Traditional ice breakers, while typically shared with a goal of building community and student engagement, can sometimes have unintended or even negative consequences on students. This text shares a collection of powerful, opening activities that are designed to simultaneously engage students, build safe and connected classroom communities, and support student learning. All strategies are easily adapted and personalized to fit individual course and content needs including face-to-face, synchronous online, and asynchronous online learning contexts. Shared activities are aligned with associated learning-science research and incorporate strategies that have been shown to support student engagement and learning such as retrieval practice, active recall, spaced practice, and interleaving, among other evidence-based instructional strategies.

**ice breaker questions for classroom: *WPAing in a Pandemic and Beyond*** Todd Ruecker, Sheila Carter-Tod, 2025-04-01 Writing program administrators have a long history of advocating for their students, fellow faculty, and programs. This advocacy includes defending their work against other entities that seek to dictate the work, challenging institutional policies that define student success in a narrow way or create untenable conditions for writing faculty workloads, and making antiracism a central part of writing programs. The COVID-19 pandemic undoubtedly created a variety of additional challenges for those working in education at all levels. WPAs suddenly had to navigate new public health mandates alongside student and instructor fears as well as pressures by administrations and publics to teach in person. The chapters in this collection include a variety of voices who have been involved in writing program administration in recent years to reflect on the work done in this moment of crisis. Through both short vignettes and longer chapters, this book explores the complicated interactions between WPA work and navigating times of crisis to provide insights for moving forward. Authors explore a variety of topics including professional development, curricular change, advocating in the face of intransigent administrations and others, caring for students, and taking time for self-care. Pointing to specific actions for continued advocacy, *WPAing in a Pandemic and Beyond* will be of great interest to WPAs and writing studies scholars.

The book covers: how to run a room; dissecting lessons: written texts, aural texts and visuals; teacher-student interactions, communicative tasks and sentence-building; developing phonological and phonics skill; purposeful games; teaching with words and chunks; teaching students with varying aptitude for language learning; using digital technology to support learning; what it means to teach grammar; intercultural understanding; building a repertoire to lighten your workload. Packed full of strategies which are easy to implement, this book is essential reading for both pre-service teachers and experienced practitioners.
